

De-risk randomization with the Endpoint biostatistical approach

Precision in study design is critical for maintaining study integrity, reducing waste, and ensuring seamless execution in randomization and trial supply management (RTSM).

Endpoint Clinical's biostatistical services are all designed to add the expertise, precision, and proactive planning that keep your trials moving forward without disruption. Work with our in-house expert biostatistics team to optimize your study from the start.

A BIOSTATISTICS SOLUTION FOR EVERY STUDY

Randomization lists: For efficacy and compliance

We use industry-leading methodologies to design and generate balanced randomization lists that integrate with our RTSM solutions.

- ✓ Creation and review of dummy and production randomization lists
- ✓ Ensuring accuracy and compliance with protocol needs

Kit lists: Align your supply with your needs

We leverage automation and predictive resupply models to build kit lists that support any randomization scheme.

- ✓ Development and leadership on kit list specifications
- ✓ Optimization of packaging and supply strategies

Consulting: Strategic support throughout

We provide customized guidance for efficient randomization methodologies and supply strategies and additional support based on your unique study needs.

- ✓ Expert advice on randomization methods and adaptive designs
- ✓ Support for site resupply strategies and recruitment-based adjustments

WHY BIOSTATICIANS ARE ESSENTIAL TO STUDY SUCCESS

Gain Subject Matter Expertise (SME) input to optimize study design

Minimize risks in randomization and ensure design integrity

Avoid delays and potential design issues with proactive planning

DISCOVER THE ENDPOINT DIFFERENCE: PURPOSE-BUILT RTSM

At Endpoint Clinical, we don't just deliver RTSM technology—we provide a hidden advantage that drives efficiency, minimizes risk, and ensures seamless support throughout your trial journey.

Industry-leading RTSM experience

Over 15 years of RTSM expertise, guiding you through every step of your trial with proven solutions and dedicated support

High-touch quality management

Exceptional attention to detail, ensuring robust processes, minimized risks, and unwavering reliability from start to finish

Tech-forward innovation

Forward-thinking technology and services designed to adapt to your needs, making every trial smarter, faster, and more effective

Partner with us to meet your endpoints
