## Product Catalog

# ENOLA PHARMACEUTICAL

Where Innovation Meets Healing

## Who We Are

Enola Pharmaceutical Inc. is a globally expanding pharmaceutical company headquartered in the UAE, with subsidiaries across Asia, the Middle East, Africa, and South America. We specialize in parenteral drugs, including anesthetics, narcotics, infusions, analgesics, and antibiotics and oversee every stage of the manufacturing process to ensure quality and consistency.

## Our Mission

Our Mission To simplify pharmaceutical operations through comprehensive solutions that enable healthcare organizations to navigate complex systems and regulatory landscapes with confidence across global markets.

## Our Vision

To be a global leader in pharmaceutical innovation - empowering healthier communities through accessible, high-quality medicines and agile healthcare solutions tailored to every market we serve. Manufacturing and compliance processes are managed with speed, accuracy, and full transparency.

# WHY CHOOSE ENOLA?

## Regulatory Excellence

We maintain strong relationships with Ministries of Health and local regulatory boards, guaranteeing that all licensing and compliance processes are completed with speed, accuracy, and transparency.

## Committed to Patients

We believe that healing begins with trust. Every product we release is validated by independent laboratories approved by USFDA or EU standards, ensuring safety and efficacy for the patients who rely on us. Our mission is to simplify access to high-quality medicines by delivering end-to-end pharmaceutical solutions tailored to local healthcare needs.

## Global Reach, Local Impact

Operating in the UAE, Iraq, India, Philippines, Brazil, Ethiopia, and Congo, Enola builds strong partnerships with local distributors and regulatory bodies to ensure timely compliance and market-specific solutions. We ship over 300,000 units monthly to more than 50 wholesaler delivery sites.

## Quality Assurance

All batches are validated by independent laboratories certified by USFDA and EU standards. Continuous investment in software, systems, and data ensures consistent quality and process scalability.

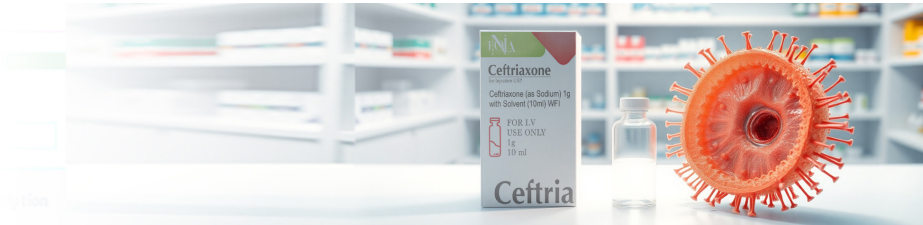

## Investor Advantage

Enola's scalable operations, regulatory agility, and expanding product portfolio position us as a strategic partner in emerging markets. Our continuous investment in data systems, software, and process innovation ensures operational excellence and long-term growth.

