

COMMITMENT TO NET ZERO

Carbon Reduction Plan

Supplier: Elysium Imaging

Date: 26 August 2025

Elysium Imaging is committed to supporting the NHS ambition to achieve Net Zero by 2040 for direct emissions and by 2045 for indirect emissions.

As a healthcare technology start-up providing teleradiology services, we recognise our responsibility to minimise environmental impact while building solutions for a more sustainable future in healthcare delivery.

Baseline Year: 2025

As Elysium Imaging has launched in 2025, our baseline year for emissions is set as 2025. Emission reporting will be built progressively as our operations expand.

Baseline Year Emissions

Scope 1 (Direct emissions)	Not yet applicable (no fuel combustion, fleet, or site ownership).
Scope 2 (Energy Indirect)	Minimal grid electricity usage from small office operations
Scope 3 (Other indirect)	Minimal grid electricity usage from small office operations
Category 5	Waste generated in operations
Category 6	Business travel
Category 7	Employee commuting

Current Emissions Reporting (2025)

Data collection is in progress; quantified emissions will be published in subsequent annual reports in line with SECR (Streamlined Energy and Carbon Reporting) requirements.

Carbon Reduction Target

Short-term (2025–2027)

Establish full baseline measurement across Scope 1, 2, and 3

Minimise emissions from business travel through virtual-first collaboration

Implement sustainable IT procurement standards (eco-certified suppliers)

Introduce recycling and waste reduction policies.

Medium-Term (2027–2030)

Transition to 100% renewable energy suppliers for office spaces

Expand sustainable procurement across all supplier agreements

Strengthen reporting transparency in line with NHS and EU Green Deal requirements

Long-Term (2030–2040)

Achieve Significant reductions in carbon intensity per scan delivered

Align with NHS frameworks on low carbon digital health solutions

Prepare to scales to end-to-end radiology workflow solutions designed to minimise environmental impact

Key Measures in Place

Transport

Reducing carbon emissions through remote service delivery and limited essential travel

