State Opportunity Index

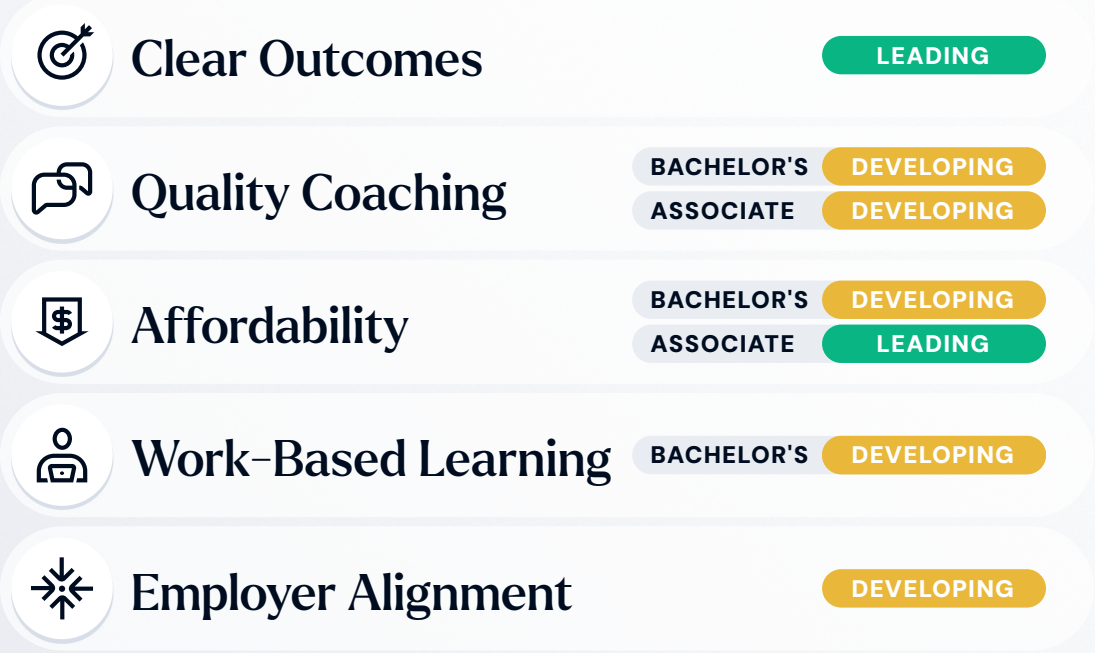

Texas

State Summary 2026

Texas at a glance

THE STATE OPPORTUNITY INDEX is a framework for measuring and improving education-to-career outcomes. For each state, the Index reports the percentage of graduates who experience a positive return on investment and summarizes progress in five key areas for improving success beyond completion: Clear Outcomes, Quality Coaching, Affordability, Work-Based Learning, and Employer Alignment. States are grouped into four categories: Leading (at the forefront, demonstrating strong progress); Advanced (substantial progress); Developing (early stages of improvement); and Foundational (just beginning their journey).

Texas improved from Advanced to Leading in Clear Outcomes, joining 16 other states in the category. The state also is among 35 states and jurisdictions Leading in Affordability at associate degree institutions. To learn more about progress in other states, visit strada.org/state-opportunity-index.