# Anti-Infectives

Treatment of bacterial, viral, and fungal infections

Therapeutic Grouping Included: Antibiotic, Antiviral, Antifungal

| Generic Name                | Strength(s) / Description          | Dosage Form                        | Route(s) | Therapeutic Grouping            | Indication(s)                                                  |
|-----------------------------|------------------------------------|------------------------------------|----------|---------------------------------|----------------------------------------------------------------|
| Amikacin                    | 100mg, 250mg/mL                    | Solution for Injection             | IV, IM   | Antibacterials for Systemic Use | Severe bacterial infections                                    |
| Clindamycin                 | 150 mg/mL                          | Solution for Injection             | IV, IM   | Antibacterials for Systemic Use | Gram-positive bacterial infections                             |
| Cefotaxime + Sulbactam      | 500mg/250mg, 1g/500mg              | Injection                          | IV, IM   | Antibacterials for Systemic Use | Wide variety of bacterial infections, surgical prophylaxis     |
| Ceftazidime                 | 500mg, 1g                          | Lyophilized Powder for Injection   | IV, IM   | Antibacterials for Systemic Use | Serious bacterial infections caused by gram-negative organisms |
| Ceftriaxone + Tazobactam    | 562.5mg, 1.25g, 2.25g              | Injection                          | IV, IM   | Antibacterials for Systemic Use | Resistant, polymicrobial, soft tissue infections               |
| Ceftriaxone Sodium          | 1g                                 | Lyophilized Powder for Injection   | IV, IM   | Antibacterials for Systemic Use | Systemic bacterial infections                                  |
| Ceftriaxone                 | 500mg                              | Lyophilized Powder for Injection   | IV, IM   | Antibacterials for Systemic Use | Mild to moderate infections                                    |
| Meropenem                   | 500mg, 1g                          | Powder for Injection (IV Infusion) | IV       | Antibacterials for Systemic Use | Severe or resistant infections                                 |
| Imipenem + Cilastatin       | 500mg/500mg                        | Lyophilized Powder for Injection   | IV       | Antibacterials for Systemic Use | Multidrug-resistant infections                                 |
| Linezolid + Sodium Chloride | 600mg/300mL                        | Solution for IV Infusion           | IV       | Antibacterials for Systemic Use | Resistant Gram-positive bacterial infections                   |
| Vancomycin                  | 500mg, 1g                          | Lyophilized Powder for IV Infusion | IV       | Antibacterials for Systemic Use | MRSA and Gram-positive infections                              |
| Ceftriaxone + Sulbactam     | 250mg/125mg, 500mg/250mg, 1g/500mg | Injection                          | IV, IM   | Antibacterials for Systemic Use | Lung infections, skin infections, UTI                          |
| Fluconazole                 | 200mg/100mL                        | Solution for IV Infusion           | IV       | Antifungals for Systemic Use    | Systemic fungal infections                                     |
| Acyclovir                   | 500mg                              | Lyophilized Powder for Injection   | IV       | Antivirals for Systemic Use     | Herpes simplex & zoster                                        |
| Ribavirin                   | 1g                                 | Lyophilized Powder for Injection   | IV       | Antivirals for Systemic Use     | Viral infections                                               |
| Azithromycin                | 100mg × 6 sachets                  | Granules for Oral Suspension       | Oral     | Antibacterials for Systemic Use | Respiratory, soft tissue, and pediatric infections             |
| Amoxicillin                 | 500mg, 1g                          | Lyophilized Powder for Injection   | IV, IM   | Antibacterials for Systemic Use | Lung infections, ear infections, skin infections, and UTI      |

## Respiratory Care

Inhaled therapies, airway management

**Therapeutic Grouping Included:** Bronchodilator, Anticholinergic, Corticosteroid, Long-Acting Bronchodilator + Steroid, Mucolytic

| Generic Name                        | Strength(s) / Description  | Dosage Form             | Route(s)   | Therapeutic Grouping                 | Indication(s)                             |
|-------------------------------------|----------------------------|-------------------------|------------|--------------------------------------|-------------------------------------------|
| Salbutamol                          | 100mcg                     | MDI                     | Inhalation | Drugs for Obstructive Airway Disease | Relief of bronchospasm in asthma and COPD |
| Beclomethasone Dipropionate         | 100mcg                     | MDI                     | Inhalation | Drugs for Obstructive Airway Disease | Anti-inflammatory for chronic asthma      |
| Fluticasone Propionate              | 125mcg, 250mcg             | MDI                     | Inhalation | Drugs for Obstructive Airway Disease | Moderate to severe asthma control         |
| Budesonide                          | 200mcg                     | MDI                     | Inhalation | Drugs for Obstructive Airway Disease | Maintenance therapy for asthma            |
| Salmeterol + Fluticasone Propionate | 25mcg/125mcg, 25mcg/250mcg | MDI                     | Inhalation | Drugs for Obstructive Airway Disease | Asthma and COPD maintenance therapy       |
| Formoterol + Budesonide             | 6mcg/200mcg                | MDI                     | Inhalation | Drugs for Obstructive Airway Disease | Asthma and COPD maintenance therapy       |
| Ipratropium Bromide                 | 250mcg, 500mcg/2mL         | Solution for Inhalation | Inhalation | Drugs for Obstructive Airway Disease | Relief of bronchospasm in COPD and asthma |
| Ambroxol Hydrochloride              | 15mg, 30mg/5mL             | Injection               | IV         | Cough and Cold Preparations          | Respiratory mucus clearance               |

