

# Elosity<sup>®</sup>

## Next-generation RTSM, built to move at the speed of your trial

### Meet Elosity, Endpoint Clinical's 5th-generation RTSM platform—

designed to accelerate startup, streamline collaboration, and simplify even the most complex study designs. Built on decades of operational expertise and modern cloud architecture, Elosity delivers unmatched adaptability without compromising quality.

### Why Elosity

Elosity gives you the freedom to manage your clinical programs on your terms—offering an agile, modern RTSM platform designed to keep pace with your trial. Built as Endpoint's 5th-generation RTSM, Elosity reflects everything we've learned from delivering over 2,000 studies across every phase, region, and therapeutic area. It's the product of 15+ years of hands-on experience—engineered for flexibility, speed, and simplicity from the start.

- Built to support rapid study builds and seamless mid-study changes
- Designed to reduce risk through automation and intuitive workflows
- Created with global delivery in mind—backed by a follow-the-sun support model
- Developed to work the way study teams do, not the other way around

### **Simplified Design Changes**

Quickly adapt with an intuitive system that enables seamless changes and real-time previews, all without interrupting your live study.

### **Centralized Access**

Easily access all your studies, data, and advanced insights with one login supporting streamlined operations and a best-in-class user experience.

### **Built-In Quality Control**

Harness advanced automation to streamline quality checks across the entire study lifecycle. From initial build to testing and ongoing validation, Elosity ensures accuracy and efficiency at every step

### **Transparent Study Design**

Collaborate in real time with full visibility into your study's design, from kick-off to close-out, refining every element seamlessly throughout the trial lifecycle.

### **Seamless Supply**

Maximize resources with advanced drug pooling, streamlined global distribution, and complete accountability for efficient inventory management and reallocation.

### **Simplified Integrations**

Leverage seamless point-and-click integrations through partnerships with leading B2B software and eClinical technologies, ensuring effortless connectivity and streamlined workflows.

### **Enhanced by elo AI™**

Elosity is supported by elo AI™, Endpoint's embedded ecosystem of intelligent agents that work behind the scenes to simplify tasks, automate workflows, and surface real-time insights.

From protocol design to supply forecasting, elo AI™ helps study teams move faster, make smarter decisions, and reduce manual burden—without disrupting how they work.

### **Partner with us to meet your endpoints**

 8045 Arco Corporate Drive, Suite 250, Raleigh-Durham, NC 27617
