State Opportunity Index

Ohio

State Summary 2026

Ohio at a glance

THE STATE OPPORTUNITY INDEX is a framework for measuring and improving education-to-career outcomes. For each state, the Index reports the percentage of graduates who experience a positive return on investment and summarizes progress in five key areas for improving success beyond completion: Clear Outcomes, Quality Coaching, Affordability, Work-Based Learning, and Employer Alignment. States are grouped into four categories: Leading (at the forefront, demonstrating strong progress); Advanced (substantial progress); Developing (early stages of improvement); and Foundational (just beginning their journey).

Ohio is among 17 states Leading in Clear Outcomes. The state also is among 13 states Advanced in Affordability at associate degree institutions, while 35 states and jurisdictions are Leading. Work-Based Learning for bachelor's students is Advanced, placing the state among four in this category (no states are Leading). To learn more about progress in other states, visit strada.org/state-opportunity-index.

Clear Outcomes		LEADING
Quality Coaching	BACHELOR'S	DEVELOPING
	ASSOCIATE	DEVELOPING
Affordability	BACHELOR'S	FOUNDATIONAL
	ASSOCIATE	ADVANCED
Work-Based Learning	BACHELOR'S	ADVANCED
Employer Alignment		DEVELOPING

State Opportunity Index

strada

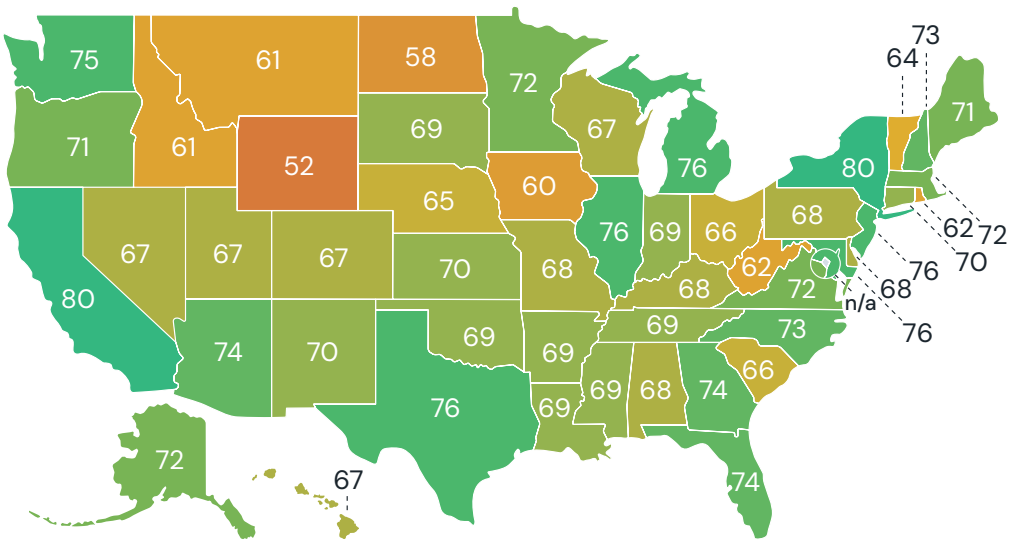

In cases in which the margin of error crosses a category threshold, states are given a combined category.
References for "unavailable" refer to states in which there was insufficient data to assign a rating at this time.

Positive ROI

	Ohio	National
Overall	65%	70%
Bachelor's	66%	73%
Associate	61%	60%

All students who invest their time and money in earning a degree should be financially better off because of it. The Positive ROI value for each state represents the estimated percentage of public college graduates whose earnings premium over high school graduates is enough to repay their total cost of a degree within 10 years.

Percentage of graduates with Positive 10-year ROI by state - bachelor's degrees

Percentage of graduates with Positive 10-year ROI by state - associate degrees

Clear Outcomes

LEADING

Ohio 2026

Everyone should have access to accurate information on employment outcomes that can help them make informed decisions about education after high school. The Clear Outcomes measure is based on 10 critical elements that contribute to the capacity of state education-to-employment data systems to clarify education pathway outcomes in order to inform personal, public, and private sector investments.

Ohio improved from Advanced to Leading in nondegree and noncredit data (element 1) and integrating post-high school education and employment data (element 3). Open aggregate data (element 6) also is a strength, and it is one of 17 states that are Leading in this element.