## Supportive & Anti-Allergy Care

Allergy relief, nausea, and systemic support

**Therapeutic Grouping Included:** Antiemetic, Corticosteroid

| Generic Name               | Strength(s) / Description | Dosage Form                      | Route(s) | Therapeutic Grouping | Indication(s)                                          |
|----------------------------|---------------------------|----------------------------------|----------|----------------------|--------------------------------------------------------|
| Esomeprazole               | 40mg                      | Lyophilized Powder for Injection | IV       | GI / PPI             | Gastric acid suppression                               |
| Dexamethasone              | 4mg/mL (2mL)              | Solution for Injection           | IV, IM   | Anti-inflammatory    | Severe allergies, inflammation, autoimmune disorders   |
| Methylprednisolone Acetate | 40 mg/mL, 80 mg/mL        | Suspension for Injection         | IM       | Anti-inflammatory    | Allergic and autoimmune conditions                     |
| Ondansetron                | 2mg/mL (2mL)              | Solution for Injection           | IV, IM   | Antiemetic           | Nausea and vomiting prevention post-op or chemotherapy |
| Omeprazole                 | 20mg, 40mg                | Powder for Injection             | IV       | Antiulcer agents     | Acid-related disorders, GERD, ulcers                   |

# Pain, Sedation & Anesthesia

Pain relief, sedation, surgical support

**Therapeutic Grouping Included:** Antipyretic / Analgesic,  
Anesthetic (General, Local, Spinal), Sedative / Hypnotic, Muscle Relaxant

| Generic Name              | Strength(s) / Description  | Dosage Form              | Route(s)           | Therapeutic Grouping | Indication(s)                                    |
|---------------------------|----------------------------|--------------------------|--------------------|----------------------|--------------------------------------------------|
| Fentanyl Citrate          | 50mcg/ml (500mcg/10mL)     | Solution for Injection   | IV                 | Analgesics           | Pain relief & anesthesia adjunct                 |
| Tramadol Hydrochloride    | 50mg/mL                    | Solution for Injection   | IV, IM             | Analgesics           | Moderate to severe pain relief                   |
| Ketorolac Tromethamine    | 30mg/mL                    | Solution for Injection   | IM, IV             | Analgesics           | Moderate to severe pain relief                   |
| Paracetamol               | 1000mg / 100ml             | Solution for IV Infusion | IV                 | Analgesics           | Fever, mild to moderate pain                     |
| Propofol                  | 10mg/mL (200mg/20mL)       | Emulsion for Injection   | IV                 | Anesthetics          | Induction and maintenance of anesthesia          |
| Ketamine Hydrochloride    | 50mg/mL                    | Solution for Injection   | IV, IM             | Anesthetics          | Induction, procedural sedation                   |
| Articaine + Epinephrine   | 40mg/10mcg/mL (1.8mL)      | Solution for Injection   | Local Infiltration | Anesthetics          | Dental anesthesia                                |
| Lidocaine + Epinephrine   | 20mg/12.5mcg/mL (1.8mL)    | Solution for Injection   | Local Infiltration | Anesthetics          | Dental anesthesia                                |
| Bupivacaine Hydrochloride | 5mg/ml (20mL)              | Solution for Injection   | Epidural, Local    | Anesthetics          | Surgical anesthesia                              |
| Lidocaine Hydrochloride   | 10mg/mL (1%), 20mg/mL (2%) | Solution for Injection   | IV, SC             | Anesthetics          | Local anesthesia, arrhythmia management          |
| Ropivacaine               | 7.5mg, 10 mg/mL            | Solution for Injection   | Epidural           | Anesthetics          | Regional anesthesia for surgery or labor pain    |
| Rocuronium                | 10mg/mL (10mL)             | Solution for Injection   | IV                 | Muscle Relaxants     | Muscle relaxation during surgery/intubation      |
| Dexmedetomidine           | 100mcg/mL                  | Solution for IV Infusion | IV                 | Psycholeptics        | Sedation during intensive care                   |
| Diazepam                  | 5mg/mL                     | Solution for Injection   | IV, IM             | Psycholeptics        | Anxiety, seizures, and muscle spasms management  |
| Midazolam                 | 5mg/mL (3mL)               | Solution for Injection   | IV, IM             | Psycholeptics        | Sedation, seizure management                     |
| Bupivacaine + Glucose     | 5mg/80mg/ml (4mL)          | Solution for Injection   | Spinal             | Anesthetics          | Lower body anesthesia                            |
| Sevoflurane               | 250mL                      | Inhalation Liquid        | Inhalation         | General Anesthetic   | Induction and maintenance of anesthesia          |
| Isoflurane                | 100mL                      | Inhalation Liquid        | Inhalation         | General Anesthetic   | Surgical anesthesia                              |
| Esketamine                | 2mL, 10mL (50mg/mL)        | Injection                | IV, IM             | Antidepressants      | Sedation, seizure management, depression adjunct |

