# BOOT DISINFECTION CABINETS

## Effective sterilisation

UV-C cabinets are an essential tool for research labs, cleanrooms, and food manufacturing and preparation facilities demanding high levels of sanitation.

These cabinets effectively disinfect the inside and outside of boots, ensuring the elimination of unwanted germs and bacteria, as well as odours.

A variety of units and applications are available all incorporating:

- Effective sterilisation of the inside and the outside of the boots
- Guarantee sterilisation of the boots to eliminate unwanted germs and bacteria
- The units dry out the boots
- Hot plasma ioniser function
- Removes odour from boots
- Only need a 10-amp socket outlet for power supply
- Safety system to keep personnel safe
- Operation is one-button, digital display
- Easy access lamp maintenance
