

Luphenil Pre- & After Work Creme

Properties

Luphenil Pre- & After Work Cream is a water-in-oil emulsion with a lipid content of approximately 50%. It forms a caring film that remains on the skin and provides a long-lasting emollient effect.

The product is fragrance-free, free from colourants and contains carefully selected raw materials. It is economical in use, pleasant to apply and easily absorbed by the skin. The pH value is approximately 5.

Field of Application

Luphenil Pre- & After Work Cream is used both before the work shift and after the working day has ended. It is particularly suitable for people whose hands are frequently exposed to wet or damp work, stubborn dirt or other demanding working conditions.

The cream helps care for and strengthen the skin barrier and is a good choice for dry or very dry skin. It can be used on the whole body, but should not be applied in the immediate eye area.

Luphenil withstands repeated hand washing while maintaining its effect and can also be used as a problem-solver for extremely dry skin and dry patches. The product is supplied in a convenient 50 ml tube that is easy to carry,

Luphenil Pre- & After Work Cream