State Opportunity Index

strada

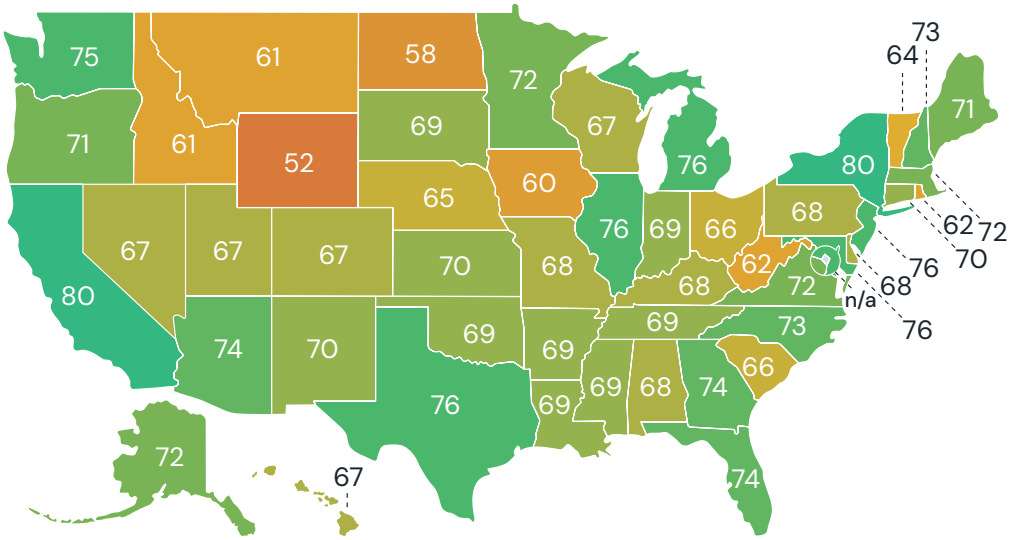

In cases in which the margin of error crosses a category threshold, states are given a combined category.
References for "unavailable" refer to states in which there was insufficient data to assign a rating at this time.

Positive ROI

	Texas	National
Overall	72%	70%
Bachelor's	76%	73%
Associate	59%	60%

All students who invest their time and money in earning a degree should be financially better off because of it. The Positive ROI value for each state represents the estimated percentage of public college graduates whose earnings premium over high school graduates is enough to repay their total cost of a degree within 10 years.

Percentage of graduates with Positive 10-year ROI by state - bachelor's degrees

Percentage of graduates with Positive 10-year ROI by state - associate degrees

Clear Outcomes

LEADING

Texas 2026

Everyone should have access to accurate information on employment outcomes that can help them make informed decisions about education after high school. The Clear Outcomes measure is based on 10 critical elements that contribute to the capacity of state education-to-employment data systems to clarify education pathway outcomes in order to inform personal, public, and private sector investments.

Texas improved from Advanced to Leading in overall Clear Outcomes. It also improved from Advanced to Leading in integrating post-high school education and employment data (element 3). Open aggregate data (element 6) is a strength, and it is one of 17 states Leading in this element.

COLLECT

State data system elements	State description	Category
1. Includes learner-level and program characteristic data for nondegree and noncredit postsecondary education and training programs	Texas collects enrollment and credential outcome data for: (i) college-issued, noncredit credentials; (ii) WIOA-eligible training providers; (iii) occupational licensure; and (iv) other third-party credentials, namely apprenticeships. The state seeks to expand collections of noncredit data and industry certifications data, and the state will link these credentials to employment outcomes.	ADVANCED
2. Examines earnings by occupation, pay rate, and work location	Texas is implementing collections of occupation, work location, and worker type (full time, part time, remote). Additionally, the Texas Higher Education Coordinating Board is integrating third-party sources to supplement job title and skill information in integrated education-to-employment data.	DEVELOPING

INTEGRATE

State data system elements	State description	Category
3. Integrates and delivers information on learners' earnings and employment after postsecondary education and training completion, and over time	Texas integrates administrative sources on employment and earnings with its (i) public four-year institutions; (ii) private four-year institutions; and (iii) community colleges. The state publishes these postsecondary education-to-employment data as downloadable datasets and an interactive resource through the Texas Consumer Resource for Education and Workforce Statistics. While these integrated education-to-employment data are not currently disaggregated, recently enacted legislation requires disaggregation by race/ethnicity, gender, and family income/economic status.	LEADING
4. Integrates and delivers information on learners' earnings and employment after high school completion and over time	Texas integrates administrative information on employment and earnings with high school completion records. The Texas Education Agency publishes these high school-to-employment outcomes through the Texas Public Education Information Resource's Wages and Employment by Education and College Enrollment and Employment interactive resources. These employment outcomes are not disaggregated by student demographic characteristics.	ADVANCED
5. Partners with national and multi-state initiatives to assess education-to-opportunity outcomes for graduates and non-graduates of postsecondary education and training programs who relocate or work outside the state	Texas partners with PSEO (>75% graduate coverage), the Multi-State Data Collaborative, and the State Wage Interchange System. LEADING

