

CLOUD CONSULTANCY AND STRATEGY

Designed to address:

- Complex AWS needs
- Technical or strategic gaps
- The need for cost management
- The need to improve scalability and performance
- The need for continuous improvement

D55 provides expert guidance and hands-on support for all your AWS needs. From environment optimisation and multi-region configuration to testing pipeline deployment and cost management, D55 has the expertise to help.

Our AWS accredited experts offer tailored solutions, whether you need hands-on technical support or strategic leadership. We also provide training and upskilling to empower your team. With D55, you have a trusted partner to guide you through every step of your AWS journey.

Comprehensive Scope: We can optimise your AWS environment to run efficiently and cost-effectively. This includes performance tuning, resource optimisation, and configuration adjustments tailored to your specific needs.

Hands-On and Strategic Leadership: Whether you need practical, hands-on technical support or strategic leadership for complex cloud projects, D55 offers the right blend of skills.

Multi-Region Configuration: Our experts can ensure your applications and services are resilient and performant across different geographic locations.

Testing Pipeline Deployment: We assist in designing and deploying robust testing pipelines, including CI/CD, that integrate seamlessly with your development processes.

Cost Optimisation (FinOps): Our FinOps services ensure you are getting the best value from your cloud investments, identifying cost-saving opportunities without compromising performance.

AWS Accredited Experts: Whether you require technical tweaks, strategic advice, or comprehensive project management, our team is equipped to provide solutions that enhance your AWS environment.

Training and Upskilling: D55 provides training and upskilling services to empower your team with the latest AWS knowledge and best practices. This includes tailored training sessions, workshops, and ongoing support to ensure your team is proficient in managing and using AWS technologies.
