

WE ENVISION IT.

Safety monitoring (PPE)

Our AI-powered video analytics deliver advanced safety compliance tracking in industrial environments. Automatically detect and verify workers' PPE usage in real-time, instantly identifying missing or improperly worn safety gear such as hard hats, safety glasses, gloves, high-visibility vests, and protective footwear.

FEATURES

- ✦ Monitoring safety violation incidents and dangerous activity.
- ✦ Recognition of numerous PPE equipment, including helmets, jackets, boots, glasses and other items.
- ✦ Integrations with external systems to send immediate notifications about PPE violations.
- ✦ Compatible with simple CCTV cameras.

MOST BENEFICIAL TO

- ✦ Organizations operating in large and/or dangerous environments that require strict safety measures.
- ✦ Organizations struggling to recognize and swiftly tackle safety violations before accidents happen.
