

MINNESOTA CANNABIS DELIVERY LICENSE

COMPLIANT. CONNECTED. ESSENTIAL.

MINNESOTA SOCIAL EQUITY DELIVERY LICENSE

LICENSE OPPORTUNITY OVERVIEW:

Minnesota's adult use cannabis market is open and growing and this Cannabis Delivery Service License puts an operator directly in front of end consumers on day one. The license authorizes the holder to purchase cannabis products from licensed Minnesota retailers and deliver them directly to customers at their homes or approved locations statewide. No storefront. No cultivation. No manufacturing. Just a scalable, direct to consumer revenue stream in one of the Midwest's newest and fastest growing legal markets.

Delivery licenses are limited and difficult to obtain. There are only 33 qualified applicants and 38 preliminarily approved applications, so a maximum of 71 delivery licenses will ultimately be granted, creating scarcity. As retail locations expand across Minnesota and consumer demand for delivery accelerates, this license positions a buyer to operate at the front edge of that demand curve from day one.

KEY HIGHLIGHTS:

- **Direct Consumer Revenue** - Purchase from licensed retailers and deliver straight to customers, the shortest path to revenue in the cannabis supply chain.
- **First Mover Advantage** - Minnesota's market is in its early stages. Build your brand, customer base, and delivery infrastructure before the competition catches up.
- **Statewide Market Access** - Operate across all of Minnesota, no territory restrictions, no single location dependency.
- **No Storefront. No Buildout** - Run the entire operation with vehicles and staff. Minimal overhead, maximum margin potential.
- **Scarce License** - Delivery licenses are limited and difficult to obtain through the standard process. This is a ready to operate asset.