COLLECT

State data system elements	State description	Category
1. Includes learner-level and program characteristic data for nondegree and noncredit postsecondary education and training programs	Ohio collects enrollment and credential outcome data from: (i) college-issued, noncredit credentials; (ii) occupational licensure; and (iii) other third-party credentials, namely industry certification and apprenticeship programs. Ohio integrates administrative records on employment and earnings with college-issued, noncredit credentials and publishes these employment outcomes through the Workforce Success Measures' Ohio Technical Centers dashboard. The state also links occupational licensure and industry certification to employment outcomes, and publishes these integrated nondegree credential-to-employment data through the Ohio Education Research Center's Employment by Program dashboard.	LEADING
2. Examines earnings by occupation, pay rate, and work location	Ohio collects work location. The state is implementing collections of occupation (job title) and pay rate (hours worked).	ADVANCED

INTEGRATE

State data system elements	State description	Category
3. Integrates and delivers information on learners' earnings and employment after postsecondary education and training completion, and over time	Ohio integrates administrative records on employment and earnings with its (i) public four-year institutions and (ii) community colleges. The state publishes these employment outcomes as open datasets and interactive resources through the Ohio Education Research Center's Employment by Program dashboard and the Earnings over Time dashboard as well as the Workforce Success Measures dashboards. The Workforce Success Measures dashboards feature disaggregation by race/ethnicity, sex, and other learner characteristics.	LEADING
4. Integrates and delivers information on learners' earnings and employment after high school completion and over time	Ohio integrates administrative information on employment and earnings with high school completion records. The Ohio Department of Education and Workforce is leveraging the Ohio Longitudinal Data Archive to publish High School and Career Technical Education Reports. This dashboard will be published soon.	DEVELOPING
5. Partners with national and multi-state initiatives to assess education-to-opportunity outcomes for graduates and non-graduates of postsecondary education and training programs who relocate or work outside the state	Ohio partners with PSEO (50-75% graduate coverage), the Multi-State Data Collaborative, and the State Wage Interchange System.	LEADING

PROVIDE

State data system elements	State description	Category
6. Provides comprehensive and timely open data files containing anonymized education-to-opportunity statistics that anyone can access, download, and otherwise use	Ohio publishes an interactive resource featuring downloadable datasets containing education-to-employment outcomes for public four-year institutions, community colleges, and nondegree credentials, including industry-recognized credentials and occupational licensure. The state is planning to publish another interactive resource featuring downloadable datasets for high school-to-employment outcomes.	LEADING
7. Publishes robust, timely, and easily understandable interactive resources informing education-to-opportunity decision-making by learners, families, and institutions	Ohio publishes an interactive resource containing education-to-employment outcomes for public four-year institutions, community colleges, and nondegree credentials, including industry-recognized credentials and occupational licensure. The state publishes a separate interactive resource containing employment outcomes from college-issued, noncredit credentials and plans to publish another interactive resource containing high school-to-employment outcomes.	LEADING
8. Gives researchers access to individual-level matched education-to-opportunity datasets	The Ohio Longitudinal Data Archive (OLDA) combines data from several state agencies such as the Ohio Department of Higher Education, Ohio Department of Education, and the Ohio Department of Jobs and Family Services. The state provides internal and external researchers with individual-level matched education-to-opportunity datasets through this platform. Ohio publishes a clearly documented request and review process as well as results of studies conducted using OLDA records.	LEADING

IMPACT

State data system elements	State description	Category
9. Enables learners and earners to access and utilize their own verified data, unlocking opportunities for college and career advancement	The Central Ohio Workforce Development Board and Aspyr Workforce Innovation, leveraging SkillsFWD funding, are expanding the Columbus City Schools' partnership with SchoolLinks to include LER functionality. Every Columbus City Schools high school student can access a digital wallet through their SchoolLinks account. Ohio has established a resume and candidate feedback process to help students reflect on their experiences and ensure they enter the job market prepared. They also are engaging local employers to help them understand the value that high school students can bring to their workforces. All functionality developed in the SchooLinks platform for this project will be released nationally to allow other organizations to take advantage of the tools.	DEVELOPING
10. Designates a unit with responsibility and dedicated, full-time capacity for generating education-to-employment insights to inform state policymaking and resource allocation decision-making	The Ohio Education Research Center (OERC) at The Ohio State University maintains ready access to integrated E2E data through the Ohio Longitudinal Data Archive. OERC publishes E2E insights and supports agency partners to do the same. These resources report on postsecondary employment outcomes and labor/market supply demand attributes, including the Workforce Supply and Employment Projections dashboards. There is evidence of sustainable funding, governance, and staffing as well as partnerships with higher education and workforce development agencies.	ADVANCED

Quality Coaching

BACHELOR'S DEVELOPING **ASSOCIATE** DEVELOPING

Everyone should have access to coaching that helps them reflect on their talents and interests, choose a career goal, chart a path, and navigate challenges. The Quality Coaching measure is based on the percentage of associate students and bachelor's senior students who reported receiving personalized guidance, timely labor market information, and support to create a plan and overcome barriers.

Ohio remains Developing in overall Quality Coaching for students at bachelor's degree institutions, consistent with most other states. At associate degree institutions, overall Quality Coaching declined from Advanced to Developing; experiences of personalized guidance, timely labor market information, and support also declined.

