Europe Imports stone products are researched at length to ensure only the highest of quality stone is produced and distributed. All our stone selections are of the highest density and formats are produced with only a +/- 1mm tolerance. We work incredibly closely with our quarries and suppliers in the block selection process and have quality assurances in place throughout the process.

Sealing natural stone is essential in ensuring the longevity of the product. Europe Imports recommend the Chemforce Fortifier Plus for pool coping that will be affected by salt water. This is a penetrating consolidator plus permanent water repellent and protects the stone against salt spalling. For all other areas we recommend the Chemforce Stain-Protector premium impregnating sealer.