## Hemato & Cardiovascular Support

Cardiac, vascular, and blood-related stabilization

**Therapeutic Grouping Included:** Hematinic, Hemostatic, Anticoagulant, Vasopressor / Sympathomimetic Agent,  $\beta$ 1-Selective Beta Blocker, Nitrate / Vasodilator, pH Regulator

| Generic Name              | Strength(s) / Description | Dosage Form              | Route(s) | Therapeutic Grouping                              | Indication(s)                                           |
|---------------------------|---------------------------|--------------------------|----------|---------------------------------------------------|---------------------------------------------------------|
| Heparin                   | 5000 IU/mL (25000IU/5mL)  | Solution for Injection   | IV, SC   | Antithrombotic Agents                             | Thromboembolic disorder prevention and treatment        |
| Iron Sucrose              | 20 mg/mL (2.5mL, 5mL)     | Solution for Injection   | IV       | Antianemic Preparations                           | Iron deficiency anemia                                  |
| Tranexamic Acid           | 50 mg/mL, 100 mg/mL (5mL) | Solution for Injection   | IV       | Antihemorrhagics                                  | Hemorrhage prevention and control during trauma/surgery |
| Oxytocin                  | 5 IU/mL                   | Solution for Injection   | IM, IV   | Pituitary and Hypothalamic Hormones and Analogues | Labor induction and postpartum hemorrhage control       |
| Sodium Bicarbonate        | 7.5%, 8.4% w/v (10mL)     | Solution for IV Infusion | IV       | Blood substitutes and perfusion solutions         | Metabolic acidosis and pH balance adjustment            |
| Nitroglycerin             | 300mcg/ml                 | Solution for Injection   | IV       | Cardiac Therapy                                   | Angina, heart failure                                   |
| Hydralazine Hydrochloride | 20mg/ml                   | Solution for Injection   | IV       | Antihypertensives                                 | Severe hypertension                                     |
| Noradrenaline             | 1mg/mL, 4mg/mL            | Solution for IV Infusion | IV       | Cardiac Therapy                                   | Hypotension, septic shock                               |
| Adrenaline                | 0.1mg/mL, 1mg/mL          | Solution for Injection   | IM, IV   | Cardiac Therapy                                   | Anaphylaxis, cardiac arrest                             |
| Atropine Sulphate         | 0.5mg/ml, 1.25mg/ml       | Solution for Injection   | IV       | Anticholinergic                                   | Bradycardia, organophosphate poisoning                  |
| Metoprolol                | 1mg/mL, 5mg (per 5mL)     | Solution for Injection   | IV       | Beta Blocking Agents                              | Arrhythmias, hypertension, rate control                 |

## Contrast Agents for Diagnostic Imaging

Diagnostic applications across radiographic and MRI modalities

**Therapeutic Grouping Included:** Diagnostic Contrast Agent

| Generic Name | Strength(s) / Description      | Dosage Form            | Route(s) | Therapeutic Grouping        | Indication(s)                                   |
|--------------|--------------------------------|------------------------|----------|-----------------------------|-------------------------------------------------|
| Iohexol      | 350mg/mL (50,100mL)            | Solution for Injection | IV       | Radiographic contrast media | Contrast enhancement in radiographic procedures |
| Gadobutrol   | 604.72mg/mL (15mL, 30mL vials) | Solution for Injection | IV       | MRI Contrast Agent          | Contrast enhancement in MRI procedures          |

# Infusion and IV Support

IV fluids, nutrition, and supportive therapy

**Therapeutic Grouping Included:** Electrolyte / IV Fluid, Rehydration Agent, Parenteral Nutrition, Vitamin / Neuropathy Agent

| Generic Name                    | Strength(s) / Description                  | Dosage Form              | Route(s)                | Therapeutic Grouping                                 | Indication(s)                                           |
|---------------------------------|--------------------------------------------|--------------------------|-------------------------|------------------------------------------------------|---------------------------------------------------------|
| Sodium Lactate Ringer's         | 500mL                                      | Solution for IV Infusion | IV                      | Electrolyte / IV Fluid                               | Fluid and electrolyte restoration                       |
| 0.9% Sodium Chloride Irrigation | 9mg/mL (0.9% w/v) (500mL, 1000mL)          | Solution for IV Infusion | IV                      | Electrolyte / IV Fluid                               | Hydration, dilution, electrolyte balance                |

