

2D Code Request Form for PCR plates

Arvensis offers both standard and custom 2D coding solutions for PCR plates.

The standard 2D code format covers a 10-digit, unique, alphanumeric code, centred on sidewall of plates. We guarantee unique codes, however we do not guarantee sequential numbers.

Standard single or double 2D coded plates can be requested without having to complete this 2D Code Request form.

We apply an additional label to each product box confirming that it has been 2D coded, and we specify 1st and last sequence number of each box.

To order either version, the following information is required on a purchase order:

- Product code
- Product 2D code surcharge
- Product code 2D code setup fee if applicable

Use this form for Custom 2D Code PCR plate orders in conjunction with a Purchase Order or to request a price. Incomplete or incorrect details may result in product delay.

ORDERING INFORMATION

Code	Description	Quantity
SQR-1	Standard 2D Code, Direct Print on (H1-H12 / P1-P24) sidewall of plate (Direct Print 2D Coding is only available on white frame plates)	Surcharge for 1 plate
