

## DATABASE MODERNISATION

Expensive Oracle or Microsoft database licensing costs?

Slow performance throughput?

Database not sized for peak usage?

**D55 can migrate any database for a fixed price, results guaranteed.**

D55's database modernisation service is designed to migrate any SQL Server or Oracle databases to a serverless Aurora Postgres platform, delivering blistering speed and incredible cost savings. No matter the complexity of your database, D55's robust, repeatable methodology and advanced automation tools ensure a smooth transition.

Starting with a free, low-risk planning assessment, we map out your system usage and plan the migration, highlighting where testing resources are needed. We take full ownership of the migration, offering a guaranteed outcome for a fixed price. This service addresses the problems of high licensing costs, slow performance, and peak usage sizing, delivering significant in-year savings and enhanced scalability.

### Enhanced Performance

Aurora Postgres offers improved performance and scalability, ensuring that your applications can handle increased workloads and deliver faster response times.

### Cost Savings

By migrating to Aurora Postgres, you can significantly reduce your database licensing costs and achieve substantial savings in your IT budget.

### Scalability

The serverless architecture of Aurora Postgres allows for automatic scaling based on demand, ensuring that your database resources are optimally utilised without manual intervention.

### Expertise & Support

Our team of experienced professionals takes full ownership of the migration process, providing you with expert guidance and support throughout the transition.

### Guaranteed Outcome

We offer a fixed-price guarantee, ensuring that you achieve the desired migration outcomes without unexpected costs or delays.

## Fixed Price with Guaranteed Results

Our team takes full ownership of the migration process, providing a guaranteed outcome for a fixed price. This end-to-end service ensures that you have a single point of accountability, reducing the complexity and stress associated with the migration.

## Free, Low-Risk Planning Assessment

We start with a complimentary planning assessment to map out your existing system usage and identify the best path to migration. This low-risk assessment helps in understanding your current setup and planning the migration process, making it clear where your testing resources are needed.

## Robust and Repeatable Methodology

Our migration service employs a well-defined and repeatable methodology that ensures consistency and reliability throughout the migration process. This structured approach minimises risks and ensures a smooth transition to the new platform.

## Significant In-Year Savings

Migrating to Aurora Postgres drives significant cost savings, particularly in terms of licensing costs. By replacing expensive Oracle or Microsoft database licenses with the more cost-effective Aurora Postgres, you can achieve substantial financial benefits within the first year.

## Tooling Automation

The service leverages advanced automation tools to streamline the migration process. These tools help in mapping your existing database structures, migrating data, and configuring the new environment, significantly reducing manual effort and the potential for errors.