# Oncology & Immunomodulators

Cancer therapies and immunomodulating agents

**Therapeutic Grouping Included:** Antineoplastic / Oncology Agents, Tyrosine Kinase Inhibitor, Hypomethylating Agent

| Generic Name              | Strength(s) / Description  | Dosage Form                        | Route(s) | Therapeutic Grouping  | Indication(s)                             |
|---------------------------|----------------------------|------------------------------------|----------|-----------------------|-------------------------------------------|
| Daunorubicin HCl          | 10mg, 20mg                 | Lyophilized Powder for Injection   | IV       | Antineoplastic Agents | Acute leukemia                            |
| Paclitaxel                | 300mg                      | Solution for IV Infusion           | IV       | Antineoplastic Agents | Breast, ovarian cancer                    |
| Vincristine (Lyoph. & IP) | 1mg, 2mg                   | Lyophilized Powder for Injection   | IV       | Antineoplastic Agents | Leukemia, lymphoma, pediatric cancers     |
| Bendamustine              | 100mg                      | Solution for Injection             | IV       | Antineoplastic Agents | Leukemia & non-Hodgkin lymphoma           |
| Bleomycin                 | 15 IU/Vial                 | Lyophilized Powder for Injection   | IV, IM   | Antineoplastic Agents | Testicular, head & neck cancer            |
| Bortezomib                | 3.5mg                      | Lyophilized Powder for Injection   | IV, SC   | Antineoplastic Agents | Multiple myeloma                          |
| Carboplatin               | 450mg/45mL                 | Solution for IV Infusion           | IV       | Antineoplastic Agents | Ovarian & lung cancers                    |
| Cyclophosphamide          | 500mg, 1g                  | Lyophilized Powder for Injection   | IV       | Antineoplastic Agents | Breast cancer, leukemia                   |
| Cytarabine                | 1000mg/5mL, 50mL           | Solution for IV Infusion           | IV       | Antineoplastic Agents | AML, ALL                                  |
| Dactinomycin              | 500mcg                     | Lyophilized Powder for Injection   | IV       | Antineoplastic Agents | Wilms' tumor, sarcoma                     |
| Daunorubicin              | 2mg/mL                     | Solution for Liposomal Injection   | IV       | Antineoplastic Agents | Kaposi's sarcoma                          |
| Docetaxel                 | 20mg, 40mg/mL, 80mg        | Solution for IV Infusion           | IV       | Antineoplastic Agents | Breast, lung, prostate cancers            |
| Doxorubicin Pegylated     | 20mg/10mL                  | Solution for Liposomal Injection   | IV       | Antineoplastic Agents | Breast & ovarian cancer                   |
| Decitabine                | 50mg                       | Lyophilized Powder for Injection   | IV       | Antineoplastic Agents | Myelodysplastic syndromes                 |
| Etoposide                 | 100mg/5mL                  | Solution for Injection             | IV       | Antineoplastic Agents | Lung & testicular cancer                  |
| Fulvestrant               | 250mg/5mL                  | Solution for Injection             | IM       | Endocrine Therapy     | HR+ metastatic breast cancer              |
| Fluorouracil              | 100mg/mL                   | Solution for Injection             | IV       | Antineoplastic Agents | Colorectal, breast cancer                 |
| Gemcitabine               | 200mg                      | Lyophilized Powder for Injection   | IV       | Antineoplastic Agents | Pancreatic & lung cancer                  |
| Irinotecan                | 20mg/mL, 100mg/mL          | Solution for IV Infusion           | IV       | Antineoplastic Agents | Colorectal & metastatic colorectal cancer |
| Temozolomide              | 2.5mg/mL                   | Injection                          | IV       | Antineoplastic Agents | Brain tumors                              |
| Pemetrexed Disodium       | 500mg                      | Lyophilized Powder for IV Infusion | IV       | Antineoplastic Agents | Lung & mesothelioma                       |
| Methotrexate              | 2.5mg/mL, 10mg/mL, 25mg/mL | Solution for Injection             | IV, IM   | Antineoplastic Agents | Cancer, RA, psoriasis                     |
| Pegaspargase              | 750 IU/ml                  | Solution for Injection             | IV, IM   | Antineoplastic Agents | Acute lymphoblastic leukemia              |
| L-Asparaginase            | 10,000 IU                  | Lyophilized Powder for Injection   | IV, IM   | Antineoplastic Agents | Acute lymphoblastic leukemia              |

