

ECO WASH BAY – HEAVY DUTY

MODULAR WASH BAY FOR HEAVY PLANT AND EQUIPMENT C/W CLOSED-LOOP WATER RECOVERY

High pressure cleaning of heavy plant and equipment can cause no end of issues and waste gallons of water. The EWBHD wash bay can be assembled by 3 men and a fork truck near 3-phase power and water supply, and you're up and running with a wash bay for 20-ton machines and waste water recovery with 15 lpm cold water pressure washer.

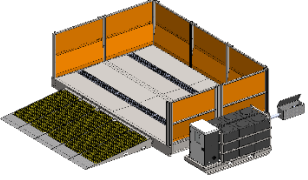

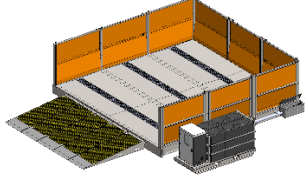

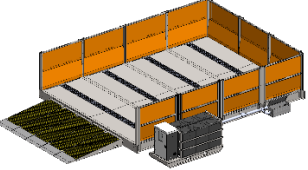

FEATURE

- Heavy load capacity modular bases for plant and equipment
- HD access ramps
- 1.75m high side panels to retain overspray from the washer.
- Link the pipework and sump box with a submersible pump.
- Closed-loop water recovery with silt, oil removal, and final particulate and UV filtration.
- 250 bar 15 LPM cold water pressure washer pump with 20 m hose.
- Pump and filtration in a metal lockable cabinet with a heater and control panel.
