

## How to read the Wensum dashboard

1. Visit the [Wensum Data Dashboard](#)
2. Select one of the following from the menu bar
  - **Site analysis** - to review sample results from specific sites over time
  - **Compare sites** - to compare sample results from specific sites over time

### Site analysis

- Select a Reach by clicking **Select Reach**, then clicking on the desired reach name (e.g. Foulsham Stream)
- Select a site to view by clicking on **Select Site** and clicking on the desired site name (e.g. Twyford Bridge A067). The data overview will be in the coloured panels
- To see a particular report, click on the report in **Select a report** to see the full details in the panel
- To see a result on a particular date, click on and slide the bar at the top of the graphs to see within a date range

### Comparing sites

- When comparing sites, select up to four sites to view by clicking on **Select Site** and clicking on the desired site names. The data overview will be in the coloured panels

3. Use the yellow arrow tab on each page to access the **'how to use the dashboard'** guide on the website
4. To learn more about the core water quality indicators we measure, why they matter, and how volunteers collect reliable data in the field, use the **Water Quality Indicators** on the menu
