Technology Minerals Plc

("Technology Minerals" or the "Company")

Admission and Commencement of Dealings

Technology Minerals Plc (LSE: TM1), the UK listed company focused on building national resource and manufacturing resilience, is pleased to announce that Admission of the Ordinary Shares, the Placing Shares and the Settlement Shares to the Equity Shares (Transition) category of the Official List of the Financial Conduct Authority and to trading on the Main Market for listed securities of the London Stock Exchange plc has become effective and that dealings for normal settlement will commence at 8.00 a.m. today.

Total Voting Rights

Following Admission, the Company has 12,495,477,697 ordinary shares of £0.0005 each in issue. The Company holds no shares in treasury.

Therefore, the total number of voting rights in the Company is 12,495,477,697. This figure may be used by shareholders as the denominator for the calculations by which they will determine if they are required to notify their interest in, or a change to their interest in, the Company under the FCA's Disclosure Guidance and Transparency Rules.

ISIN

The ISIN for the ordinary shares of £0.0005 each is GB00BWYF7709.

About Technology Minerals Plc

Technology Minerals is developing the UK's first listed, sustainable circular economy for battery metals, using cutting-edge technology to recycle, recover, and re-use battery technologies for a renewable energy future. Technology Minerals is focused on raw material exploration required for Li-ion batteries, whilst solving the ecological issue of spent Li-ion batteries, by recycling them for re-use by battery manufacturers.

Technology Minerals' Mantle Strategy

The Mantle strategy is Technology Minerals' repositioning as a listed national resilience company, built on the conviction that the private sector must play a central role in securing the UK's sovereign supply of critical resources, capabilities and infrastructure. It aligns the Company directly with the UK Government's Critical Minerals Strategy (Vision 2035) and its targets for domestic production, recycling and reduced reliance on single-country supply.

Mantle is executed across three pillars: Natural Resources (domestic reclamation, extraction, international exploration and stockpiling, anchored by Recyclus Group and the Company's mineral exploration assets); Critical Capabilities (foundational midstream and downstream capacity); and an Enabling Ecosystem (the partnerships and investments needed to pre-empt emerging requirements). Delivery will begin with a consolidation phase that resets the balance sheet and catalyses existing assets, followed by execution of a near-term pipeline of value-accretive opportunities - several revenue-generating and aligned with UK defence and national resilience requirements - as the Company scales towards becoming a critical part of the UK's resilience ecosystem.
