

STERISOL SENSE+ Hand Disinfectant

Properties

SENSE+ is a liquid, fragrance-free hand disinfectant developed for both hygienic and surgical use. The product is based on pharmaceutical-grade bioethanol, denatured with isopropanol and t-butanol.

The formula contains cetyl alcohol and glycerin, which help counteract drying of the skin. As the product is free from thickening agents, it can be used regularly and in larger amounts without leaving residue on the skin. This makes it particularly suitable for environments where gloves are frequently used.

The product should be used with the intended dispenser to prevent leakage. In Sterisol's 0.7-litre dispensers, the product dispenses approximately 1.5–2 ml per dose. Instructions for hygienic and surgical use are provided in the product data sheet.

Field of Application

Surgical Hand Disinfection

The product should be used in accordance with national or local recommendations for surgical hand disinfection. See also the instructions for use on the next page.

Hygienic Hand Disinfection

The product is suitable for hygienic use in healthcare, the food industry, preschools and any environment where regular hand washing with soap is not possible or sufficient.

Sterisol System is designed to ensure the highest level of hygiene and minimal waste. Our dispensers are easy to install, simple to keep clean, and compatible with all products in our range. The system guarantees completely airtight storage of the contents right up until use.

Ingredients

Active substances: Ethanol (77.5% w/w), isopropyl alcohol (11% w/w).

Ingredients: Aqua, glycerin, cetyl alcohol and t-butyl alcohol.

Total alcohol content: 88.5% w/w.

Tests

The product is certified and tested in accordance with the following standards:

EN-standard	Contact time
EN 1500 - Hygienic hand disinfection	30 sec
EN 12791 - Surgical hand disinfection. Tested for both short- and longterm efficacy. Effective for up to 3 hours.	90 sec
EN 13727 - Bactericidal efficacy	30 sec
EN 13624 - Yeastocidal efficacy	30 sec
EN 14476 - Virucidal efficacy against both enveloped and non-enveloped viruses (Adenovirus, Murine Norovirus)	30 sec

Classification

Hand disinfectant for hygienic and surgical use.
Classified as a biocidal product under Regulation (EU) No 528/2012 – PT1.

Environment

Sterisol System is designed for minimal resource consumption: a 700 ml pouch requires only 11 g of plastic, representing more than an **80% reduction** compared to a traditional bottle (70 g). With a discharge rate of up to 99%, both product waste and overall waste volume are minimized.

How to use

Hygienic Hand Disinfection

Hands must be clean and completely dry before hand disinfection is performed. Cup one hand and apply at least 3 ml of Sterisol Hand Disinfectant SENSE+.

Rub thoroughly over all areas of the hands for **at least 30 seconds**, or until the disinfectant has evaporated and the skin feels dry again.

Surgical Hand Disinfection

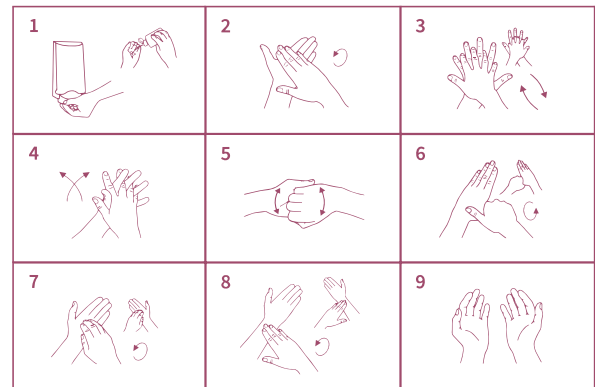

1. Wash hands and forearms with Sterisol Liquid Soap before using Sterisol Hand Disinfectant SENSE+. Dry hands and forearms completely with a disposable paper towel.

2. Apply a generous amount of Sterisol Hand Disinfectant SENSE+ so that the skin remains wet for **90 seconds**.

3. Ensure that the product covers all surfaces of the hands, wrists and forearms up to the elbow. Massage thoroughly into the skin for at least 90 seconds.

4. Allow the skin to dry completely before putting on gloves.

If gloves are punctured or torn during surgery, they should be removed. The hands may then have become contaminated, and hand disinfection should be repeated according to the instructions above.

Use biocides safely. Always read the label and product information before use.

Highly flammable liquid and vapour. Causes serious eye irritation.

Important!

Hands and forearms must be completely dry before using Sterisol Hand Disinfectant SENSE+.

Rub the product thoroughly into the skin for the full specified contact time: at least 30 seconds for hygienic hand disinfection and at least 90 seconds for surgical hand disinfection.

For surgical hand disinfection, local hygiene routines and guidelines must always be followed. The instructions above describe the recommended use of Sterisol Hand Disinfectant SENSE+.
