Our services

Thinking ahead from the start

Technical planning and consulting

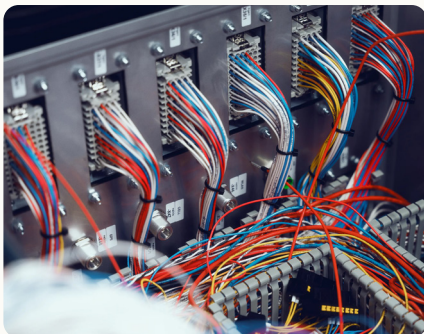

Quality begins with planning. At pema, we analyze technical requirements, operating conditions, and interfaces early on – ensuring a safe, functional, and economically optimized implementation. Our experience across various industries enables innovative, precisely tailored cable solutions. The result: less effort for you, smooth processes – and a connection that lasts.

For the toughest demands

Cable assembly

- **Single wires**
from 0.08 mm to 300 mm
- **Cable sets**
assembled according to customer specifications
- **Bundled cable harnesses**
from simple to complex
- **Specialization**
on high manual manufacturing effort

Tailored precision

Assembly manufacturing

- **Terminal boxes**
Robust and flexible solutions for secure cable connections
- **Control cabinets**
Tailored solutions for complex control tasks
- **Control panels**
Ergonomically designed interfaces for optimal usability
- **Terminal rows**
Precisely manufactured components for reliable connections

High quality

100 % testing for maximum reliability

With regular in-process inspections and a thorough final check, we ensure the highest level of safety and reliability for our products. We test for function and continuity, short circuits and high voltages, pull-off forces, crimping force and micrographs.
