***Modulating immune  
response through advanced  
cell therapeutics***

October 2025

# Disclosures

This presentation has been prepared for use by RESTEM GROUP INC. and its affiliates (“RESTEM”). This presentation, and any information disclosed, whether in writing or orally, as part of, or otherwise in connection with this presentation, is for information purposes only and is being provided to you solely in your capacity to consider any RESTEM operations, financials, and clinical studies, among other areas. The presentation may not be used for any other purpose and may not be reproduced or redistributed, in whole or in part, without the prior written consent of RESTEM.

Any photocopying, disclosure, reproduction, or alteration of the contents of this presentation and any forwarding of a copy of this presentation or any portion of this presentation to any person is prohibited. This presentation is not intended to be all-inclusive or to contain all the information that a person may desire in considering an investment in RESTEM and is not intended to form the basis of any investment decision in RESTEM. You should consult your own legal, regulatory, tax, business, financial and accounting advisors to the extent you deem necessary and must make your own investment decision and perform your own independent investigation and analysis of an investment in RESTEM and the transactions contemplated in this presentation.

This presentation shall neither constitute an offer to sell or the solicitation of an offer to buy any securities, nor shall there be any sale of securities in any jurisdiction in which the offer, solicitation or sale would be unlawful prior to the registration or qualification under the securities laws of any such jurisdiction. Neither the Securities and Exchange Commission nor any state or territorial securities commission has approved or disapproved of the securities or determined if this presentation is truthful or complete.

This Presentation contains information that constitutes “forward-looking statements,” which can be identified by the use of forward-looking terminology such as “may,” “can,” “will,” “could,” “expect,” “project,” “estimate,” “potential,” “intend,” or “believe” or the negatives thereof or other comparable terminology. Due to various risks and uncertainties, actual events or results or the actual performance of new investments may differ materially from those reflected or contemplated in such forward-looking statements. Nothing contained herein should be deemed to be a prediction or projection of the future performance. Nothing contained in this Presentation is designed to create a financial advisory or other relationship with any prospective investor or any other party and the creation of any such relationship is expressly disclaimed.

There can be no assurance that any targeted returns or other financial, operational, or strategic results will be met or that RESTEM will be able to implement its business strategy and clinical approach or achieve its investment objective. Actual returns will depend on, among other factors, general economic conditions, market conditions, one-time events, and other factors that will be described in the definitive offering documents. All investments involve risk, including possible loss of principal.

# Company Overview

## Private

**Founded in 2018**, the company has established a strong foundation in the **field of cell-based therapeutics** and developed a **robust patent portfolio**

## Multi-asset

**3 proprietary platforms**, with the common focus of **modulating the immune system** and treating **inflammatory-associated diseases**

## Late-stage

Commencing in 2025 a **pivotal Phase 2/3 trial** in Idiopathic Inflammatory Myopathy (IIM). Successfully completed multiple INDs and eINDs across **11 different indications**, demonstrating initial **clinical benefits** and an excellent **safety profile**.

## Competitive Advantages

Breaking through the key limitations of cell therapeutics with **cost-effective manufacturing, enhanced scalability** and **minimized toxicity**.

# Platform Overview

## Restem-L

*Autoimmunity*

**Umbilical-lining Modified Progenitor Cell (UMPC)** product, developed using a patented **conditioning process**, designed to target **orphan** and **refractory autoimmune** diseases

## Restem-X

*Orthopedics*

**Secretome-based** product, **functionally optimized** to deliver ground-breaking therapeutic properties in **orthopedic** treatments

## aNK

*Immuno-senescence*

**Activated natural killer (aNK)** cells, uniquely designed to restore immune function and target **aging-related diseases** by **reversing immuno-senescence**

# Experienced Management Team & Advisory Board

## Management Team

**Andres Isaias**

*Executive Chairman &  
Chief Executive Officer*

**Rafael Gonzalez, PhD**

*Chief Development &  
Scientific Officer*

**Keith March, MD, PhD**

*Chief Medical Officer*

**Nelson Cabatuan**

*Chief Financial Officer*

**Barb Eppler-Mossler PhD**

*Sr. VP of Regulatory Affairs*

**Brian Pla**

*Chief Business  
Development Officer*

## Scientific Advisory Board

### **Robert Sackstein, MD, PhD**

SVP for Global Health Affairs,  
Florida International University

### **Robert Negrin, MD, PhD**

Division Chief, Blood and Marrow  
Transplant Program, Medical  
Director, Clinical Bone Marrow  
Transplantation Laboratory

### **Guenther Koehne, MD, PhD**

Deputy Director and Chief of  
Blood & Marrow Transplant and  
Hematologic Oncology

### **Jonathan Krant, MD**

Chief of Rheumatology Division,  
Memorial Health System, and  
former Chairman of Medicine,  
Adirondack Health Systems

# Advancing Pipeline of Restem Platforms

|      | Program                                        | Indication                                      | Preclinical                                                                          | Phase 1 | Phase 2 | Phase 3 | Status                              |

UMPC: Umbilical lining Modified Progenitor Cells; aNK: activated Natural Killer cells

