SPECIFICATION SHEET

CUSTOM DESIGN

*"Your end-to-end project
partner"*

From problem to solution

Whether it's developing a unique UV-C application for your specific environment or adapting existing technology from our range, we ensure innovative and effective results.

Investigation

Through a thorough investigation phase, we use our in-house expertise to understand your specific needs to develop a customised design.

Research and Development

Detailed design and validation tests are completed prior to installation to ensure a smooth installation phase.

Commissioning

We ensure the technology developed operates correctly, safely, and efficiently, minimising downtime and maximising productivity.
