State Opportunity Index

New York

State Summary 2026

New York at a glance

THE STATE OPPORTUNITY INDEX is a framework for measuring and improving education-to-career outcomes. For each state, the Index reports the percentage of graduates who experience a positive return on investment and summarizes progress in five key areas for improving success beyond completion: Clear Outcomes, Quality Coaching, Affordability, Work-Based Learning, and Employer Alignment. States are grouped into four categories: Leading (at the forefront, demonstrating strong progress); Advanced (substantial progress); Developing (early stages of improvement); and Foundational (just beginning their journey).

New York is among 35 states and jurisdictions Leading in Affordability at associate degree institutions. To learn more about progress in other states, visit strada.org/state-opportunity-index.

State Opportunity Index

strada

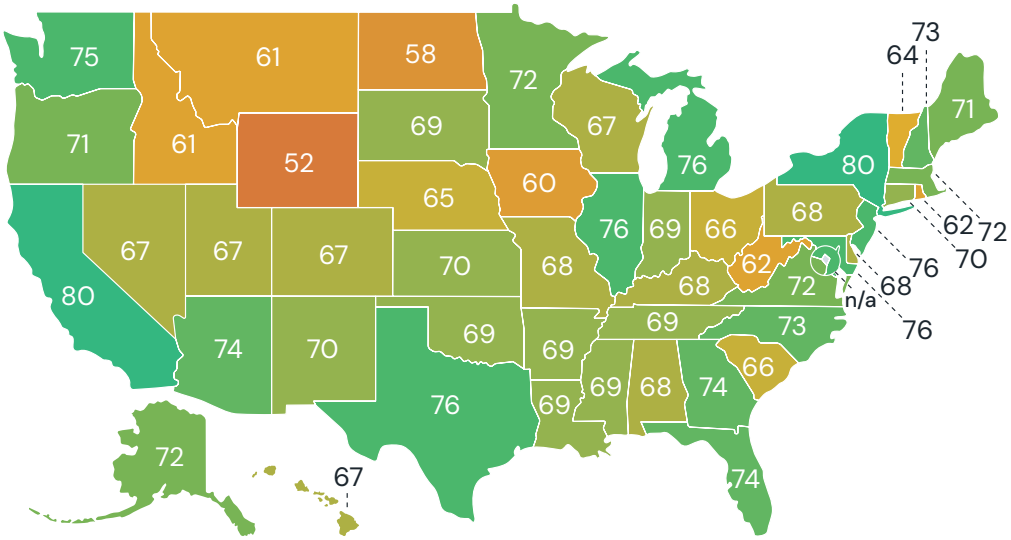

In cases in which the margin of error crosses a category threshold, states are given a combined category.
References for "unavailable" refer to states in which there was insufficient data to assign a rating at this time.

Positive ROI

	New York	National
Overall	77%	70%
Bachelor's	80%	73%
Associate	59%	60%

All students who invest their time and money in earning a degree should be financially better off because of it. The Positive ROI value for each state represents the estimated percentage of public college graduates whose earnings premium over high school graduates is enough to repay their total cost of a degree within 10 years.

Percentage of graduates with Positive 10-year ROI by state - bachelor's degrees

Percentage of graduates with Positive 10-year ROI by state - associate degrees

Clear Outcomes

DEVELOPING

Everyone should have access to accurate information on employment outcomes that can help them make informed decisions about education after high school. The Clear Outcomes measure is based on 10 critical elements that contribute to the capacity of state education-to-employment data systems to clarify education pathway outcomes in order to inform personal, public, and private sector investments.

New York improved from Developing to Advanced in integrating high school completion and employment data (element 4) and researcher access (element 8), and from Foundational to Developing in verified data for learning mobility (element 9) and having a designated unit for generating education-to-employment insights (element 10). Enhanced wage records (element 2) and open aggregate data (element 6) remain areas with room for growth.

