The platform

Online background **screening** platform

Scaut is an automated platform that helps reduce the risk of hiring the wrong employee by verifying their information. It's fast, easy to use, and can be used for both hiring and regular employee checks.

Our platform delivers:

Modern interface
Intuitive interface simplifies process management.

Automated checks
Our checks and verification processes save time and provide real-time information where available.

HRIS and ATS integration
Offers seamless connectivity via open API for streamlined recruitment and data management.

Continuous monitoring
Ensures ongoing security for employees, partners, and suppliers.

Scalable system
Suits companies of all sizes, with options from pay-per-check to enterprise subscription plans.

Cutting edge technologies
Continuously integrating new technologies, including forensic, and analytical tools, to deliver top-tier screenings with unmatched accuracy and efficiency.

Service plans
Offers advanced features and cost savings for regular use. Clients can chose from several tiers to fit their specific needs.

Data you can rely on

We are dedicated to verifying employee, contractor, and supplier information with precision. Using cutting-edge technology, we provide accurate and reliable data, empowering your organization to make informed decisions confidently. We continuously add new sources of data and means of verification.

With Scaut you can quickly and easily screen candidates for their criminal history, education verification, employment verification and more.

Scaut plans

Scaut offers a range of **service plans** that allow you to manage the security of your workforce. Our plans let you access a wide range of checks and verifications, simply pick the one that works for your organization.

Whether you're hiring twenty employees in Poland, building a custom package for CISO hires, or monitoring the workforce of multiple organizations — just pick the plan you need and protect your organization with Scaut.
