Autopath Professional

Autopath is a professional software solution for vehicle swept path analysis used by civil engineers, transportation professionals, architects, and urban planners. Autopath enables the simulation and analysis of vehicle manoeuvres and more.

Autopath is a very straight forward application to use, features include:

- Access to a large library of vehicles, including New Zealand and Australian standard libraries.
- Horizontal and vertical analysis
- Analyse forward and reverse vehicle movement.
- Custom vehicles creation
- Import Google maps imagery.
- Clash detection
- Vehicle path reports
- Export to Google

Autopath is available run as stand-alone or network and has flexible subscription options.

Autopath Ultimate

Autopath Ultimate software expands on the functionality of the professional version to add:

- 3D vehicle animation
- 3D solid vehicle modelling

CAD platforms

Autopath is supported on the 64bit version of the following CAD platforms:

- AutoCAD, AutoCAD Civil 3D or AutoCAD Map 3D, versions 2020 - 2026
- BricsCAD Pro or greater, versions V23 - V26