COLLECT

State data system elements	State description	Category
1. Includes learner-level and program characteristic data for nondegree and noncredit postsecondary education and training programs	New York is implementing data collections from college-issued, noncredit postsecondary education and training programs at the State University of New York system and City University of New York system. The state collects enrollment and credential outcomes from WIOA-eligible training providers, integrates these nondegree credentials with administrative records on employment and earnings, and publishes these employment outcomes.	DEVELOPING
2. Examines earnings by occupation, pay rate, and work location	New York does not collect any of the three enhanced elements, and Strada's research did not demonstrate an emerging collection policy.	FOUNDATIONAL

INTEGRATE

State data system elements	State description	Category
3. Integrates and delivers information on learners' earnings and employment after postsecondary education and training completion, and over time	New York integrates administrative records on employment and earnings with its (i) public four-year institutions and (ii) community colleges. The state publishes these employment outcomes as interactive resources available through the State University of New York and the City University of New York. Both dashboards feature disaggregation by race/ethnicity, gender, and family income/economic status.	ADVANCED
4. Integrates and delivers information on learners' earnings and employment after high school completion and over time	New York integrates information on employment and earnings with records of New York City Public Schools (NYCPS) graduates who attend postsecondary education through the City University of New York (CUNY) system. The state does not publish integrated high school-to-employment data. Additionally, CUNY, NYCPS, and the New York State Department of Labor have executed an agreement permitting CUNY to redisclose wage records to NYCPS for graduates who apply or enroll in the city universities.	ADVANCED
5. Partners with national and multi-state initiatives to assess education-to-opportunity outcomes for graduates and non-graduates of postsecondary education and training programs who relocate or work outside the state	New York partners with PSEO (25-49% graduate coverage), the Multi-State Data Collaborative, and the State Wage Interchange System.	LEADING

Clear Outcomes

DEVELOPING

PROVIDE

State data system elements	State description	Category
6. Provides comprehensive and timely open data files containing anonymized education-to-opportunity statistics that anyone can access, download, and otherwise use	No evidence was identified through the state's response or in Strada's research of the state demonstrating this element.	FOUNDATIONAL
7. Publishes robust, timely, and easily understandable interactive resources informing education-to-opportunity decision-making by learners, families, and institutions	New York publishes interactive resources containing education-to-employment outcomes for public four-year institutions and community colleges. These dashboards are available through the State University of New York and the City University of New York with disaggregation by race/ethnicity, gender, and family income/economic status.	ADVANCED
8. Gives researchers access to individual-level matched education-to-opportunity datasets	New York provides researchers at the Community College Research Center and New York City Public Schools access to integrated education-to-employment data, but there is not a clearly documented process for other external researchers to request access to individual-level matched education-to-employment datasets.	ADVANCED

IMPACT

State data system elements	State description	Category
9. Enables learners and earners to access and utilize their own verified data, unlocking opportunities for college and career advancement	The State University of New York (SUNY) has built a comprehensive, systemwide microcredentialling program. SUNY offers 500 microcredentials across 44 of its 64 campuses with each microcredential resulting in transcript notation and digital badge.	DEVELOPING
10. Designates a unit with responsibility and dedicated, full-time capacity for generating education-to-employment insights to inform state policymaking and resource allocation decision-making	New York does not have a centralized, authoritative source designated by the state for generating E2E insights, but the state is developing a SLDS. The SLDS will have ready access to integrated E2E data for analysis and publish reports on postsecondary employment outcomes.	DEVELOPING

Quality Coaching

BACHELOR'S DEVELOPING **ASSOCIATE** DEVELOPING

Everyone should have access to coaching that helps them reflect on their talents and interests, choose a career goal, chart a path, and navigate challenges. The Quality Coaching measure is based on the percentage of associate students and bachelor's senior students who reported receiving personalized guidance, timely labor market information, and support to create a plan and overcome barriers.

New York remains Developing in overall Quality Coaching for students at bachelor's degree institutions, while it declined from Advanced to Developing at associate degree institutions. At both levels, it is on par with most other states. Though the rate of bachelor's students receiving labor market information by the end of their first year of college increased, it trails the national average and is categorized as Foundational in this element.

	Bachelor's		Associate

Affordability

BACHELOR'S ADVANCED ASSOCIATE LEADING

A quality postsecondary education should be within everyone's reach, with clear, predictable, and manageable costs. The Affordability measure is based on how many hours a week the average student would need to work to cover the in-state net price (total cost of attendance minus any grants and scholarships), how many hours a student from a low-income family would need to work to cover their typical in-state net price, and the percentage of students that complete their degree on time – a critical factor in the cost of a degree.

