State Opportunity Index

Oregon

State Summary 2026

Oregon at a glance

THE STATE OPPORTUNITY INDEX is a framework for measuring and improving education-to-career outcomes. For each state, the Index reports the percentage of graduates who experience a positive return on investment and summarizes progress in five key areas for improving success beyond completion: Clear Outcomes, Quality Coaching, Affordability, Work-Based Learning, and Employer Alignment. States are grouped into four categories: Leading (at the forefront, demonstrating strong progress); Advanced (substantial progress); Developing (early stages of improvement); and Foundational (just beginning their journey).

Oregon is among 22 states Advanced in Clear Outcomes (17 states are Leading). The state also is among 35 states and jurisdictions Leading in Affordability at associate degree institutions. Employer Alignment improved from Foundational to Developing. To learn more about progress in other states, visit strada.org/state-opportunity-index.

Clear Outcomes		ADVANCED
Quality Coaching	BACHELOR'S	DEVELOPING
	ASSOCIATE	DEVELOPING
Affordability	BACHELOR'S	DEVELOPING
	ASSOCIATE	LEADING
Work-Based Learning	BACHELOR'S	DEVELOPING
Employer Alignment		DEVELOPING

State Opportunity Index

strada

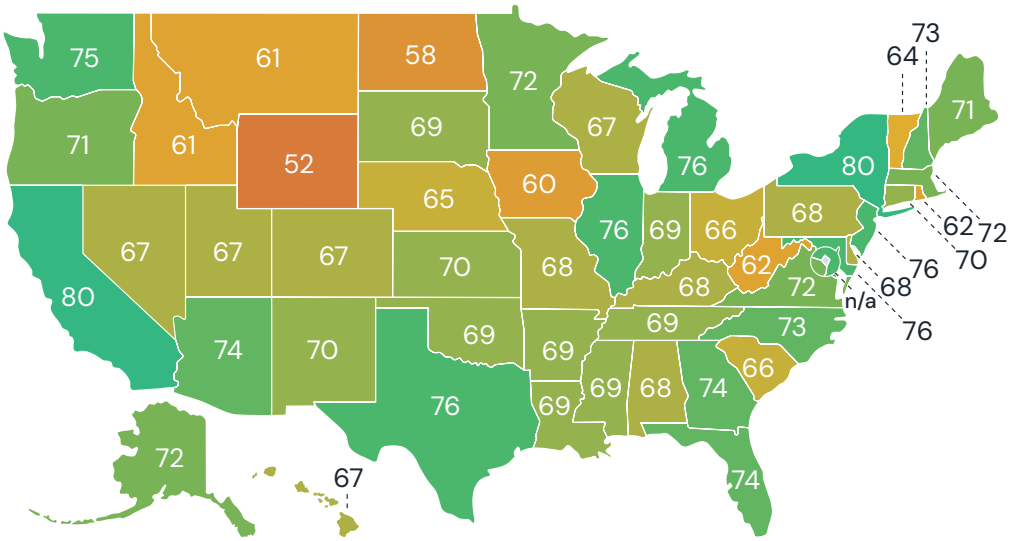

In cases in which the margin of error crosses a category threshold, states are given a combined category.
References for "unavailable" refer to states in which there was insufficient data to assign a rating at this time.

Positive ROI

	Oregon	National
Overall	68%	70%
Bachelor's	71%	73%
Associate	55%	60%

All students who invest their time and money in earning a degree should be financially better off because of it. The Positive ROI value for each state represents the estimated percentage of public college graduates whose earnings premium over high school graduates is enough to repay their total cost of a degree within 10 years.

Percentage of graduates with Positive 10-year ROI by state - bachelor's degrees

Percentage of graduates with Positive 10-year ROI by state - associate degrees

Clear Outcomes

ADVANCED

Oregon 2026

Everyone should have access to accurate information on employment outcomes that can help them make informed decisions about education after high school. The Clear Outcomes measure is based on 10 critical elements that contribute to the capacity of state education-to-employment data systems to clarify education pathway outcomes in order to inform personal, public, and private sector investments.

