

For Technology Service Providers (TSPs)

Augment bench capacity → deliver projects faster → grow more profitably

Summary

Scale cybersecurity delivery instantly — boost revenue, reduce costs, and increase client trust with Zalow's AI-powered marketplace of vetted experts.

TSP Benefits

-  Find the right people at the right time
-  Efficiently augment delivery capacity
-  Easily add or bundle new services
-  Increase deal size and margins
-  Accelerate your clients' time-to-value

How Does Zalow Work?

1. Join the platform as a client
2. Post a fixed-fee or T&M project
3. Get matched with vetted experts
4. Receive proposals and extend an offer
5. Manage and pay securely via escrow
6. Service providers may also earn more by referring clients/experts to Zalow

Features

360° Trust Score

KYC & Peer Vetting

AI-Scoping & Matching

Service Delivery Guarantee

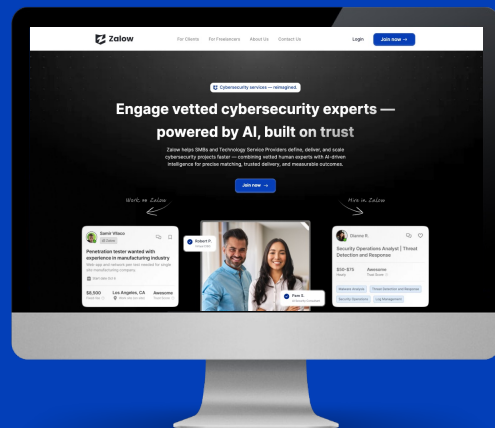

Flexible Engagement Models

For Technology Service Providers (TSPs)

Augment bench capacity → deliver projects faster → grow more profitably

Common TSP Use Cases

Augment and extend your capabilities with Zalow experts to provide:

1. App, cloud and network pen testing
2. Compliance and framework support
3. 24x7 SOC and incident response
4. Cloud and infrastructure security
5. vCISO and strategic advisory services
6. Client awareness and security training
7. AI and emerging tech security

TSP Business Impact

-  Improve project margins up to 30%
-  Reduce bench time up to 40%
-  Capture missed revenue opportunities
-  Lower project time-to-fill by weeks
-  Eliminate risk in sourcing and delivery
