1. NATURE OF OPERATIONS, CONTINUANCE OF OPERATIONS AND GOING CONCERN

URZ3 Energy Corp. (formerly Nevada Exploration Inc.) (the “Company” or “URZ”) was incorporated on April 6, 2006 under the Canada Business Corporations Act and on February 5, 2015 the Company was incorporated pursuant to the British Columbia Business Corporation Act. The Company is in the business of acquiring and exploring mineral properties.

The Company is listed on the TSX Venture Exchange (“TSX-V”) under the trading symbol “URZ” and on the OTCQB marketplace under the trading symbol “URZEF”. The Company’s head office is located at Suite 1480 - 885 West Georgia Street, Vancouver, BC V6C 3E8. The Company’s registered and records office is located at 700 West Georgia St., 25th Floor, Vancouver, BC V7Y 1B3.

These condensed consolidated interim financial statements are authorized for issue on behalf of the Board of Directors on March 27, 2025.

Continuance of operations and going concern

These condensed consolidated interim financial statements have been prepared on a going-concern basis which presumes the realization of assets and discharge of liabilities in the normal course of business. The financial statements do not include adjustments to amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue operations. The business of mining and exploring for minerals involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations. The Company’s continued existence is dependent upon the preservation of its interests in the underlying properties, the discovery of economically and recoverable reserves, the achievement of profitable operations, the ability of the Company to raise additional financing, or alternatively upon the Company’s ability to dispose of its interests on an advantageous basis. The Company has not produced revenues from its exploration activities and does not have a regular source of cash flow. The Company will periodically have to raise funds to continue operations and, although it has been successful thus far in doing so, there is no assurance it will be able to do so in the future. The Company estimates that it will need additional capital to operate for the upcoming year. These material uncertainties cast significant doubt on the Company’s ability to continue as a going concern.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company’s title. Property title may be subject to unregistered prior agreements, unregistered claims and noncompliance with regulatory and environmental requirements.

2. SIGNIFICANT ACCOUNTING POLICIES

Statement of compliance

These condensed consolidated interim financial statements have been prepared in accordance with IAS 34, Interim Financial Reporting (“IAS 34”), as issued by the International Accounting Standards Board (“IASB”) and interpretations issued by the IFRS Interpretations Committee (IFRICs). Accordingly, they do not include all of the information required for full annual financial statements by International Financial Reporting Standards (“IFRS”) for complete financial statements for year-end reporting purposes. These condensed consolidated interim financial statements should be read in conjunction with the Company’s financial statements for the year ended April 30, 2024, which have been prepared in accordance with IFRS as issued by the IASB.

On July 8, 2020, as amended March 3, 2021, and May 3, 2023, the Company entered into an Exploration and Option to Enter Joint Venture Agreement (the “Agreement”) with Austin American Corporation (“Austin”), for an earn in and joint venture agreement on its district-scale Kelly Creek Project (the “Project”) within the Kelly Creek Basin in north-central Nevada. Pursuant to the original agreement, Austin has the right to earn a 51% interest in the joint venture by spending \$5,000,000 by June 1, 2024, with the election to earn an additional 19% by incurring additional yearly expenditures in the amount of \$1,500,000 on or before each of June 1, 2025, June 1, 2026, and June 1, 2027, and by completing a pre-feasibility study on or before June 1, 2028. At the Company’s election, which must be made within 120 days of the approval by the joint venture of a feasibility study, Austin will be obligated to provide the Company’s portion of any debt financing or arrange for third party financing of the Company’s portion of any debt financing required to construct a mine on the project described in a feasibility study in consideration for the transfer by the Company to Austin of a 5-per-cent interest in the joint venture. If a party is diluted to a 10% interest in the joint venture, its interest will be converted to a 10% net profits interest.

Pursuant to the March 3, 2021, amended agreement, Austin has the right to earn a 51% interest by spending \$4,750,000 by June 1, 2025, with the election to earn an additional 19% to a total of 70% by incurring additional yearly expenditures in the amount of \$1,500,000 on or before each of June 1, 2026, June 1, 2027, and June 1, 2028, and by completing a pre-feasibility study on or before June 1, 2029.

Pursuant to the May 3, 2023, amended agreement, Austin has the right to earn a 51% interest by spending \$2,500,000 by June 30, 2025, with the election to earn an additional 19% to a total of 70% by incurring additional expenditures of \$2,500,000 at any time. The Company no longer has the option to require Austin to provide its portion of any debt financing required to construct a mine.