Nondegree and noncredit data (element 1) are a strength for **Oregon**, and it is one of 16 states Leading in this element.

COLLECT

State data system elements	State description	Category
1. Includes learner-level and program characteristic data for nondegree and noncredit postsecondary education and training programs	Oregon collects enrollment and credential outcome data for: (i) college-issued, noncredit credentials; (ii) WIOA-eligible training providers; (iii) occupational licensure; and (iv) other third-party credentials, including apprenticeships. Oregon links these nondegree and noncredit programs to employment outcomes. The state reports on the employment outcomes of community college-issued, noncredit credentials through Oregon Higher Education Coordinating Commission's Community College Data Dashboard and the Oregon Employment Department's Performance Reporting Information System. The state publishes a separate interactive resource containing enrollment and credential outcome data from nondegree and noncredit education and training programs at private trade and career schools.	LEADING
2. Examines earnings by occupation, pay rate, and work location	Oregon collects pay rate (hours worked) but does not collect occupation or work location.	ADVANCED

INTEGRATE

State data system elements	State description	Category
3. Integrates and delivers information on learners' earnings and employment after postsecondary education and training completion, and over time	Oregon integrates administrative employment and earnings data with its (i) public four-year institutions and (ii) community colleges. The state publishes these employment outcomes as interactive resources through the Higher Education Coordinating Commission's Public University Data Dashboard and Community Colleges Data Dashboard. Employment outcomes are disaggregated by race/ethnicity, gender, family income/economic status, and other student demographics. The state does not integrate information on employment and earnings from administrative sources with private four-year institutions.	ADVANCED
4. Integrates and delivers information on learners' earnings and employment after high school completion and over time	Oregon integrates administrative information on employment and earnings with high school completion records. The state publishes reports on high school-to-employment outcomes and is currently developing an interactive report that will feature disaggregation by student demographics.	ADVANCED
5. Partners with national and multi-state initiatives to assess education-to-opportunity outcomes for graduates and non-graduates of postsecondary education and training programs who relocate or work outside the state	Oregon partners with PSEO (50-75% graduate coverage) and the State Wage Interchange System.	ADVANCED

Clear Outcomes

ADVANCED

Oregon 2026

PROVIDE

State data system elements	State description	Category
6. Provides comprehensive and timely open data files containing anonymized education-to-opportunity statistics that anyone can access, download, and otherwise use	Oregon publishes customizable open datasets containing community college enrollment and completion with disaggregation by race/ethnicity, gender, and age. The state is in the processing of publishing open datasets containing employment outcomes.	DEVELOPING
7. Publishes robust, timely, and easily understandable interactive resources informing education-to-opportunity decision-making by learners, families, and institutions	Oregon publishes interactive resources containing education-to-employment statistics for public four-year institutions, community colleges, nondegree credentials earned through community colleges, and WIOA-eligible training providers.	LEADING
8. Gives researchers access to individual-level matched education-to-opportunity datasets	Oregon provides deidentified, pre-matched, aggregate postsecondary and workforce data to external researchers upon request. The request and review process is not clearly documented online, but requests are initiated via an email request submission with additional steps determined based on the nature of the request. Additionally, the state has published a research agenda.	ADVANCED

IMPACT

State data system elements	State description	Category
9. Enables learners and earners to access and utilize their own verified data, unlocking opportunities for college and career advancement	Several Oregon institutions have established a strong foundation of microcredential work. The Oregon State University E-campus has a well-established microcredential program. The University of Oregon has created the Professional Edge program, and the National Education Association offers some microcredentials for teacher professional development, through Digital Promise's microcredentials platform.	FOUNDATIONAL
10. Designates a unit with responsibility and dedicated, full-time capacity for generating education-to-employment insights to inform state policymaking and resource allocation decision-making	The Oregon Longitudinal Data Collaborative (OLDC) maintains ready access to integrated E2E data for analysis, which it uses to publish resources on postsecondary employment outcomes but not supply/demand labor market attributes. OLDC relies on sustainable funding, governance, and dedicated staffing as well as partnerships with higher education and workforce development agencies.	ADVANCED

