May Units of Study

ELA: HMH Module 6: *Imagine! Invent!* Students will engage with texts and media to understand how ideas and perseverance lead to inventions and new possibilities.

Math: *Time and Measurement*—Students will be understanding time and solving problems involving estimation and measurement of time.

Science: *Environmental and Survival*—Students will learn how living organisms use their environment and create solutions to meet their needs and solve problems.

Social Studies: Students will continue exploring China's physiography and examine how human-made features address problems, the solutions created, and their impacts.
