

STERISOL SENSE Liquid Soap

Properties

Sterisol SENSE is an extra-gentle and highly effective liquid soap, specifically developed for environments requiring frequent hand washing. The formulation is enriched with a high content of moisturizing agents that actively help the skin retain its natural softness and barrier function, even under repeated stress.

To minimize the risk of skin irritation, eczema, or allergic reactions, SENSE liquid soap is free from parfum, colorants, and preservatives. The product is also certified by Allergy Certified, ensuring that its ingredients have been carefully evaluated and are safe for even the most sensitive skin.

Fields of Application

Thanks to its unique formulation, SENSE liquid soap is the natural choice for environments with the highest demands on hygiene and skin health. The soap is specifically designed for professionals in settings such as health-care, care services, and laboratory environments, where frequent hand washing is essential and the skin requires maximum protection against dryness.

By combining effective cleansing with moisturizing properties, SENSE liquid soap helps maintain an intact skin barrier—even during long working hours under demanding conditions.

To ensure the system's unique hygiene benefits and leak-proof performance, the product should always be used with the corresponding dispenser from the Sterisol System.

Sterisol System is designed to ensure the highest level of hygiene and minimal waste. Our dispensers are easy to install, simple to keep clean, and compatible with all products in our range. The system guarantees completely airtight storage of the contents right up until use.

Tests

Sterisol SENSE liquid soap is certified with the internationally recognized Allergy Certified label.

Environment

SENSE liquid soap is **Nordic Swan Ecolabel** certified and based on readily biodegradable raw materials. The system is designed for minimal resource consumption: a 700 ml pouch requires only 11 g of plastic, representing more than an **80% reduction** compared to a traditional bottle (70 g). With a discharge rate of up to 99%, both product waste and overall waste volume are minimized.

Ingredients

Aqua, Sodium Laureth Sulfate, Sodium Chloride, Glycerin, Cocamidopropyl Betaine, PEG-4 Rape-seedamide, PEG-7 Glyceryl Cocoate, Citric Acid, Octadecyl di-t-butyl-4-hydroxyhydrocinnamate.

How to use

- 1.** Wet your hands with lukewarm water.
For heavy industrial soiling, apply the soap directly to dry hands for extra cleaning power.
- 2.** Dispense soap and massage thoroughly until a lather forms. Be sure to cover fingertips and spaces between fingers.
- 3.** Rinse hands thoroughly under running water until all soap is removed and the skin feels completely clean.
- 4.** Dry your hands with a paper towel. Avoid using textile towels, as they can quickly become unhygienic.
- 5.** Turn off the tap using the paper towel to prevent re-contamination. If needed, follow up with a suitable hand cream to support the skin's natural barrier.

To ensure the system's unique hygiene benefits and leak-proof performance, Sterisol SENSE should always be used with the corresponding dispenser from the Sterisol System.