New York is one of 15 states categorized as Advanced or Leading in overall affordability for bachelor's degree institutions, with net prices among the lowest in the country. It also performs particularly strongly in affordability for low-income students at associate degree institutions.

	Bachelor's		Associate	
	State	National	State	National
STUDENT HOURS OF WORK NEEDED				
Average student hours of work needed	ADVANCED **14 hours per week** Average annual net price: $11,628	**26 hours per week** Average annual net price: $15,270	LEADING **6 hours per week** Average annual net price: $8,228	**8 hours per week** Average annual net price: $8,089
Low-income student hours of work needed	LEADING **0 hours per week** Average annual net price for low-income students: $5,678	**12 hours per week** Average annual net price for low-income students: $9,813	LEADING **0 hours per week** Average annual net price for low-income students: $5,751	**4 hours per week** Average annual net price for low-income students: $6,678

Work-Based Learning

BACHELOR'S **DEVELOPING**

All students should have access to paid, immersive work-based learning experiences that connect education to career. The Work-Based Learning measure is based on the percentage of bachelor's senior students who reported participating in at least one of the following types of paid experiences: paid internship, paid apprenticeship, paid co-op, paid practicum, or paid undergraduate research experience. For students at associate degree institutions, participation is reported when data are available, but states are not categorized.

New York is on par with most other states in paid work-based learning participation. Participation is categorized as Developing for students at bachelor's degree institutions, along with 32 other states.

	Bachelor's		Associate	
	State	National	State	National
QUALITY WORK-BASED LEARNING				
Percentage of students at public institutions who participated in at least one of the five types of quality paid work-based learning experiences	DEVELOPING **38%**	**43%**	**18%**	**14%**
Paid internship participation	32%	35%	13%	10%
Percentage of students who participated in at least one of the five types of experiences (paid or unpaid)	66%	71%	37%	30%

Category Key

- **Foundational** <25%
- **Developing** 25% to <50%
- **Advanced** 50% to <75%
- **Leading** ≥75%

When the margin of error crosses a category threshold, states are given a combined category.

In addition to student self-reporting of apprenticeship participation, states have other sources of information on participation in registered apprenticeships via the U.S. Department of Labor. In New York, 0.19 percent of the state labor force is made up of active apprentices, for a total of 18,832 apprentices. Across the country, this number ranges from 0.86 percent (Hawaii) to 0.12 percent (Oklahoma). In countries with leading apprenticeship systems, such as Germany, Switzerland, Australia, Canada, and England, apprentices constitute about 2.5–3.0 percent of the labor force, so all states in the U.S. have substantial room for improvement.

Employer Alignment

DEVELOPING

Students should have access to programs that lead to quality jobs and employers should be able to find the talent they need to fill high-wage roles. The Employer Alignment measure is based on the percentage of terminal bachelor's degree holders aged 25-34 employed in a college-level job as well as the supply/demand ratio for a set of high-demand, high-wage jobs in each state.

College-level employment in **New York** is 59 percent, compared to 60 percent nationally. New York improved from Foundational to Developing in its overall supply/demand ratio and in its nursing ratio, and from Advanced to Leading in its ratio for manufacturing/trades technicians and technologists.

COLLEGE-LEVEL EMPLOYMENT			
The percentage of bachelor's degree graduates who are employed in college-level jobs		59%	DEVELOPING

EXTERNAL AFFORDABILITY METRICS		
State appropriations per student FTE, public four-year institutions, FY2025 *(Source: SHEEO SHEF Annual Report)*	$16,123	$11,166
State appropriations per student FTE, public two-year institutions, FY2025 *(Source: SHEEO SHEF Annual Report)*	$11,747	$11,096
FAFSA completion rate, high school class of 2026 (through July 1, 2026) *(Source: NCAN)*	69%	59%
150% completion rate, first-time full-time students, bachelor's degree institutions, 2023-24 *(Source: College Scorecard)*	57%	64%
150% completion rate, first-time full-time Pell recipients, bachelor's degree institutions, 2023-24 *(Source: College Scorecard)*	50%	53%

If we get this right, here's what the future could look like: A young person or adult explores options with a career coach. They have data on jobs and earnings by program. They know costs up front, and public options are affordable and accessible. They engage in paid work-based learning, building skills and clarifying goals. By completion, they don't just hold a credential (or a few).
They have a good job, experience, and momentum toward a better future.