# Tablets

Oral solid dosage forms for systemic or targeted therapy across various conditions

**Therapeutic Grouping Included:** Antibiotic, Antidiabetic, Lipid-Lowering, Oncology, Respiratory

| Generic Name                | Strength(s) / Description  | Dosage Form                  | Route(s) | Therapeutic Grouping            | Indication(s)                                      |
|-----------------------------|----------------------------|------------------------------|----------|---------------------------------|----------------------------------------------------|
| Azithromycin                | 250mg × 6 tablets          | Film-coated Tablet           | Oral     | Antibacterials for Systemic Use | Respiratory, soft tissue, and pediatric infections |
| Gliclazide Tablet           | 80mg × 60 tablets          | Oral Tablet                  | Oral     | Drugs used in Diabetes          | Type 2 diabetes management                         |
| Rosuvastatin Calcium Tablet | 10mg × 7, 5mg × 14 tablets | Film-coated Tablet           | Oral     | Lipid Modifying Agents          | Hyperlipidemia and cardiovascular risk reduction   |
| Imatinib Mesylate Tablet    | 100mg, 400mg               | Oral Tablet                  | Oral     | Antineoplastic Agents           | CML, GIST                                          |
| Ambroxol Hydrochloride      | 30mg × 24 tablets          | Orally Disintegrating Tablet | Oral     | Cough and Cold Preparations     | Respiratory mucus clearance                        |

# GLOBAL REACH, LOCAL PRECISION

Enola's subsidiaries are more than regional offices - they are strategic hubs tailored to local regulatory and distribution needs.

**UAE**

Centralized management of all Enola entities; regulatory coordination and logistics

**India**

Strategic manufacturing and development hub, API sourcing, formulation development, Manufacturing, analytical & stability testing, dossier preparation, GMP production

**China**

Strategic manufacturing and development hub, API sourcing, formulation development, Manufacturing, analytical & stability testing, dossier preparation, GMP production

**Philippines**

Enola Pharmaceutical Inc. is the designated Manufacturer, Importer, and Distributor of all parenteral products in the Philippines. The local subsidiary manages regulatory submissions, pharmacovigilance, and hospital engagement across Metro Manila and key regions.

**Brazil**

Enola Pharma Ltda. serves as the official Manufacturer, Importer, and Distributor of pharmaceutical products entering the Brazilian market. It acts as a gateway for Latin American market access, supporting regulatory alignment and distribution.

**Ethiopia**

Enola Pharmaceutical is the originating Manufacturer, Importer, and Distributor of all products supplied to Ethiopia via Polly Pharma. The partnership ensures regional access aligned with local regulatory frameworks and distribution networks.

**DR Congo**

Enola Pharmaceutical serves as the Manufacturer, Importer, and Distributor through Katopharma SARLU. This structure supports Francophone Africa market entry with tailored product registration and logistics coordination.

**Iraq**

Enola Pharmaceutical is the authorized Manufacturer, Importer, and Distributor of controlled substances and parenteral products supplied through Samma Al Mousel Scientific Bureau and Hexagon Company. These partners oversee regional compliance and logistics.

# INVESTING IN QUALITY, POWERED BY TECHNOLOGY

Enola's commitment to innovation goes beyond molecules - it's embedded in our systems, partnerships, and processes.

## Independent Lab Validation

- ◆ All batches verified by USFDA or EU-approved laboratories
- ◆ Protocols include sterility, potency, and impurity profiling
- ◆ Results integrated into regulatory submissions

## Digital Infrastructure

### ZOH0 Systems for Inventory and Order Tracking Enterprise Resource Planning (ERP)

- Centralized digital platform
- Manages stock levels and order fulfillment
- Enhances operational efficiency and traceability

### Global Product Identification & Traceability Data Standardization & Compliance Tech

- GTIN enabled barcoding
- Supports regulatory alignment and product authentication
- Enables global supply chain transparency

### Real-Time Compliance Dashboards Regulatory Tech & Data Visualization

- Live updates on batch status and duplication

## Logistics & Supply Chain

- ◆ Cold chain capabilities for temperature-sensitive products
- ◆ 50+ wholesaler delivery sites across licensed territories
- ◆ Monthly shipment volume: 300,000+ units
