MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Economic Review

India's economy picked up in Q4 FY 2015, driving growth for the full fiscal year to accelerate to a six year high. However, the economy remains hampered by falling exports and shrinking fixed investment, and concerns over the methodology of the GDP series have led many of our panelists to believe that growth is being overestimated. High-frequency data continue to paint a more subdued picture of growth: the manufacturing PMI picked up in June, while the services PMI fell. On a bright note, both rural and urban consumption are set to receive a boost after recent developments. A pickup in monsoon rains should support rural households in the second half of the year, while the government approved a once-in-a-decade increase to public sector wages and pensions.

Real Estate Overview

The real estate sector is one of the most globally recognised sectors. In India, real estate is the second largest employer after agriculture and is slated to grow at 30 per cent over the next decade. The Indian real estate market has become one of the most preferred destinations in the Asia Pacific as overseas funds accounted for Private Equity (PE) investments from foreign funds in the Indian realty market increased at a Compound Annual Growth Rate (CAGR) of 33 per cent to US\$2,220 million in year ending December 2015.

The real estate market has been amongst the sectors worst hit by the economic downturn. The residential space continues to face headwinds in the form of muted sales and subdued consumer demand. Furthermore, the sector has been challenged by frequent delays in project completion and a complex approval process. This has resulted in developers curtailing new project launches and focusing on executing existing projects to deliver within the committed timeframe. Real estate is currently the fourth-largest sector in the country in terms of Foreign Direct Investment (FDI) inflows.

The Real Estate Regulation and Development Act

has the potential to address long standing issues which have plagued the growth of the sector. Further, policy announcements and reforms to revive the real estate space, including the relaxation of Foreign Direct Investment FDI norms, introduction of 100 smart cities, direct and indirect tax benefits for affordable housing projects, Real Estate Investment Trusts REITs etc. have helped in generating a positive outlook for the real estate market.

Opportunities

The financial year 2015-16 did not bring in the Growth hoped-for. However, the silver lining is that the bad days seem to have bottomed out. Developers' initiatives like offering attractive schemes and deal terms, coupled with lowering of interest rates by the Reserve Bank of India (RBI), have activated fence-sitters

The challenges of demand-supply mismatch and high unsold inventory across the country remain, but the signs are nevertheless encouraging as slowly but surely crawling back to positive growth. 2016 may well bring an end to the long and painful journey this sector has had, and signal an upward growth trajectory. It will definitely mature further into an organised industry in which some lesser-organised players become casualties. The Developers have realized the potential of online medium in terms of reaching out to people and the developers have started offering scheme for home booking through online platform. One of the key developments in real estate industry is the declining unsold inventories in the FY 2015-16.

Declining unsold inventory in Mumbai, Chennai & Bangalore

THREATS AND CHALLENGES

Industrial threats

The real estate market is inherently a cyclical market and is affected by macroeconomic conditions, changes in applicable governmental schemes, changes in supply and demand for projects, availability of consumer financing and illiquidity. Your Company has attempted to hedge against the inherent risks through a business model comprising joint ventures and residential platforms. However, any future significant downturn in the industry and the overall investment climate may adversely impact business.

Regulatory Hurdles

Unfavorable changes in government policies and the regulatory environment can adversely impact the performance of the sector. There are substantial procedural delays with regards to land acquisition, land use, project launches and construction approvals. Deferred Tax is recognized on timing differences, being the differences between taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax assets, subject to consideration of prudence, are recognized and carried forward, only to the extent that there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. The tax effect is calculated on the accumulated timing difference at the year end, based on the tax rates and laws enacted or substantially enacted on the balance sheet date. In situations where the company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that sufficient future taxable income will be available against which such deferred tax asset can be realized. They can be realized against future taxable profits.

a) a present obligation arising from a past event, when it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation.

b) a possible obligation, that arises out of past events and the existence of which will be confirmed only by one or more uncertain future events unless the probability of outflow of resources is remote.