\* FDA Fast Track and Orphan Drug designations granted

\*\* Fully Committed Funding

# Restem-L – Best-In-Class Cellular Therapeutic Product

## Higher Scalability

Exceptional proliferative ability yields greater growth and expansion of high-quality cells

## Younger & More Robust Cells

Maintains longer telomeres throughout multiple passages ensures younger and more robust cells

## Better Repair Mechanism

Higher telomerase activation in later passages supports a stronger DNA repair mechanism

Superior Properties than Other Cell-based Products

# Restem-L – Key Pillars

# Restem-L – Overcoming the Quintessential Cell Therapeutics Manufacturing Challenges

| Scalability                                                                         | Cost                                                                 | Time                                                                         | Consistency                                                                              | Inventory                                                                     |
|-------------------------------------------------------------------------------------|----------------------------------------------------------------------|------------------------------------------------------------------------------|------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------|
| Extensive supply, with 3 master and working cell banks with a capability to produce | Manufacturing costs are advantageous, with a production cost of just | Accelerated manufacturing timeline from master/working bank to final product | Highly reproducible and complete characterization uniformity among donors and cell lines | GMP cells in inventory ready for use in clinic trials, with quick turn-around |
| > 3 million doses                                                                   | < \$2,200 per dose                                                   | Under 6 weeks                                                                | Superior lot-to-lot consistency                                                          | 180 doses                                                                     |

Uniquely positioned to support clinical trials and mass commercialization of cell-based products

# Addressing the Growing Need for Autoimmune Therapies

## Increasing Prevalence

**1 in 10**

individuals globally is affected  
with autoimmune diseases<sup>1</sup>

## Existing Market

**\$150 billion/yr**

Estimated autoimmune disease  
yearly market across multiple  
indications<sup>2</sup>

## Current Treatments

**↑ AEs**

Currently approved treatments  
are associated with frequent  
and severe adverse events

1. Miller FW. The increasing prevalence of autoimmunity and autoimmune diseases: an urgent call to action for improved understanding, diagnosis, treatment, and prevention. Curr Opin Immunol. 2023 Feb;80:102266.

2. [www.einpresswire.com/article/495486226/autoimmune-disease-therapeutics-market-nears-150-billion-by-2025-market-is-witnessing-a-strong-presence-of-late-stage-pipeline-drugs](https://www.einpresswire.com/article/495486226/autoimmune-disease-therapeutics-market-nears-150-billion-by-2025-market-is-witnessing-a-strong-presence-of-late-stage-pipeline-drugs)

# Restem-L Strongly Modulates the Inflammatory Response

Inflammation is the driving force of autoimmune tissue injury

Restem-L Modulates Lymphocyte and Monocyte Factor Secretion to Treat Disease

# Restem-L - Strongly Reduced Inflammatory Responses of White Cells in Clinical Trials

Restem-L markedly suppresses TNF $\alpha$ , a strong mediator of inflammation

# Restem-L in Adult Idiopathic Inflammatory Myopathy (IIM)

An autoimmune disease, with Polymyositis/Dermatomyositis (PM/DM) as its primary subtypes

## Prevalence

**~ 58,000**

People with IIM in the US  
alone\*

## Cost per Patient

**\$200,000+/yr**

Intravenous Immunoglobulin  
(IVIg) is the only approved  
treatment and is commonly is  
short supply

## Unmet Medical Needs

**Toxicity**

Currently managed with long-  
term use of steroids,  
which have many serious  
side effects

## Market Opportunity

**~\$1.6-2.4B\*\***

Projected peak net revenue  
generated by Restem-L

# IIM Phase 1 Study Design

Open-label, dose escalation trial to investigate Restem-L therapy in IIM (both in PM and DM)

**Investigator:**  
Michael Bubb, MD (Principal Investigator)  
Associate Professor of Medicine  
University of Florida Medical Center

# Restem-L Improved Symptoms while Reducing Steroids Use in IIM

Data featured in an oral presentation at the American College of Rheumatology's (ACR) 2024

## Durable Improvement

- The Total Improvement Score (TIS) averaged for all participants is within 30-35% range; 20% is considered a meaningful improvement by the FDA and Key Opinion Leaders
- The overall improvement in various scales was seen concurrently with a reduction in 6 of the 7 participants of the Prednisone daily dose

## Reduction of Required Prednisone Dose

- The average daily dose of Prednisone was tapered by more than 5.5 mg by managing clinician (*chronic use of as little as 2.5 mg daily leads to increased adverse side effects*)
- 7 out of the 9 participants used Prednisone daily
- 6 out of the 7 daily users of Prednisone had an average of ~50% decrease in their steroid use

# Aggressive Regulatory Strategy Supported by Strong Clinical Success

Positive results achieved in challenging autoimmune disease

- ☒ Granted Orphan Drug Designation (ODD)
- ☒ Granted Fast-Track Designation (FTD)
- ☒ Authorized straight to Phase 2/3 IND
- ☐ Possibility for RMAT Designation
- ☐ Potential Registrational Trial

