

STERISOL ULTRA Liquid Soap

Properties

Sterisol ULTRA is a mild, high-performance liquid soap, specially developed for workplaces where the demands for hygiene and skin care are high. Its synthetic formula cleans deeply without disrupting the skin's natural protective barrier, making it ideal for frequent use throughout the workday.

To ensure the highest possible safety and sustainability, ULTRA liquid soap is completely free from preservatives and colorants. With a skin-friendly pH value of 5.5, it also cares for sensitive skin and helps maintain its natural balance, day after day.

Fields of Application

Thanks to its versatile profile, ULTRA liquid soap is a complete solution for modern workplace hygiene. It works just as effectively as a hand soap at the sink as it does for gentle full-body cleansing in the shower. The formula is also technically balanced to maintain its rich lathering performance and effectiveness regardless of water hardness or temperature—providing reliability in demanding work environments.

The product can easily be adapted to the level of soiling for optimal results:

- **Daily hygiene:** Apply to wet skin for gentle cleansing.
- **Enhanced cleaning effect:** For heavier soiling, apply the product to dry hands before rinsing to maximize its cleansing properties.

Parfum

Tests

The product has been dermatologically tested with excellent results. Irritation level 0.

Environment

ULTRA liquid soap is **Nordic Swan Ecolabel** certified and based on readily biodegradable raw materials. The system is designed for minimal resource consumption: a 700 ml pouch requires only 11 g of plastic, representing more than an **80% reduction** compared to a traditional bottle (70 g). With a discharge rate of up to 99%, both product waste and overall waste volume are minimized.

Ingredients

Aqua, Sodium Laureth Sulfate, Sodium Chloride, Glycerin, Cocamidopropyl Betaine, PEG-4 Rape-seedamide, PEG-7 Glyceryl Cocoate, Parfum (fragranced version only), Citric Acid, Octadecyl di-t-butyl-4-hydroxyhydrocinnamate.

How to use

- 1.** Wet your hands with lukewarm water.
For heavy industrial soiling, apply the soap directly to dry hands for extra cleaning power.
- 2.** Dispense soap and massage thoroughly until a lather forms. Be sure to cover fingertips and spaces between fingers.
- 3.** Rinse hands thoroughly under running water until all soap is removed and the skin feels completely clean.
- 4.** Dry your hands with a paper towel. Avoid using textile towels, as they can quickly become unhygienic.
- 5.** Turn off the tap using the paper towel to prevent re-contamination. If needed, follow up with a suitable hand cream to support the skin's natural barrier.

To ensure the system's unique hygiene benefits and leak-proof performance, Sterisol ULTRA should always be used with the corresponding dispenser from the Sterisol System.
