## TopCon

As competition intensifies and profit margins narrow, livestock farmers require solutions that minimize inputs while maximizing production. With feed costs accounting for over 50% of operating expenses and greatly influencing performance, precision management becomes crucial for profitability.

Topcon feed mixers are designed to blend ingredients into a Total Mixed Ration (TMR) efficiently, featuring advanced weighing systems to accurately track feed loads. Integrated software solutions replace traditional paper methods, enhancing efficiency, minimizing waste, and optimizing overall production.

## Animal feed weighing system Digi-Star EZ 2805

Accurate load monitoring with TAP FEED or TMR Tracker software, integrated with weighing systems. Includes remote support, mixer maintenance, & clear display indicators, with mobile app access via Bluetooth.

## Animal feed weighing system Digi-Star FD1 CL-55

XTEND integrates with Topcon Horizon software to extend key interface functions to mobile devices, providing an additional screen for in-cab or external use. It enhances efficiency with auto section control for compatible application controllers.
