

## ENDPOINT USER ACCEPTANCE TESTING (UAT)

# Keep trials on track with UAT testing from Endpoint

Successful randomization and trial supply management (RTSM) implementation relies on more than just technology—it requires rigorous testing and validation to ensure your system is ready to perform.

Endpoint Clinical's UAT services provide your team with flexible, comprehensive support for execution and document testing that satisfies both regulatory requirements and your study needs, helping to prevent potential disruptions before the system goes live.

## WHY ENDPOINT UAT FOR STUDY SUCCESS

### Productivity

We enable your study teams to focus on their expertise and help increase productivity by removing the burden of UAT management.

### Collaboration

An independent test strategy eliminates conflict of interest and promotes team collaboration.

### Flexible

Our support model is personalized and flexible to fit your company's needs. We ensure business continuity every step of the way.

### Patient Safety

Our test methodology and ability to deeply focus on study protocol and system requirements have helped identify safety issues in advance of study go-live.

## UAT SUPPORT SOLUTIONS FOR ANY STUDY

Endpoint Clinical's dedicated UAT team will ensure your system operates smoothly and is ready for deployment, so your study can kick off with confidence.

### Option 1: Endpoint Authored Scripts

Comprehensive and tailored UAT test scripts to guide testing to ensure tests cover all recommended areas of UAT.

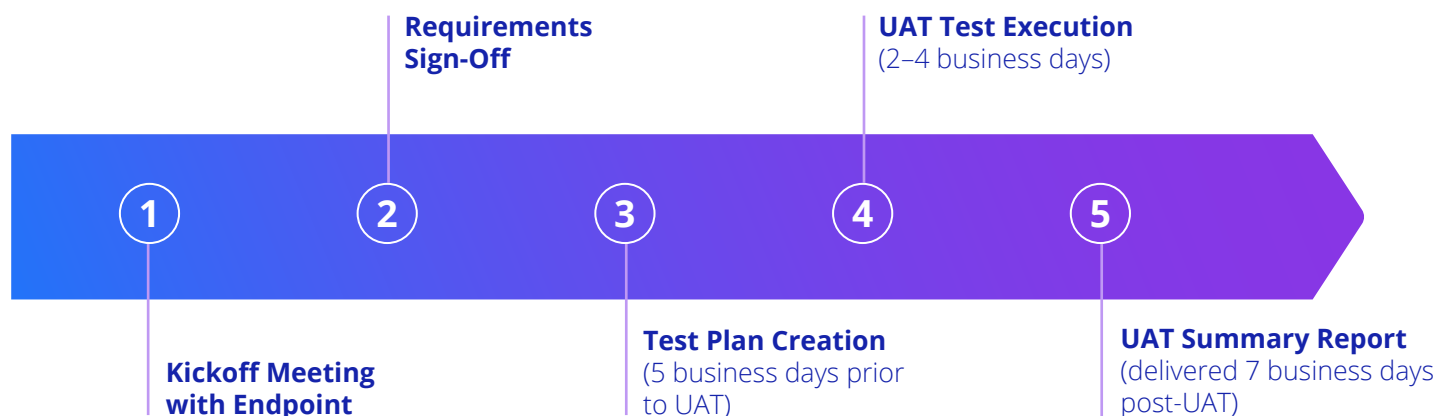

- Detailed step by step testing instructions provided including positive and negative tests.
- Test scripts can be customized to client feedback and include numerous revisions per client request.
- Scenario testing set up provided to support UAT execution.

### Option 2: Endpoint Executed UAT

Comprehensive and tailored UAT test scripts and UAT execution.

- Detailed step by step testing instructions provided including positive and negative tests.
- Test scripts can be customized to client feedback and include numerous revisions per client request.
- Inclusive of UAT execution on behalf of trial team.

## MEET YOUR ENDPOINTS WITH OUR PROVEN UAT PROCESS

## DISCOVER THE ENDPOINT DIFFERENCE: PURPOSE-BUILT RTSM

At Endpoint Clinical, we don't just deliver RTSM technology—we provide a hidden advantage that drives efficiency, minimizes risk, and ensures seamless support throughout your trial journey.