# Restem-L: IIM Trial Results - Disease Paradigm Shift

# IIMPACT - FDA-Authorized Phase 2/3 in IIM, a Potentially Registrational Trial

Pivotal, Adaptive double-blinded, randomized, dose-repeating, crossover study

## Inclusion Criteria

≥18 years old with diagnosis of PM/DM based on EULAR/ACR score and Active Disease;

Participants must be receiving stable treatment, with one or more oral immunosuppressant medications, HCQ, and/or corticosteroids

## Treatment Arms

## Endpoints

Total Improvement Score (TIS), from baseline and by comparison with placebo;

Pre-specified steroid step-down to solidify the finding of the concurrent efficacy and steroid reduction

**Institution / Investigator:**  
Veterans Affairs Medical Center / Michael Bubb, MD (Principal Investigator)

# Restem-L in Rheumatoid Arthritis (RA)

RA is a chronic, autoimmune disease of unknown etiology that primarily affects synovial joints

## Prevalence

**~ 1,650,000**

Diagnosed adult RA patients in 2024 in the US alone\*

## Cost per Patient

**\$80,000-\$120,000**

Yearly cost of biologics which accounts for approximately 60% of RA patients

## Unmet Medical Needs

**~21%**

Uncontrolled or refractory patient population\*\*

## Market Opportunity

**~\$1.1-2.1B\*\*\***

Projected peak net revenue generated by Restem-L in 2034

\*Note: Average volume of diagnosed RA cases was calculated for sources reporting a range of diagnosed prevalence rates : [Hunter, et al](#), [Myasoedova, et al](#), [Almutairi, et al](#)

(RESTEM

**Restem-X:  
A Regenerative Secretome**

# Restem-X — Clinical Applications

Natural Product with a Strong Orthopedic Therapeutic Potential

- Restem-X is a cell-based secretome derived from our proprietary Restem-L (UMPC) product
- UMPCs are stimulated to secrete a functionally optimized profile of bioactive molecules which create an ideal formulation to collectively support joint health
- These bioactive molecules enhance cellular communication and promote tissue repair and regeneration

## Key Components of RESTEM-X

|                                           |                                                                                                     |
|-------------------------------------------|-----------------------------------------------------------------------------------------------------|
| <b>Collagen I</b>                         | Provides structure to skin, regenerating properties to bone health such as flexibility and strength |
| <b>Collagen III</b>                       | Helps form new bone and plays a critical role in tissue repair                                      |
| <b>Hyaluronic Acid (HA)</b>               | Lubricates and support the entire joint, its the main fluid in all joint capsules                   |
| <b>Fibroblast Growth Factor-2 (FGF-2)</b> | It's a strong regenerative and mitogen, while helping heal tendons, ligaments and cartilage         |
| <b>Fibroblast Growth Factor-7 (FGF-7)</b> | Critical role in wound healing and bone restructuring                                               |

# Restem-X — Future Price Competitiveness (per Treatment)

Visco-supplementation market valuation of \$5.12 B in 2024\*

# Restem-X — Potential Disease Resolution vs Symptomatic Suppression

## Osteoarthritis

Steroids & Visco-supplementation

Temporary pain relief with cartilage loss

Total Knee Replacement

STANDARD OF CARE

Decreases inflammation & provides structural support via extra cellular matrix

Long-term pain relief without cartilage loss

Improved Quality of Life

RESTEM-X

# Restem-X Revolutionizing Joint Regeneration and Repair

## Supports Joint Health and Tissue Repair

- Contains key components for orthopedics, including high molecular weight (MW) hyaluronic acid (HA), collagen, and elastin offering enhanced elasticity and overall regeneration and repair
- Targets the root causes of osteoarthritis by addressing both inflammation and cartilage damage, leading to improved mobility and reduced pain

### Enhanced Fibroblast Collagen and Elastin Production with Restem-X

Safe and effective rejuvenation in joint health

**Activated Natural Killer Cells:  
Reducing the Burden of Senescent Cells**

# Senescent Cells and Cellular Apoptosis

Aging is marked by damage caused by senescent cells, which cease to divide and occupy space becoming resistant to programmed cell apoptosis (natural cell death)

The accumulation of senescent cells impairs tissue removal and disrupts local homeostasis

# Activated Natural Killer (aNK) Cells – Target Senescent Cells

- Our *activated* Natural Killer (aNK) cells are proprietary immune cells specifically enhanced to recognize and eliminate senescent cells which may reverse age-associated diseases
- Patented methods to isolate, purify, expand and activate NK cells
- Restem is only company harnessing the power of NK cells to target and reverse cellular senescence

# Activated Natural Killer (aNK) Cells - Reduces Immunosenescence

## Untreated Aging

## Treated Aging

# Effects of aNK on Senescence Biomarkers in Patients

aNK treatment significantly reduced key senescence markers (p16 and  $\beta$ -gal) in PBMCs isolated from donors

Significant reduction in p16 levels, post aNK treatment

Decrease in  $\beta$ -gal activity in all donors, post aNK treatment

**These findings support the therapeutic potential of aNK in restoring immune function and targeting senescent cells in aging-associated diseases**