Facilities

Commitment to low-energy office operations and shared workspaces

Hardware Standardisation

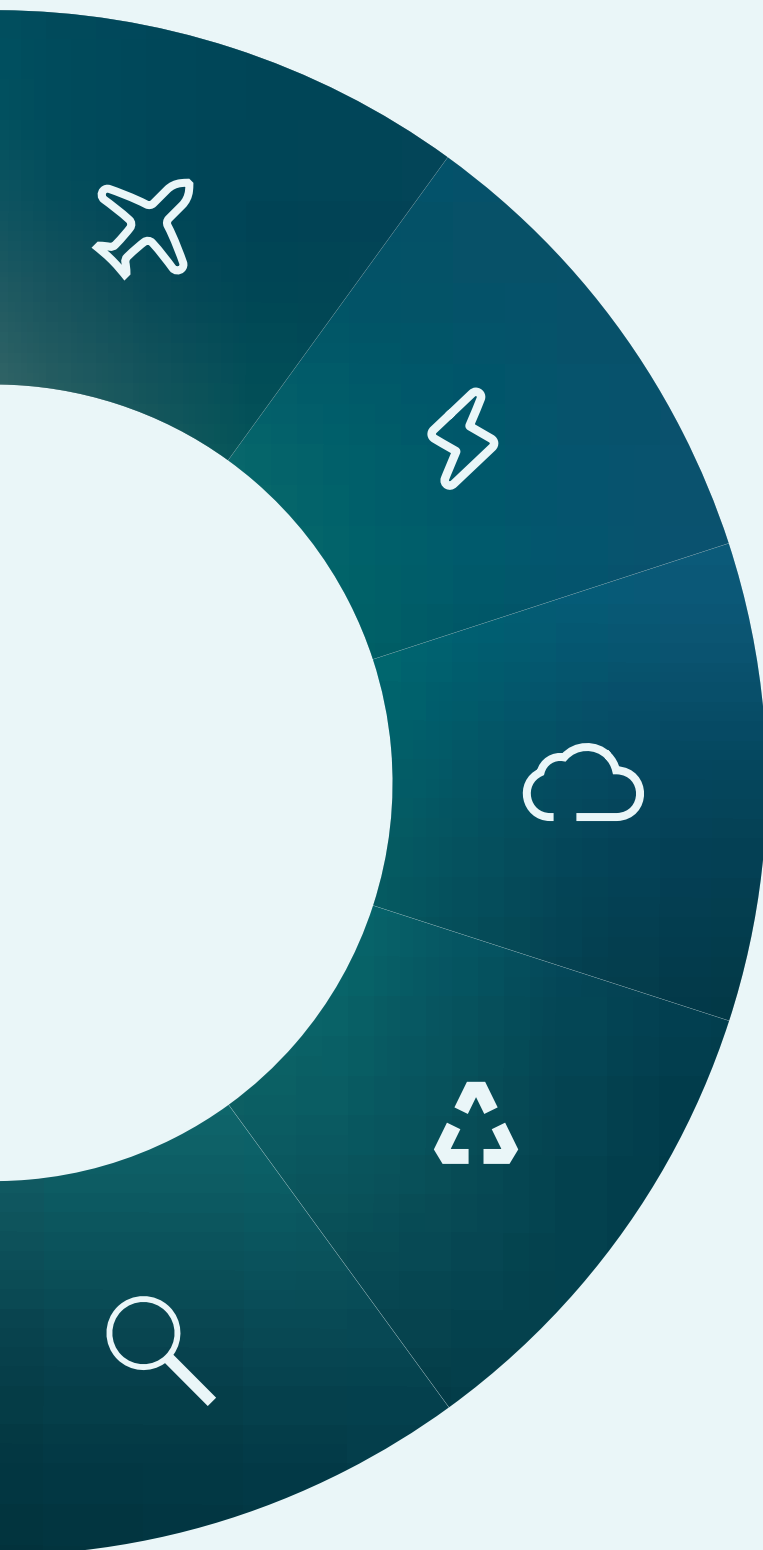

Procurement of sustainable IT hardware and cloud solutions

Waste & Recycling

Policy to maximise recycling, especially IT equipment

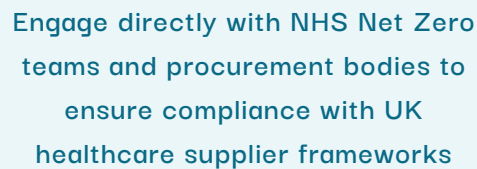

Sustainable Procurement

Prioritising environmentally friendly suppliers and service providers

Engagement & Accountability

Elysium Imaging is committed to transparency and accountability in delivering on its sustainability goals. As part of this commitment, we will:

A circular flow diagram with five light blue rounded rectangular boxes connected by curved arrows in a clockwise direction. The boxes contain the following text: 1. Engage directly with NHS Net Zero teams and procurement bodies to ensure compliance with UK healthcare supplier frameworks. 2. Report progress annually in alignment with SECR and PPN 06/21 requirements. 3. Align reporting with EU sustainability standards, including the Green Deal and CSRD frameworks. 4. Launch the 'Elysium Responsibility Campaign' to publicly communicate progress, initiatives, and staff engagement activities. 5. Encourage staff participation through awareness campaigns, low-carbon travel policies, and workplace sustainability programmes.

Engage directly with NHS Net Zero teams and procurement bodies to ensure compliance with UK healthcare supplier frameworks

Report progress annually in alignment with SECR and PPN 06/21 requirements

Align reporting with EU sustainability standards, including the Green Deal and CSRD frameworks

Launch the 'Elysium Responsibility Campaign' to publicly communicate progress, initiatives, and staff engagement activities.

Encourage staff participation through awareness campaigns, low-carbon travel policies, and workplace sustainability programmes

COMMITMENT TO NET ZERO

Declaration

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance. Emissions will be reported and recorded in line with the GHG Reporting Protocol Corporate Standard and using the UK Government's published emission conversion factors. Scope 1 and Scope 2 emissions will be reported in line with SECR requirements, and relevant Scope 3 emissions will be included in line with the Corporate Value Chain (Scope 3) Standard.