Texas 2026

PROVIDE

State data system elements	State description	Category
6. Provides comprehensive and timely open data files containing anonymized education-to-opportunity statistics that anyone can access, download, and otherwise use	Texas publishes open datasets containing education-to-employment outcomes for public four-year institutions, some private four-year institutions, and community colleges. The Texas Higher Education Coordinating Board is also expanding the availability of datasets through the DataBridge cloud infrastructure to support institutional and policy decision-making.	LEADING
7. Publishes robust, timely, and easily understandable interactive resources informing education-to-opportunity decision-making by learners, families, and institutions	Texas publishes multiple interactive resources containing education-to-employment statistics for public four-year institutions, some private four-year institutions, community colleges, WIOA-eligible training providers, and high schools. These tools include My Texas Future, Texas CREWS, and Texas Public Education Information Resource.	LEADING
8. Gives researchers access to individual-level matched education-to-opportunity datasets	The Texas Higher Education Coordinating Board provides secure access to longitudinal student and workforce data through its three Education Research Centers (ERCs). Researchers can apply to use deidentified data from K-12, postsecondary, and workforce systems, and the ERCs clearly document the request and approval process.	LEADING

IMPACT

State data system elements	State description	Category
9. Enables learners and earners to access and utilize their own verified data, unlocking opportunities for college and career advancement	While not a statewide coordinated effort, multiple institutions are laying a foundation for learning mobility. The following institutions have been awarded an LER Accelerator grant to support these efforts: (i) Alamo Colleges District to develop a roadmap for a learner-controlled digital skills wallet and CLR, focusing on technical readiness, governance, and workforce alignment; (ii) Dallas College to build upon its existing Marketable Skills and Digital Badging initiatives to provide its students with a comprehensive, secure platform for showcasing verified credentials across both credit and noncredit programs; (iii) University of Texas at Austin to develop a CLR, connecting academic achievements to career pathways and representing skills to employers; and (iv) University of Texas Medical Branch to develop a framework for a CLR.	FOUNDATIONAL
10. Designates a unit with responsibility and dedicated, full-time capacity for generating education-to-employment insights to inform state policymaking and resource allocation decision-making	Texas, through its Higher Education Coordinating Board, has built an internal Office of Data Management and Research with full-time analysts who provide dedicated analytic support to strategic priorities (e.g., HB 8, My Texas Future) and generate E2E insights to guide decision-making.	DEVELOPING

Quality Coaching

BACHELOR'S DEVELOPING **ASSOCIATE** DEVELOPING

Everyone should have access to coaching that helps them reflect on their talents and interests, choose a career goal, chart a path, and navigate challenges. The Quality Coaching measure is based on the percentage of associate students and bachelor's senior students who reported receiving personalized guidance, timely labor market information, and support to create a plan and overcome barriers.

Texas remains Developing in overall Quality Coaching for students at both bachelor's and associate degree institutions, consistent with most other states.

	Bachelor's		Associate	
	State	National	State	National
PERSONALIZED GUIDANCE				
Percentage of students at public institutions who report receiving personalized coaching or guidance to help select the education that will help prepare them for a successful career	DEVELOPING **34%**	**35%**	DEVELOPING **46%**	**45%**
TIMELY LABOR MARKET INFORMATION				
The average share of students at public institutions who receive timely labor market information, across the various types below, before enrolling or during their first year	FND./DEV. **24%**	**26%**	DEVELOPING **34%**	**35%**
Education-to-career paths that might be a good fit for students' strengths and interests	32%	34%	46%	45%
Job opportunities that a particular education program could lead to	21%	21%	29%	31%
Potential earnings in different careers related to students' education program	28%	30%	36%	40%
Career outcomes of students from their own institution	15%	17%	23%	23%

- **Leading** ≥75%

Affordability

BACHELOR'S **DEVELOPING** ASSOCIATE **LEADING**

A quality postsecondary education should be within everyone's reach, with clear, predictable, and manageable costs. The Affordability measure is based on how many hours a week the average student would need to work to cover the in-state net price (total cost of attendance minus any grants and scholarships), how many hours a student from a low-income family would need to work to cover their typical in-state net price, and the percentage of students that complete their degree on time – a critical factor in the cost of a degree.

Texas improved from Foundational to Developing in overall affordability at bachelor's degree institutions. At the associate level, the state remains Leading overall, with net prices declining considerably.