Austin must continue to pay the underlying property lease payments and BLM and county fees to keep the properties in good standing during the term of the agreement.

During the year ended April 30, 2024, Austin terminated certain leases and claim holdings within the Kelly Creek project, representing approximately 60% of the original claim holdings.

7. RESOURCE PROPERTIES (cont'd...)

Kelly Creek (KC) (cont'd...)

On June 3, 2024, Austin and the Company renegotiated the terms of the Option to Joint Venture Agreement on the Kelly Creek Project by extending the date required to earn a 51% interest by two years. Under the terms of the amended agreement, Austin must spend a cumulative total of \$2,500,000 by June 30, 2027, which total includes the amount already incurred on the project by the Company, which is US\$923,757 (approximately 1,275,600). To earn an additional 19% (for a total of 70% interest for Austin) the Company must spend another \$2,500,000 with no time limit and pay the underlying property lease payments and BLM and county fees to keep the properties in good standing.

On June 6, 2024, the Company amended the terms of the Hot Pot Lease by reducing the 2024 and 2025 payments from USD\$30,000 to USD\$20,000 and reducing the 2026 payment from USD\$30,000 to USD\$25,000.

The Hot Pot Lease property and claims that the Company has an interest in that lie within 2.5 miles of its boundaries are subject to a 1.25% royalty in favour of Royal Gold Inc. During the period ended January 31, 2025, the Company gave notice to Royal Gold and Bronco Creek of its intention to drop certain claims and the Genesis lease.

During the period ended January 31, 2025, the Company relinquished 114 claims and terminated the Genesis lease (209 claims), leaving 99 claims and the Hot Pot Lease remaining.

ISR mines. These claims comprise the Company's Dry Fork Project and are believed to host favorable geological structures suggesting prospectivity for uranium exploration.

13. FINANCIAL RISK MANAGEMENT

Fair value

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 – Inputs that are not based on observable market data.

Short term investments are measured at level 1 of the fair value hierarchy. The fair value of short-term investments is measured at the market price of the common shares held at the measurement date. The carrying value of cash and cash equivalents, other receivables, deposits and bonds, accounts payable and accrued liabilities approximate their fair value because of the short-term nature of these instruments.

13. FINANCIAL RISK MANAGEMENT (cont'd)

Financial risk factors

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash and cash equivalents and deposits and bonds. Management believes that the credit risk concentration with respect to cash and cash equivalents, deposits and bonds is remote as it maintains accounts with highly rated financial institutions.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk through the management of its capital structure and financial leverage. It also manages liquidity risk by continuously monitoring actual and projected cash flows. The Board of Directors reviews and approves the Company's operating and capital budgets, as well as any material transactions out of the normal course of business.

As at January 31, 2025, the Company had a cash and cash equivalent balance of \$141,941 (April 30, 2024 - \$307,736) to settle current liabilities of \$69,764 (April 30, 2024 - \$286,357). The Company will need to raise additional funds to meet its obligations as they come due.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates and equity prices.

(a) Interest rate risk

The Company is exposed to interest rate risk to the extent that the cash and cash equivalents maintained at the financial institutions is subject to floating rate of interest. The interest rate risks on cash and cash equivalents, deposits and bonds and on the Company's finance lease obligations are not considered significant.

(b) Foreign currency risk

The Company is exposed to financial risk arising from fluctuations in foreign exchange rates and the degree of volatility of these rates. A significant portion of the Company's expenses are denominated in US dollars. Consequently, certain assets, liabilities and operating expenses are exposed to currency fluctuations. The Company does not use derivative instruments to reduce its exposure to foreign currency risk. Net assets denominated in foreign currency and the Canadian dollar equivalents as at January 31, 2025 are as follows:

	USD		CDN	
Current assets	\$	3,910	\$	5,663
Non-current assets		55,000		79,662
Current liabilities		(22,900)		(33,168)
	\$	36,010	\$	52,157

Based on the above net exposures as at January 31, 2025, and assuming all other variables remain constant, a 10% change in the value of the US dollar against the Canadian dollar would result in an increase/decrease of \$5,216 in comprehensive loss.

14. CAPITAL MANAGEMENT

In order to maintain its capital structure, the Company is dependent on equity funding and, when necessary, raises capital through the issuance of equity instruments, primarily comprised of common shares and share purchase warrants, as well as incentive stock options. In the management of capital, the Company includes the components of equity as well as cash and cash equivalents.

The Company currently has insufficient capital to fund its exploration programs and is reliant on completing equity financings to fund further exploration. The Company is not subject to any externally imposed capital requirements.
