

PCR Plate Barcode Request Form

Arvensis standard and custom linear barcoded plates are available upon request.

The standard format is a 10-digit, unique, alphanumeric code, centred on sidewall of plates, printed in Code 128 which is compatible with most barcode readers. In addition, human readable format is printed to the right of the barcodes. We guarantee unique codes, however we do not guarantee sequential numbers.

Standard single or double barcoded plates can be requested without having to complete this Barcode Request form.

We apply an additional label to each product box confirming that it has been barcoded, and we specify 1st and last sequence number of each box.

To order either version, the following information is required on a purchase order:

- Product code
- Product code barcode surcharge
- Product code barcode setup fee if applicable

Use this form for Custom Barcode PCR plate orders in conjunction with a Purchase Order or to request a price. Incomplete or incorrect details may result in product delay.

ORDERING INFORMATION

Code	Description	Quantity
