

BAILEY MOVING YOU FORWARD™

Work Truck Solutions

We Keep Moving You Forward

Our dedication to excellence and innovation allows us to meet the unique demands of OEM clients, ensuring seamless integration into larger systems. Whether providing custom-engineered solutions for specialized applications or delivering reliable standard products, **we understand the critical role hydraulic and electronic components play across OEM industries.** Our expert team works closely with you to develop tailored solutions that enhance performance, reliability, and efficiency—ensuring we keep you moving forward.

Product Category Highlights

Certifications

The Bailey Product Edge

Comprehensive Inventory

Our extensive inventory of ready-to-ship products ensures fast fulfillment to keep your projects on schedule.

Rigorous Quality Control

Industry-leading field reliability through on-site testing, quality audits, supplier training, and incoming product inspections.

Short Lead Times

Fast production for custom cylinders (6-10 weeks) and hydraulic power units (2-6 weeks), with options for shorter timelines.

International and Domestic Networks

Reliable and high-quality products with competitive pricing, supported by global manufacturing and distribution.

Work Truck Solutions

Bailey proudly supports the Work Truck industry with high-quality hydraulic and electronic products engineered for maximum performance and reliability. **Our solutions power work trucks that drive critical industries, including Utility, Railroad, Waste & Recycling, GSE aviation, Transportation, Mining, and Construction.** With Bailey, you get innovative, dependable products that keep essential operations moving forward.

Innovative Solutions for Utility Work Trucks

Tackle utility maintenance and repairs with confidence using reliable components designed for peak performance. Baileys’ product systems optimize efficiency and reduce downtime, ensuring you’re always ready to get the job done.

Engineered for Excellence in the Railroad Industry

Precision and safety are paramount in railroad transportation and maintenance. Our high-performance components deliver exceptional control and reliability, ensuring seamless operations and peace of mind on every line.

Ground Support Equipment That’s Always On Point

Keep airport operations running smoothly with high-performance hydraulic and electronic systems. Engineered for reliability under pressure, our solutions ensure ground support vehicles keep pace with the demands of modern aviation.

Maximize Truck Efficiency in Transportation Operations

Maximize uptime and get more done with components that keep your fleet running strong. Baileys’ systems enhance reliability and reduce fuel waste, ensuring seamless transportation operations.

Driving Mining Efficiency with Robust Components

Tough conditions call for tougher equipment. Baileys’ solutions are built to withstand the extreme demands of mining environments, delivering reliable performance when it matters most.

Strategic Warehouse & Shipping Locations

For over 45 years, Bailey has been a trusted provider of hydraulic components and electronic controls, delivering innovative solutions to support dealers and distributors. Our locations include:

- Knoxville, Tennessee, USA
- Grand Rapids, Michigan, USA
- Kansas City, Missouri, USA
- Reno, Nevada, USA
- Montreal, Québec, Canada
- Victoria, British Columbia, Canada

The Bailey Experience

Hydraulic Expertise & Custom Engineering

Bailey specializes in precision-engineered hydraulic solutions. Our expert engineers work closely with integrators to **design customized components that boost performance and enhance durability**—even in the most complex systems.

Electronic Product Grouping & Advanced Controls

We deliver best-in-class electronic components engineered for seamless system integration. Our electronics product grouping services simplify procurement by providing complete, ready-to-install solutions.

Build Custom

Bailey’s Customization Program provides **customizable motors, manifolds, valves and pumps, offering build-to-order options and reconfigurable stock for fast turnaround times.** Backed by a 17,000 sq. ft. facility and six strategically located warehouses, our expert team delivers superior support and industry-leading capabilities to meet your needs.
