

NORTH DAKOTA

STATE SUMMARY
2025

North Dakota at a glance

THE STATE OPPORTUNITY INDEX combines research-backed strategies for improving education-to-career outcomes with benchmarking measures to track progress for all 50 states, giving policymakers and institutions a framework for strengthening the link between education and opportunity.

For each state, the Index reports the percentage of students who experience a positive return on investment and summarizes progress in five key areas for improving success beyond completion: Clear Outcomes, Quality Coaching, Affordability, Work-Based Learning, and Employer Alignment. States are grouped into four categories: Leading (at the forefront, demonstrating strong progress); Advanced (substantial progress); Developing (early stages of improvement); and Foundational (just beginning their journey).

Index

strada

Positive ROI

North Dakota

The positive ROI value for each state represents the estimated percentage of public college graduates whose earnings premium over high school graduates is enough to repay their total cost of a degree within 10 years.

	North Dakota	U.S.
Overall	53%	70%
Bachelor's	59%	73%
Associate	41%	60%

Percentage of graduates with positive 10-year ROI by state – bachelor's degrees

Percentage of graduates with positive 10-year ROI by state – associate degrees

Everyone should have access to accurate information on employment outcomes that can help them make informed decisions about education after high school. The Clear Outcomes measure is based on 10 critical elements that contribute to the capacity of state education-to-employment data systems to strengthen the connection between education and opportunity.

COLLECT

State data system elements	State description	Rating
1 Includes learner-level and program characteristic data for nondegree and noncredit postsecondary education and training programs	North Dakota collects enrollment and credential outcome data from some nondegree and noncredit postsecondary education and training programs but does not currently link this information to employment outcomes. North Dakota's nondegree and noncredit data collections include: (i) college-issued, for-credit nondegree certificate data; and (ii) other third-party credentials, namely apprenticeship and industry certification.	DEVELOPING
2 Examines earnings by occupation, pay rate, and work location	North Dakota does not collect any of the three enhanced elements, and Strada's research did not demonstrate any emerging collection policy.	FOUNDATIONAL

INTEGRATE

State data system elements	State description	Rating
3 Integrates and delivers information on learner's earnings and employment after postsecondary education and training completion, and over time	North Dakota has integrated and published some key types of postsecondary education and employment data, namely: (i) public four-year institutions to employment; and (ii) community colleges to employment. Employment outcomes for public four-year institutions and community colleges to employment are available as open data files and a public interactive reporting tool through Insights of North Dakota . These postsecondary education-to-employment data are disaggregated by gender. WIOA-eligible training providers-to-employment data are not publicly available, and North Dakota does not integrate and publish data on private four-year institutions to employment.	ADVANCED
4 Integrates and delivers information on learner's earnings and employment after high school completion and over time	No evidence was identified through the state's response or in Strada's research of the state demonstrating this element.	FOUNDATIONAL
5 Partners with national and multi-state initiatives to assess education-to-opportunity outcomes for graduates and non-graduates of postsecondary education and training programs who relocate or work outside the state	North Dakota partners with Multi-State Data Collaborative and State Wage Interchange System. PROVIDE

State data system elements	State description	Rating
6 Provides comprehensive and timely open data files containing anonymized education-to-opportunity statistics that anyone can access, download, and otherwise use	North Dakota currently only provides open data files containing education outcome statistics such as completion and enrollment available for: (i) public four-year institutions; and (ii) community colleges, but does not have open data files with employment outcomes.	DEVELOPING
7 Publishes robust, timely, and easily understandable interactive resources informing education-to-opportunity decision-making by learners, families, and institutions	North Dakota has a public interactive report containing employment outcomes for: (i) public four-year institutions; and (ii) community colleges. The state also publishes an interactive resource featuring enrollment and completion for: (i) public four-year institutions; (ii) private four-year institutions; and (iii) community colleges.	ADVANCED
8 Gives researchers access to individual-level matched education-to-opportunity datasets	North Dakota's SLDS provides authorized external researchers with postsecondary and workforce data upon request . The state has published its research priorities.	LEADING

(...) IMPACT

State data system elements	State description	Rating
9 Enables learners and earners to access and utilize their own verified data, unlocking opportunities for college and career advancement	North Dakota continues to expand its high school learning and employment record infrastructure. The state's Digital Credential Publishing Application is available to all high school students as an LER, using verified credentials. The Digital Credential "wallet" supports learners and earners to store and publish their transcripts, degrees, and industry-recognized credentials for educational institutions or employers. The wallet is accessible through the PowerSchool login, connected to the North Dakota Education portal. It leverages open-source, interoperable data standards including Open Badges 3.0 and Comprehensive Learner Records 2.0. Additionally, early work with LERs is being piloted in teacher education and digital credentialing.	LEADING
10 Designates a unit with responsibility and dedicated, full-time capacity for generating education-to-employment insights to inform state policymaking and resource allocation decision-making	North Dakota's SLDS is a collaborative effort involving the Department of Career and Technical Education, Department of Commerce, Department of Public Instruction, Job Service North Dakota, Workforce Development Council, North Dakota University System, and other stakeholders. The Department of Information Technology operates the SLDS, and a cross-agency committee governs the system. The SLDS maintains ready access to integrated education-to-employment data for analysis and publishes resources for E2E stakeholders on insights.nd.gov .	ADVANCED

Quality Coaching

North Dakota

FOUR-YEAR

UNAVAILABLE

TWO-YEAR

UNAVAILABLE

Everyone should have access to coaching that helps them reflect on their talents and interests, choose a career goal, chart a path, and navigate challenges. Graduates who receive such guidance are more likely to land a job that requires a degree and feel satisfied with their career trajectory. The Quality Coaching measure is based on the percentage of two-year students and four-year senior students who reported receiving personalized guidance, timely labor market information, and support to create a plan and overcome barriers.

