

L-Bioseal I

Drug Usage

L-Bioseal I is a sterile topical tissue adhesive indicated for the closure of skin cuts, wounds, and surgical incisions, including those from laparoscopic procedures. It is ideal for use on incisions with clean, easily approximated edges under minimal tension, providing a fast, effective, and reliable alternative to sutures or staples.

Drug Composition

- N-Butyl Cyanoacrylate 1.0gm
- (Contents are Sterile till the Ampoule is Unopened)
