US oil groups in line for \$63bn windfall from Gulf war disruption

American producers will be among biggest beneficiaries if crude prices average \$100 a barrel this year

The release of this record represents a key moment in the history of
recorded music. You are holding the first release of actual recordings
from the future, captured by two intrepid time travellers thanks to
some remarkable quantum time travelling technologies developed in
a small town in the southwest of England. It is as historic a moment as
the first telephone call, the invention of the Internet, the first telegram.