Personalized guidance	Four-year	Two-year
Percentage of students at public institutions who report receiving personalized coaching or guidance to help select the education that will help prepare them for a successful career.	UNAVAILABLE	UNAVAILABLE
Timely labor market information	Four-year	Two-year
The average share of students at public institutions who receive timely labor market information, across the various types below, before enrolling or during their first year.	UNAVAILABLE	UNAVAILABLE
Education-to-career paths that might be a good fit for student's strengths and interests		
Job opportunities that a particular education program could lead to		
Potential earnings in different careers related to student's education program		
Career outcomes of students from their own institution		
Support	Four-year	Two-year
The average share of students at public institutions who receive at least some support in setting goals and in overcoming obstacles.	UNAVAILABLE	UNAVAILABLE
Setting education and career goals and developing a plan to achieve these goals		
Identifying and overcoming barriers		
CATEGORY KEY		
When the margin of error crosses a category threshold, states are given a combined category.	● Leading ≥75%	● Advanced 50% to <75%
		● Developing 25% to <50%
		● Foundational <25%
National results	Four-year	Two-year
Personalized guidance	34%	45%
Timely labor market information	21%	33%
Support	71%	74%

Affordability

North Dakota

FOUR-YEAR

FOUNDATIONAL

TWO-YEAR

DEVELOPING

Quality post-high school programs should be within everyone's financial reach, allowing for equitable opportunities for success. The Affordability measure is based on how many hours a week the average student would need to work to cover the in-state net price (total cost of attendance minus any grants and scholarships), how many hours a student from a low-income family would need to work to cover their typical in-state net price, and the percentage of students that complete their degree on time – a critical factor in the cost of a degree.

Student hours of work needed	Four-year	Two-year
Average student hours of work needed	FOUNDATIONAL 40 hours per week Average annual net price, four-year institutions: \$16,023	DEVELOPING 23 hours per week Average annual net price, two-year institutions: \$10,757
Low-income student hours of work needed	DEVELOPING 24 hours per week Average annual net price for low-income students, four-year institutions: \$10,995	ADVANCED 11 hours per week Average annual net price for low-income students, two-year institutions: \$7,282

Work-Based Learning

North Dakota

FOUR-YEAR

UNAVAILABLE

TWO-YEAR

UNAVAILABLE

All students should have access to quality work-based learning experiences, such as paid internships and apprenticeships, that are linked to higher earnings, greater job satisfaction, and lower underemployment. The Work-Based Learning measure is based on the percentage of two-year students and four-year senior students who reported participating in at least one of the following types of paid experiences: paid internship, paid apprenticeship, paid co-op, paid practicum, or paid undergraduate research experience.

Quality Work-Based Learning	Four-year	Two-year
Percentage of students at public institutions who participated in at least one of five types of quality paid work-based learning experiences	UNAVAILABLE	UNAVAILABLE

CATEGORY KEY

When the margin of error crosses a category threshold, states are given a combined category.

● **Leading**
≥75%

● **Advanced**
50% to <75%

● **Developing**
25% to <50%

● **Foundational**
<25%

National results	Four-year	Two-year
Any quality paid work-based learning experience	43%	17%
Paid internship	37%	14%
Any work-based learning experience (paid or unpaid)	72%	33%

In addition to student self-reporting of apprenticeship participation, states have other sources of information on participation in registered apprenticeships via the U.S. Department of Labor. In North Dakota, **0.40 percent** of the state labor force is made up of active apprentices, for a total of **1,675 apprentices**. Across the country, this number ranges from 0.9 percent (Hawaii) to 0.12 percent (Oklahoma). In countries with leading apprenticeship systems, such as Germany, Switzerland, Australia, Canada, and England, apprentices constitute about 2.5–3.0 percent of the labor force, so all states in the U.S. have substantial room for improvement.

Employer Alignment

DEVELOPING

North Dakota

Students should have access to programs that lead to quality jobs and mobility, and employers should assess and advance individuals based on skills and experiences, not just degrees. The Employer Alignment measure is based on the percentage of terminal bachelor's degree holders aged 25–34 employed in a college-level job as well as the supply/demand ratio for a variety of high-demand, high-wage jobs in each state.

College-level employment

The percentage of bachelor's degree graduates who are employed in college-level positions

DEVELOPING

Supply/demand ratio

The overall ratio: the average of the entry-level supply/demand ratios for these nine opportunity occupational groups