Quality Coaching

Oregon 2026

BACHELOR'S **DEVELOPING** ASSOCIATE **DEVELOPING**

Everyone should have access to coaching that helps them reflect on their talents and interests, choose a career goal, chart a path, and navigate challenges. The Quality Coaching measure is based on the percentage of associate students and bachelor's senior students who reported receiving personalized guidance, timely labor market information, and support to create a plan and overcome barriers.

This is the first report with available Quality Coaching data for **Oregon's** bachelor's and associate degree institutions, both of which are categorized as Developing overall, consistent with most other states. Rates of students receiving support trail the national average at both levels.

	Bachelor's		Associate	
	State	National	State	National
PERSONALIZED GUIDANCE				
Percentage of students at public institutions who report receiving personalized coaching or guidance to help select the education that will help prepare them for a successful career	DEVELOPING **32%**	**35%**	DEVELOPING **42%**	**45%**
TIMELY LABOR MARKET INFORMATION				
The average share of students at public institutions who receive timely labor market information, across the various types below, before enrolling or during their first year	FND./DEV. **25%**	**26%**	DEVELOPING **33%**	**35%**
Education-to-career paths that might be a good fit for students' strengths and interests	34%	34%	46%	45%
Job opportunities that a particular education program could lead to	21%	21%	33%	31%
Potential earnings in different careers related to students' education program	30%	30%	39%	40%
Career outcomes of students from their own institution	15%	17%	16%	23%
SUPPORT				
The average share of students at public institutions who receive at least some support in setting goals and in overcoming obstacles	ADVANCED **63%**	**72%**	ADVANCED **64%**	**73%**
Setting education and career goals, and developing a plan to achieve these goals	62%	71%	64%	73%
Identifying and overcoming barriers	64%	73%	65%	73%

Category Key

- **Foundational** <25%
- **Developing** 25% to <50%
- **Advanced** 50% to <75%
- **Leading** ≥75%

Affordability

BACHELOR'S **DEVELOPING** ASSOCIATE **LEADING**

A quality postsecondary education should be within everyone's reach, with clear, predictable, and manageable costs. The Affordability measure is based on how many hours a week the average student would need to work to cover the in-state net price (total cost of attendance minus any grants and scholarships), how many hours a student from a low-income family would need to work to cover their typical in-state net price, and the percentage of students that complete their degree on time – a critical factor in the cost of a degree.

Oregon improved from Foundational to Developing in overall affordability at bachelor's degree institutions, largely due to declining net prices for low-income students. At the associate level, it remains Leading overall, along with 34 other states and jurisdictions. The number of hours the average Oregon associate student would need to work to cover the cost of their education declined, and the state has improved from Advanced to Leading in this particular element.

	Bachelor's		Associate	
	State	National	State	National
STUDENT HOURS OF WORK NEEDED				
Average student hours of work needed	DEVELOPING **29 hours per week** Average annual net price: $17,678	**26 hours per week** Average annual net price: $15,270	LEADING **9 hours per week** Average annual net price: $9,471	**8 hours per week** Average annual net price: $8,089
Low-income student hours of work needed	ADVANCED **16 hours per week** Average annual net price for low-income students: $12,101	**12 hours per week** Average annual net price for low-income students: $9,813	LEADING **6 hours per week** Average annual net price for low-income students: $7,957	**4 hours per week** Average annual net price for low-income students: $6,678

Category Key

- **Foundational** ≥30 hrs
- **Developing** 20 to <30 hrs
- **Advanced** 10 to <20 hrs
- **Leading** <10 hrs

Bachelor's	
State	National
ON-TIME COMPLETION RATE	
DEVELOPING **45%**	**47%**

Category Key

- **Foundational** <35%
- **Developing** 35% to <50%
- **Advanced** 50% to <65%
- **Leading** ≥65%

Work-Based Learning

BACHELOR'S DEVELOPING

All students should have access to paid, immersive work-based learning experiences that connect education to career. The Work-Based Learning measure is based on the percentage of bachelor's senior students who reported participating in at least one of the following types of paid experiences: paid internship, paid apprenticeship, paid co-op, paid practicum, or paid undergraduate research experience. For students at associate degree institutions, participation is reported when data are available, but states are not categorized.