	Bachelor's		Associate

- **Advanced** 50% to <75%
- **Leading** ≥75%

Affordability

BACHELOR'S **FOUNDATIONAL** ASSOCIATE **ADVANCED**

A quality postsecondary education should be within everyone's reach, with clear, predictable, and manageable costs. The Affordability measure is based on how many hours a week the average student would need to work to cover the in-state net price (total cost of attendance minus any grants and scholarships), how many hours a student from a low-income family would need to work to cover their typical in-state net price, and the percentage of students that complete their degree on time – a critical factor in the cost of a degree.

Ohio remains categorized as Foundational in overall affordability at bachelor's degree institutions, with net prices higher than most other states. Its on-time completion rate for students at bachelor's degree institutions, however, is close to the national average. Due to higher net prices at the associate degree institutions, it also trails most other states at this level.

	Bachelor's		Associate	
	State	National	State	National
STUDENT HOURS OF WORK NEEDED				
Average student hours of work needed	**FOUNDATIONAL** **43 hours per week** Average annual net price: $20,124	**26 hours per week** Average annual net price: $15,270	**ADVANCED** **17 hours per week** Average annual net price: $10,611	**8 hours per week** Average annual net price: $8,089
Low-income student hours of work needed	**DEVELOPING** **23 hours per week** Average annual net price for low-income students: $12,761	**12 hours per week** Average annual net price for low-income students: $9,813	**ADVANCED** **10 hours per week** Average annual net price for low-income students: $8,405	**4 hours per week** Average annual net price for low-income students: $6,678

- **Leading** ≥65%

Work-Based Learning

BACHELOR'S **ADVANCED**

All students should have access to paid, immersive work-based learning experiences that connect education to career. The Work-Based Learning measure is based on the percentage of bachelor's senior students who reported participating in at least one of the following types of paid experiences: paid internship, paid apprenticeship, paid co-op, paid practicum, or paid undergraduate research experience. For students at associate degree institutions, participation is reported when data are available, but states are not categorized.

Ohio's bachelor's degree students participate in paid work-based learning at higher rates than students nationally, and the state is one of four categorized as Advanced.

	Bachelor's		Associate	
	State	National	State	National
QUALITY WORK-BASED LEARNING				
Percentage of students at public institutions who participated in at least one of the five types of quality paid work-based learning experiences	**ADVANCED** **53%**	**43%**	**10%**	**14%**
Paid internship participation	44%	35%	6%	10%
Percentage of students who participated in at least one of the five types of experiences (paid or unpaid)	80%	71%	29%	30%

Category Key

- **Foundational** <25%
- **Developing** 25% to <50%
- **Advanced** 50% to <75%
- **Leading** ≥75%

When the margin of error crosses a category threshold, states are given a combined category.

In addition to student self-reporting of apprenticeship participation, states have other sources of information on participation in registered apprenticeships via the U.S. Department of Labor. In Ohio, 0.41 percent of the state labor force is made up of active apprentices, for a total of 24,076 apprentices. Across the country, this number ranges from 0.86 percent (Hawaii) to 0.12 percent (Oklahoma). In countries with leading apprenticeship systems, such as Germany, Switzerland, Australia, Canada, and England, apprentices constitute about 2.5–3.0 percent of the labor force, so all states in the U.S. have substantial room for improvement.

Employer Alignment

DEVELOPING

Ohio 2026

Students should have access to programs that lead to quality jobs and employers should be able to find the talent they need to fill high-wage roles. The Employer Alignment measure is based on the percentage of terminal bachelor's degree holders aged 25-34 employed in a college-level job as well as the supply/demand ratio for a set of high-demand, high-wage jobs in each state.

Ohio is one of 21 states and jurisdictions categorized as Advanced in college-level employment among recent bachelor's degree graduates with a rate of 61 percent, compared to the national average of 60 percent. Ohio also improved from Foundational to Developing in its overall supply/demand ratio and its nursing ratio, from Foundational to Advanced for manufacturing/trades technicians and technologists, and from Advanced to Leading for engineers.

EXTERNAL AFFORDABILITY METRICS		
State appropriations per student FTE, public four-year institutions, FY2025 *(Source: SHEEO SHEF Annual Report)*	$8,654	$11,166
State appropriations per student FTE, public two-year institutions, FY2025 *(Source: SHEEO SHEF Annual Report)*	$9,564	$11,096
FAFSA completion rate, high school class of 2026 (through July 1, 2026) *(Source: NCAN)*	55%	59%
150% completion rate, first-time full-time students, bachelor's degree institutions, 2023-24 *(Source: College Scorecard)*	65%	64%
150% completion rate, first-time full-time Pell recipients, bachelor's degree institutions, 2023-24 *(Source: College Scorecard)*	48%	53%

If we get this right, here's what the future could look like: A young person or adult explores options with a career coach. They have data on jobs and earnings by program. They know costs up front, and public options are affordable and accessible. They engage in paid work-based learning, building skills and clarifying goals. By completion, they don't just hold a credential (or a few).
They have a good job, experience, and momentum toward a better future.
