

Empowering Every Phase of Your Clinical Journey

PULSE® gives you the freedom to manage your clinical programs on your terms—offering a configurable, modern RTSM platform built on decades of operational expertise and innovation. With over 2,000 studies delivered across every phase, region, and therapeutic area, PULSE® reflects Endpoint's commitment to quality, speed, and simplicity.

Pre-validated, configurable components and a mobile-ready interface enable fast deployment and seamless mid-study changes.

Advanced randomization methods and supply management adapt to your study's unique needs.

Intuitive workflows and built-in quality controls reduce risk and ensure accuracy throughout the study lifecycle.

Proven expertise across 90+ countries, 650K+ patients, and 90K+ sites, with a broad customer base including leading pharma and biotech companies.

Driven by customer input, PULSE® is continuously enhanced with new features, self-service functionality, and expanded supply management.

Simplified Design Changes

Quickly adapt with an intuitive system that enables seamless changes and real-time previews—without interrupting your live study.

Centralized Access

Easily access all your studies, data, and advanced insights with one login, supporting streamlined operations and a best-in-class user experience.

Built-In Quality Control

Harness advanced automation to streamline quality checks across the entire study lifecycle. From initial build to testing and ongoing validation, PULSE® ensures accuracy and efficiency at every step.

Transparent Study Design

Collaborate in real time with full visibility into your study's design, refining every element seamlessly throughout the trial lifecycle.

Seamless Supply Management

Maximize resources with advanced drug pooling, streamlined global distribution, and complete accountability for efficient inventory management and reallocation.

Simplified Integrations

Leverage seamless point-and-click integrations through partnerships with leading B2B software and eClinical technologies, ensuring effortless connectivity and streamlined workflows.

Endpoint Clinical: Trusted excellence meets quiet innovation

15 Years of Innovation

Trusted RTSM solutions since 2009.

200+ Years of Expertise

Deep experience across our leadership team.

100% Flexible Fit

Feature-rich RTSM tailored to any trial.

5 Platform Generations

Evolving to meet the needs of modern studies.

Partner with us to meet your endpoints
