BricsCAD® V26

BricsCAD Levels

There are two base levels of BricsCAD to choose from. To put it simply:

BricsCAD Professional

Includes ACIS 3D solid modelling, parametric components, Point Cloud support, Civil tools, such as TIN surface creation, LandXML Import/Export, GIS Import/Export, and import of Civil3D data to .dwg. In addition, it provides access to all programming options (including VBA), meaning you can run any of the 3rd party applications available for BricsCAD. BricsCAD Professional is comparable to the full version of AutoCAD but with a much larger feature set.
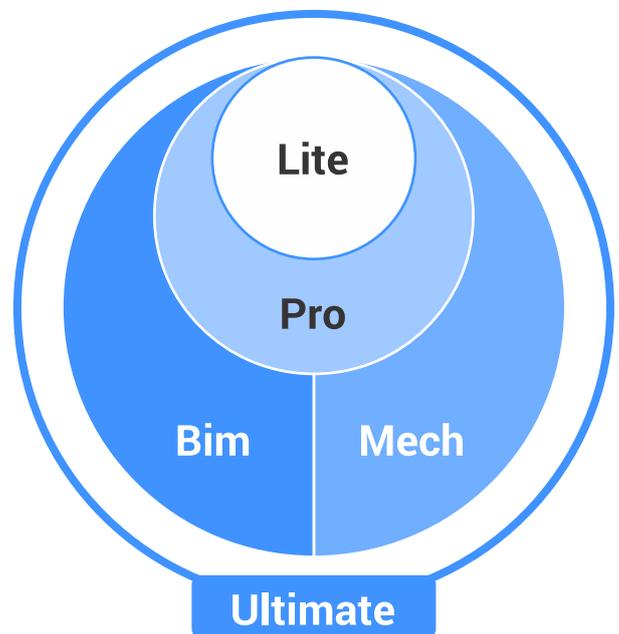

BricsCAD Lite

Essentially 2D only (still has 3D wireframe capabilities) and has limited programming options. BricsCAD Lite is comparable to AutoCAD LT but has a significant advantage because it supports LISP (including Visual Lisp) programming, and network license options.

Building on top of the BricsCAD Professional are three BricsCAD verticals that provide considerable new functionality to the .dwg platform. These products are:

BricsCAD Mechanical includes tools for creating mechanical components and assembly, working in sheet metal, parametric components, piping, and automated documentation tools.

BricsCAD BIM combines the simplicity of Sketchup, with the precision of .DWG. It includes powerful tools for automatic feature recognition and manipulation, customisable profile libraries, and extensive documentation tools. It adds Point cloud feature recognition. It has the ability to open files from Rhino (.3DM), Sketchup (.SKP), and Revit (.RVT, .RFA), and exchange (import/export) BIM data via .IFC.

BricsCAD Ultimate is a combination of BricsCAD BIM & BricsCAD Mechanical, providing access to the full suite of tools available on the BricsCAD platform.

Licensing

It's your choice.

Whether you prefer Perpetual or Subscription licenses, need different license levels, or want to choose between single-user and network deployments, BricsCAD gives you the freedom to select the option that best fits your budget and your workflow requirements. The choice is yours!

Network License. In addition to single stand-alone licenses, BricsCAD also offers flexible Network License options. A Network License allows you to share BricsCAD seats among multiple users on your network, making it ideal for organisations with multiple casual or part-time users, or for those wanting to centralise BricsCAD license management.

Management is straightforward, and you can make BricsCAD available to as many users as required. Network users can also "check out" a license for offline use, enabling continued work away from the office. While the upfront cost of a network license is higher than a single-user seat, the ongoing cost per user can be significantly lower when shared across several team members.

Pricing (exc. GST)

The following tables give a summary of the available BricsCAD pricing options on a per seat basis.

Perpetual Licenses: Perpetual Licenses are just that. Pay once and continue to use for as long as you have a system to support it. Maintenance is mandatory for all new license purchases for the first year. Annual maintenance is optional from the second year on and is the most cost-effective way to keep your BricsCAD up to date. Old BricsCAD licenses, from the three previous releases, can be used to upgrade to the current version at a discount.

Perpetual	Single		Network	
	New License*	Maintenance	New License*	Maintenance
BricsCAD Lite	$1,332	$222	$13,320†	$2,220†
BricsCAD Professional	$2,760	$460	$5,520	$920
BricsCAD BIM	$4,260	$710	$8,520	$1,420
BricsCAD Mechanical	$4,068	$678	$8,136	$1,356
BricsCAD Ultimate	$4,752	$792	$9,504	$1,584
BricsCAD Communicator	$1,272	$212	$2,544	$424

Subscription Licenses: Prefer a subscription (rental) based option? That's available too.

Subscription	Single / Volume		Network	
	1-year	3-years	1-year	3-years
BricsCAD Lite	$595	$1,595	$5,950†	$15,950†
BricsCAD Professional	$1,220	$3,310	$2,440	$6,620
BricsCAD BIM	$1,900	$5,115	$3,800	$10,230
BricsCAD Mechanical	$1,815	$4,900	$3,630	$9,800
BricsCAD Ultimate	$2,120	$5,690	$4,240	$11,380
BricsCAD Communicator	$572	$1,540	$1,144	$3,080

* Price is inclusive of maintenance & support. This is mandatory for the first year for perpetual licenses.
† Price is for 5 seats. New BricsCAD Lite network licenses are only available to purchase in increments of 5 seats.

Procuret

We have partnered with Procuret to provide clients with the option of spreading the cost of purchase into manageable monthly payments.

Training & Support

Bricsys have the following free resources available to learn BricsCAD:

Bricsys Help Center

BricsCAD Forum

Bricsys Learning | Bricsys

Bricsys - YouTube

If you need more support than this, then we provide training and support options for BricsCAD. Whether you are new user to CAD or are looking for help in making the transition from AutoCAD® to BricsCAD, we can help you. Please see the support and training sections of our website for more details.

About BricsCAD

You can find out more about BricsCAD from the following sources:

Find out all the details on the latest release along with an indication on the future roadmap. Be sure to check out the breakout sessions for in depth details on new features and functionality.

Access a detailed feature comparison between the various BricsCAD levels as well as AutoCAD®.

Bricsys has long provided a great deal of detail on what has been added, fixed, or improved with the latest BricsCAD update. Well worth a look as part of any new install or upgrade.

Autopath
Stringer Topo
12D Synergy
Communicator
STEP

One of the key benefits of BricsCAD is that it has a wealth of Add-on modules to extend its capabilities and plugins to connect it with other applications. Furthermore, many of these 3rd party applications have been ported from AutoCAD® to run with the same features and functionality on BricsCAD. We are a partner for the following Add-ons:

Communicator for BricsCAD - Extends the Import/Export capabilities to add support for the common Mechanical CAD (MCAD) file formats, such as STEP, SolidWorks, Inventor, and Catia.

> **Read more about Communicator**

Civil Site Design – Provides you with a full featured Civil Design application on top of BricsCAD.

> **Read more about Civil Site Design**

Stringer Topo – Simplifies and automates the processing of topo-graphical surveys from the field.

> **Read more about Stringer Topo**

Autopath – Professional, easy to use swept path vehicle analysis for BricsCAD.

> **Read more about Autopath**

Spatial Manager – Allows you to easily work with GIS related data and aerial imagery.

> **Read more about Spatial Manager**

Looking for other add-ons? You will find hundreds more in the application area of the Bricsys website.
