

SUBSEA GLOBAL
SOLUTIONS

**The ONE SOURCE
for Global
Underwater
Solutions**

Reduce Dry Dock Dependency. Save Time. Save Millions.

Proven in-water repair and maintenance solutions that minimize downtime, reduce costs, and improve vessel efficiency.

Dry docking is expensive, time-consuming, and increasingly difficult to schedule:

- \$1M–\$5M+ per dry dock event
- 7–21+ days off-hire
- Weeks (or months) of scheduling delays
- Lost operational availability

The Subsea Global Solutions Advantage

We perform complex repairs and maintenance in-water, eliminating unnecessary dry dock events.

- 50–90% reduction in downtime
- Avoid or defer dry docking in many scenarios
- 24/7 rapid global response
- Class-approved permanent underwater repairs

Mission / Operational Impact

- Increase vessel availability
- Reduce maintenance backlog
- Maintain schedules and avoid disruption
- Reduce reliance on congested shipyards
- Improve readiness and operational efficiency

Proven Results: Case Studies

Stern Tube Seal Repair

- Dry dock: 10–14 days / \$1.5M–\$2.5M
 - In-water: 72 hours / ~\$400K–\$600K
- Up to \$2M saved + 10+ days regained

Thruster Repair (Emergency)

- Up to 7 days downtime avoided
- \$750K–\$1M cost savings

Propeller Repair

- 48-hour turnaround
- \$300K–\$700K cost avoidance

Why Choose Subsea Global

- Global footprint: 13+ home ports, 200+ divers
- 80+ years of innovation in underwater repair
- IACS Class-approved & OEM-certified solutions
- Proven track record across commercial, offshore, and government fleets
- Advanced reporting via SGS Online Report Tool (ORT)

Core Capabilities

- Underwater repairs (seals, thrusters, propellers, hull)
- Class A wet welding & permanent structural repair
- Hull cleaning & propeller polishing (ROV / C-ROV)
- In-water inspections & class surveys
- Hyperbaric habitat repairs
- Emergency response & turnkey project management
