

PRESS RELEASE

Sentra.io and xLM partner to deliver Embedded Data Integrity at Scale bringing continuously validated DSPM (Data Security Posture Management) into xLM's product ecosystem. By integrating Sentra.io's DSPM, xLM will deliver next-generation Data Integrity assurance with continuous validation across all applications.

All Continuous Intelligence apps will now be equipped with Sentra.io's DSPM capabilities, embedding data trust, resilience, and integrity as a core foundation rather than an add-on. This marks the beginning of a journey where xLM delivers embedded Data Integrity at scale—with no competition.

Sentra.io + xLM = cDI (Continuous Data Integrity at Scale)
