

URBN

PATIO DOORS

Live beautifully, design boldly.

Escape daily!

The URBN difference starts with its frame

Strength meets Style

The URBN folding door sleek frame, is precision-built with corner joiners locked in with machine screws for a rock-solid structure.

Superior Energy Efficiency, Title-24 complainant

Designed to reduce heat loss in winter and heat transfer in the summer.

Delivers a solid 0.28 U-factor.

Glazing

Standard double-glazed tempered glass units, filled with argon gas and sealed with a high-performance super-spacer.

Innovative Weather Protection

Built-in weatherstripping means no more torn, loose, or ugly strips, just clean lines and reliable sealing that keeps the elements out and performance high.

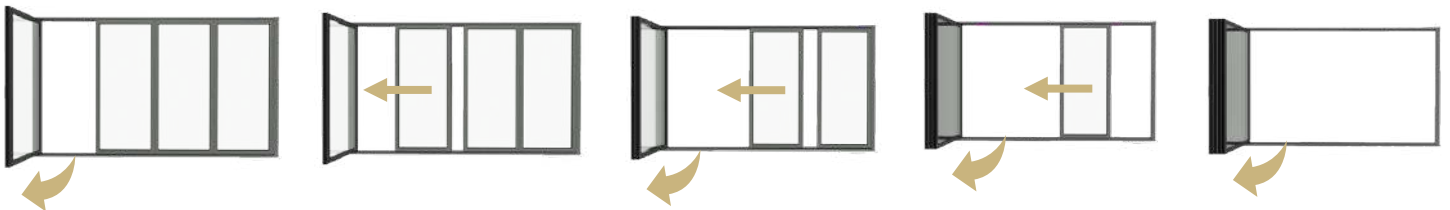

Sleek Frame

Encased glass units boost security and strength while slimming the frame, giving you more glass, better views, and a clean, modern look.

Say goodbye to Thermal-Bowing

The Pultrum core, an advanced composite, delivers serious strength with minimal heat transfer. That means a frame that remains straight, no matter the weather.

Designed to operate the panels with one hand and zero effort.

To open: Start by opening the main door, slide the next panel towards the main door end until stops, grab the concealed handle and turn it upwards, fold the panel out and stack next to the main door, repeat, to open the rest of the panels.

To close: Swing the last panel open fully onto the track, grab the concealed handle and turn it downwards. Slide the panel back to its original position, repeat the same with the remaining panels to close, last to close will be the main door.

Innovative smart design that delivers a better door and saves you money

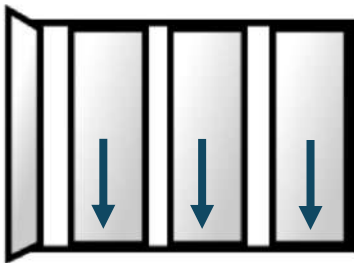

Functionality and flexibility: Independent panels give you total control. You decide how an interior space breathes and flows.

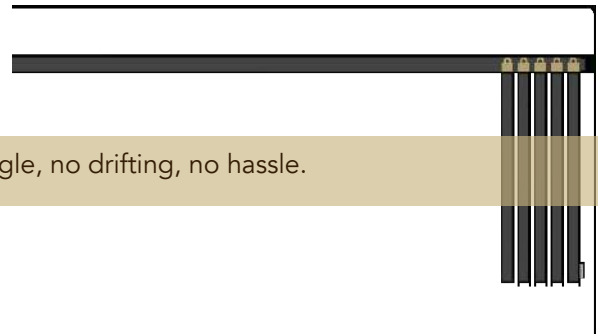

More opportunities and ways to enjoy any space, all year round!

New Hold-open hardware keeps the opened panels at a 90-degree angle, no drifting, no hassle.

Bottom-rolling system: Means the weight of the panels rest on the bottom track, not the header. This system can easily be retrofitted into an existing opening, and it does not require extra structural reinforcement and are easier to install

A Smart lock in every door

A 3-point lock, locks automatically when closed and can be controlled from anywhere, even if the power goes out.

Access your way:

- Smartphone
- Keypad code
- Key fob
- Fingerprint
- Built in alerts

A push of a button lets you open the door from the inside.

Folding Doors

Flag Doors

Corner Doors

Screen Systems

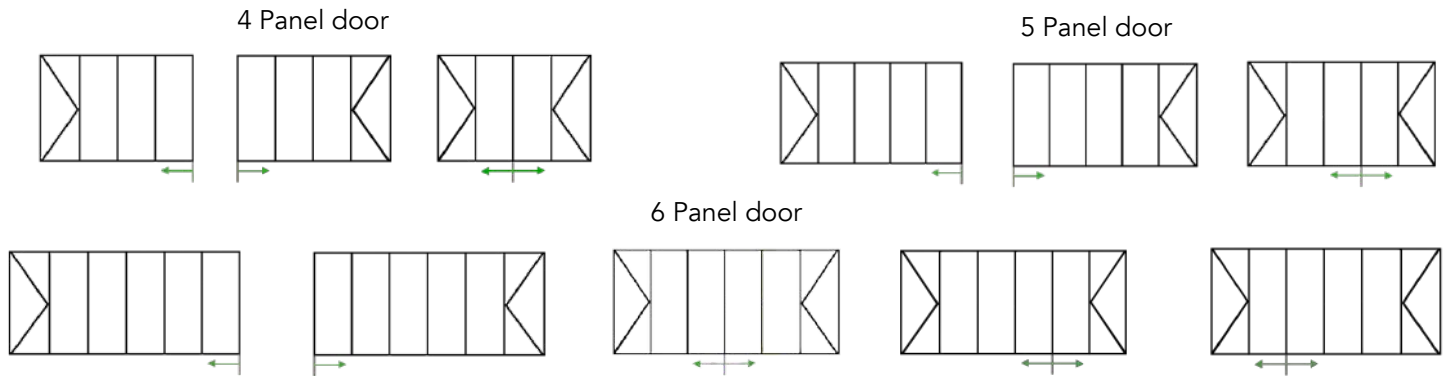

Screen, Blind or combine both in one

URBN INSTALLATION ASSURANCE SERVICES

At URBN Patio Doors, we understand the challenges homeowners and contractors face, when trying to find the right installer for your folding doors and screens.

We eliminated that concern by including guided installation with your URBN PATIO DOORS Purchase. Not through manuals or videos. But in-person, an URBN technician on site, to guide your installer, verify the installation, program your smart lock and walk you through operation and care.

The result?

Pure peace of mind and complete satisfaction with your purchase.
