

# EV Charging in Norway

Enjoy the freedom of the world's best charging network. Bergen Bilutleie makes your EV holiday in Norway simple, safe, and worry-free.

## Over 30,000 Charging Points

Norway has one of the world's densest charging networks, ensuring you are never far from your next stop.

Our electric vehicles are ideal for long trips. With a 400–650 km range and a vast charging network, long-distance driving in Norway is easy and worry-free.

Fast chargers are strategically located along main roads, in rural areas, and at popular tourist destinations, allowing you to travel safely outside the cities.

Paying for charging is simple. Most stations now accept standard bank cards, and by June 2026, this will apply to almost all fast chargers. No subscriptions are needed.

**BERGEN BILUTLEIE AS**

No need to recharge before returning the car

## Solid range

Our rental cars have a range of **400–650** km per charge – perfect for long-distance driving.
