

Nebraska at a glance

THE STATE OPPORTUNITY INDEX combines research-backed strategies for improving education-to-career outcomes with benchmarking measures to track progress for all 50 states, giving policymakers and institutions a framework for strengthening the link between education and opportunity.

For each state, the Index reports the percentage of students who experience a positive return on investment and summarizes progress in five key areas for improving success beyond completion: Clear Outcomes, Quality Coaching, Affordability, Work-Based Learning, and Employer Alignment. States are grouped into four categories: Leading (at the forefront, demonstrating strong progress); Advanced (substantial progress); Developing (early stages of improvement); and Foundational (just beginning their journey).

Positive ROI

66%

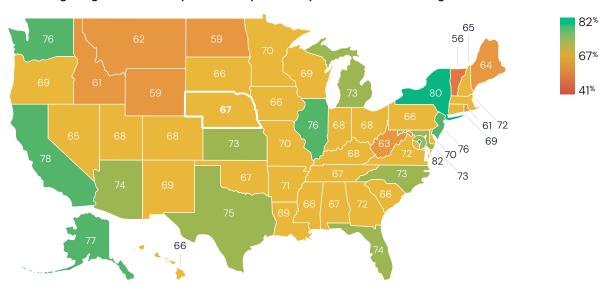

State Opportunity Index

strada

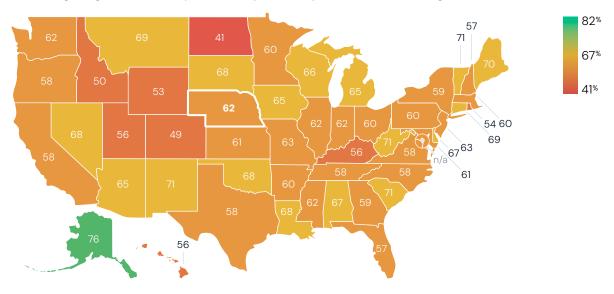

The positive ROI value for each state represents the estimated percentage of public college graduates whose earnings premium over high school graduates is enough to repay their total cost of a degree within 10 years.

	Nebraska	U.S.	
Overall	66%	70%	
Bachelor's	67%	73%	
Associate	62%	60%	

Percentage of graduates with positive 10-year ROI by state - bachelor's degrees

Percentage of graduates with positive 10-year ROI by state - associate degrees

Everyone should have access to accurate information on employment outcomes that can help them make informed decisions about education after high school. The Clear Outcomes measure is based on 10 critical elements that contribute to the capacity of state education-to-employment data systems to strengthen the connection between education and opportunity.

State data system elements	State description	Rating
ncludes learner-level and program characteristic data for nondegree and noncredit postsecondary education and training programs	Nebraska collects enrollment and credential outcome data for (i) college-issued, for-credit nondegree credentials; (ii) college-issued, noncredit nondegree credentials; and (iii) other third-party certifications, including industry certifications. The state, through the Nebraska Statewide Workforce & Educational Reporting System, links college-issued, for-credit nondegree credentials to employment outcomes.	ADVANCED
Examines earnings by occupation, pay rate, and work location	Nebraska collects occupation (job title) and pay rate (hours worked) on a voluntary basis but does not collect work location.	LEADING
X INTEGRATE		
State data system elements	State description	Rating
ntegrates and delivers information on learner's earnings and employment after postsecondary	Nebraska has integrated and published data for (i) public four-year institutions to employment; and (ii) community colleges to employment. Integrated data for public four-year institutions, community colleges, and college-issued,	ADVANCED
education and training completion, and over time	for-credit nondegree credentials are available as a <u>public interactive reporting tool</u> through the Nebraska Statewide Workforce & Educational Reporting System. These employment outcomes are disaggregated by race/ethnicity and gender. WIOA-eligible training providers-to-employment data are not publicly available, and Nebraska does not integrate and publish data on private four-year institutions to employment.	
ntegrates and delivers information on learner's earnings and employment after high school completion and over time	Nebraska, through the Nebraska Statewide Workforce & Educational Reporting System, integrates information on learners' earnings and employment after high school for all high school completers, including those who do not immediately enter postsecondary education and training, but has not yet published this information.	ADVANCED
Partners with national and multi- state initiatives to assess education- co-opportunity outcomes for graduates and non-graduates of costsecondary education and craining programs who relocate or work outside the state	Nebraska partners with State Wage Interchange System and is in the process of partnering with PSEO. Everyone should have access to coaching that helps them reflect on their talents and interests, choose a career goal, chart a path, and navigate challenges. Graduates who receive such guidance are more likely to land a job that requires a degree and feel satisfied with their career trajectory. The Quality Coaching measure is based on the percentage of two-year students and four-year senior students who reported receiving personalized guidance, timely labor market information, and support to create a plan and overcome barriers.

Personalized guidance	Four-year	Two-year
Percentage of students at public institutions who report receiving personalized coaching or guidance to help select the education that will help prepare them for a successful career.	44% DEVELOPING	UNAVAILABLE
Timely labor market information	Four-year	Two-year

Quality post-high school programs should be within everyone's financial reach, allowing for equitable opportunities for success. The Affordability measure is based on how many hours a week the average student would need to work to cover the in-state net price (total cost of attendance minus any grants and scholarships), how many hours a student from a low-income family would need to work to cover their typical in-state net price, and the percentage of students that complete their degree on time – a critical factor in the cost of a degree.

Student hours of work needed	Four-year	Two-year
Average student hours of work needed	FOUNDATIONAL	ADVANCED
	36 hours per week Average annual net price, four-year institutions: \$15,054	12 hours per week Average annual net price, two-year institutions: \$7,773

All students should have access to quality work-based learning experiences, such as paid internships and apprenticeships, that are linked to higher earnings, greater job satisfaction, and lower underemployment. The Work-Based Learning measure is based on the percentage of two-year students and four-year senior students who reported participating in at least one of the following types of paid experiences: paid internship, paid apprenticeship, paid co-op, paid practicum, or paid undergraduate research experience.

Quality Work-Based	Learning	Four-year	Two-ye	ear
Percentage of students at public institutions who participated in at least one of five types of quality paid work-based learning experiences		48% DEV./AL Paid internship participation: 41%	UNA'	VAILABLE
		Percentage of stude participated in at least the five types of expand or unpaid): 75	east one of operiences	
When the margin of error crosses a category threshold, states are given a combined category.	• Leading ≥75%	• Advanced 50% to <75%	• Developing 25% to <50%	• Foundational <25%

National results	Four-year	Two-year
Any quality paid work-based learning experience	43%	17%
Paid internship	37%	14%
Any work-based learning experience (paid or unpaid)	72%	33%

In addition to student self-reporting of apprenticeship participation, states have other sources of information on participation in registered apprenticeships via the U.S. Department of Labor. In Nebraska, **0.39 percent** of the state labor force is made up of active apprentices, for a total of **4,138 apprentices.** Across the country, this number ranges from 0.9 percent (Hawaii) to 0.12 percent (Oklahoma). In countries with leading apprenticeship systems, such as Germany, Switzerland, Australia, Canada, and England, apprentices constitute about 2.5–3.0 percent of the labor force, so all states in the U.S. have substantial room for improvement.

Students should have access to programs that lead to quality jobs and mobility, and employers should assess and advance individuals based on skills and experiences, not just degrees. The Employer Alignment measure is based on the percentage of terminal bachelor's degree holders aged 25–34 employed in a college-level job as well as the supply/demand ratio for a variety of high-demand, high-wage jobs in each state.