	Bachelor's		Associate	
	State	National	State	National
STUDENT HOURS OF WORK NEEDED				
Average student hours of work needed	FOUNDATIONAL **31 hours per week** Average annual net price: $14,834	**26 hours per week** Average annual net price: $15,270	LEADING **7 hours per week** Average annual net price: $6,794	**8 hours per week** Average annual net price: $8,089
Low-income student hours of work needed	ADVANCED **18 hours per week** Average annual net price for low-income students: $10,519	**12 hours per week** Average annual net price for low-income students: $9,813	LEADING **4 hours per week** Average annual net price for low-income students: $5,737	**4 hours per week** Average annual net price for low-income students: $6,678

Category Key	Foundational	Developing	Advanced	Leading
	<35%	35% to <50%	50% to <65%	≥65%

Work-Based Learning

BACHELOR'S **DEVELOPING**

All students should have access to paid, immersive work-based learning experiences that connect education to career. The Work-Based Learning measure is based on the percentage of bachelor's senior students who reported participating in at least one of the following types of paid experiences: paid internship, paid apprenticeship, paid co-op, paid practicum, or paid undergraduate research experience. For students at associate degree institutions, participation is reported when data are available, but states are not categorized.

Texas is on par with most other states in paid work-based learning participation. Participation is categorized as Developing for students at bachelor's degree institutions, along with 32 other states.

	Bachelor's		Associate	
	State	National	State	National
QUALITY WORK-BASED LEARNING				
Percentage of students at public institutions who participated in at least one of the five types of quality paid work-based learning experiences	DEVELOPING **39%**	**43%**	**11%**	**14%**
Paid internship participation	31%	35%	6%	10%
Percentage of students who participated in at least one of the five types of experiences (paid or unpaid)	66%	71%	29%	30%

Category Key

- **Foundational** <25%
- **Developing** 25% to <50%
- **Advanced** 50% to <75%
- **Leading** ≥75%

When the margin of error crosses a category threshold, states are given a combined category.

In addition to student self-reporting of apprenticeship participation, states have other sources of information on participation in registered apprenticeships via the U.S. Department of Labor. In Texas, 0.28 percent of the state labor force is made up of active apprentices, for a total of 43,786 apprentices. Across the country, this number ranges from 0.86 percent (Hawaii) to 0.12 percent (Oklahoma). In countries with leading apprenticeship systems, such as Germany, Switzerland, Australia, Canada, and England, apprentices constitute about 2.5–3.0 percent of the labor force, so all states in the U.S. have substantial room for improvement.

Employer Alignment

DEVELOPING

Students should have access to programs that lead to quality jobs and employers should be able to find the talent they need to fill high-wage roles. The Employer Alignment measure is based on the percentage of terminal bachelor's degree holders aged 25-34 employed in a college-level job as well as the supply/demand ratio for a set of high-demand, high-wage jobs in each state.

Texas is one of 21 states categorized as Advanced in college-level employment among recent bachelor's degree graduates with a rate of 61 percent, compared to the national average of 60 percent. The state also improved from Foundational to Developing in overall supply/demand, from Advanced to Leading in data analytics and information and cybersecurity, and from Foundational to Advanced in nursing and manufacturing/trades technicians and technologists.

COLLEGE-LEVEL EMPLOYMENT			
The percentage of bachelor's degree graduates who are employed in college-level jobs		61%	ADVANCED

EXTERNAL AFFORDABILITY METRICS		
State appropriations per student FTE, public four-year institutions, FY2025 *(Source: SHEEO SHEF Annual Report)*	$11,813	$11,166
State appropriations per student FTE, public two-year institutions, FY2025 *(Source: SHEEO SHEF Annual Report)*	$11,683	$11,096
FAFSA completion rate, high school class of 2026 (through July 1, 2026) *(Source: NCAN)*	72%	59%
150% completion rate, first-time full-time students, bachelor's degree institutions, 2023-24 *(Source: College Scorecard)*	61%	64%
150% completion rate, first-time full-time Pell recipients, bachelor's degree institutions, 2023-24 *(Source: College Scorecard)*	52%	53%

If we get this right, here's what the future could look like: A young person or adult explores options with a career coach. They have data on jobs and earnings by program. They know costs up front, and public options are affordable and accessible. They engage in paid work-based learning, building skills and clarifying goals. By completion, they don't just hold a credential (or a few).
They have a good job, experience, and momentum toward a better future.