Although paid work-based learning participation is categorized as Developing for students at **Oregon's** bachelor's degree institutions, it is in line with most other states.

	Bachelor's		Associate	
	State	National	State	National
QUALITY WORK-BASED LEARNING				
Percentage of students at public institutions who participated in at least one of the five types of quality paid work-based learning experiences	DEVELOPING **33%**	**43%**	**10%**	**14%**
Paid internship participation	24%	35%	6%	10%
Percentage of students who participated in at least one of the five types of experiences (paid or unpaid)	61%	71%	24%	30%

Category Key

- **Foundational** <25%
- **Developing** 25% to <50%
- **Advanced** 50% to <75%
- **Leading** ≥75%

When the margin of error crosses a category threshold, states are given a combined category.

In addition to student self-reporting of apprenticeship participation, states have other sources of information on participation in registered apprenticeships via the U.S. Department of Labor. In Oregon, 0.43 percent of the state labor force is made up of active apprentices, for a total of 9,567 apprentices. Across the country, this number ranges from 0.86 percent (Hawaii) to 0.12 percent (Oklahoma). In countries with leading apprenticeship systems, such as Germany, Switzerland, Australia, Canada, and England, apprentices constitute about 2.5-3.0 percent of the labor force, so all states in the U.S. have substantial room for improvement.

Employer Alignment

DEVELOPING

Students should have access to programs that lead to quality jobs and employers should be able to find the talent they need to fill high-wage roles. The Employer Alignment measure is based on the percentage of terminal bachelor's degree holders aged 25-34 employed in a college-level job as well as the supply/demand ratio for a set of high-demand, high-wage jobs in each state.

College-level employment in **Oregon** is 56 percent, compared to 60 percent nationally. Oregon improved from Foundational to Developing overall in Employer Alignment. Though it remains Foundational in its overall supply/demand ratio, it improved in its ratio for engineers from Foundational to Advanced and for manufacturing/trades technicians and technologists from Foundational to Developing.

COLLEGE-LEVEL EMPLOYMENT			
The percentage of bachelor's degree graduates who are employed in college-level jobs		**56%**	DEVELOPING
SUPPLY/DEMAND RATIO			
The overall ratio: the average of the entry-level supply/demand ratios for these nine opportunity occupational groups			FOUNDATIONAL

	State	National
EXTERNAL AFFORDABILITY METRICS		
State appropriations per student FTE, public four-year institutions, FY2025 *(Source: SHEEO SHEF Annual Report)*	$6,833	$11,166
State appropriations per student FTE, public two-year institutions, FY2025 *(Source: SHEEO SHEF Annual Report)*	$11,591	$11,096
FAFSA completion rate, high school class of 2026 (through July 1, 2026) *(Source: NCAN)*	55%	59%
150% completion rate, first-time full-time students, bachelor's degree institutions, 2023-24 *(Source: College Scorecard)*	64%	64%
150% completion rate, first-time full-time Pell recipients, bachelor's degree institutions, 2023-24 *(Source: College Scorecard)*	55%	53%

If we get this right, here's what the future could look like: A young person or adult explores options with a career coach. They have data on jobs and earnings by program. They know costs up front, and public options are affordable and accessible. They engage in paid work-based learning, building skills and clarifying goals. By completion, they don't just hold a credential (or a few).
They have a good job, experience, and momentum toward a better future.
