

WHAT TEKMETRIC CAN DO FOR YOUR AUTO SHOP

Tekmetric shifts your shop into high gear, even when your day has a few speed bumps. With cloud-based shop management, you have the tools to revolutionize how you run things. Centralize activity across one or more shops to connect customers, technicians, jobs, inventory, and metrics all in one place you can access from anywhere—including your supply-closet hideout.

OPTIMIZE YOUR SHOP'S PERFORMANCE

Customize digital vehicle inspections. Create entire jobs in one click and minimize downtime with Smart Jobs. Track repairs in real time with status updates, including integrated parts orders. Straightforward workflows connect tasks, automate accuracy, and keep techs moving, even if Tyler spilled the oil again.

"[For] people in the front office, it's really more about saving them time . . . It's all right at their fingertips. They've even customized things in Tekmetric to set them up the way they want to work, like color-coding . . ."

Andy Bizub, Owner at Midwest Performance Cars

MAXIMIZE REPAIR ORDERS

Track and analyze repair orders to see how cash flows through your shop. Real-time data, inventory tracking, and markup matrices inform decisions on parts, labor, and pricing. Use some of that sweet new profit for softer toilet paper.

RO ROI: \$300K in 6 months

Campus Automotive increased revenue by \$300,000 in 6 months. Same car count, same fixed costs—average repair order up by 49%. It used Tekmetric's communication and payment tools to streamline experiences for college-student customers and their out-of-state parents who paid the bills (must be nice).

Tread swiftly with Tire Suite

Get tire specifications within repair orders, register DOT numbers in minutes, and see up-to-date recalls all in one place. Stop spinning your wheels. Start selling more tires.

IMPROVE CUSTOMER SERVICE

Service advisors can skip voicemails and phone tag. Chat naturally with two-way texting and share estimates, inspection reports, images, videos, and invoices. Collect payments via text. Just tell Lisa to take it easy on the memes.

DRIVE DECISIONS WITH REAL-TIME REPORTING

Make informed decisions that benefit your business. Data comes directly from your shop's activity so you can surface insights that really move the needle. Monitor and take action on dozens of metrics, including total repairs, closing ratios, billed hours, and how you acquire customers (if only we could measure your natural charm).

"If you would have asked me six months ago 'How many alignments did you sell?,' I couldn't tell you. At least not quickly. Tekmetric breaks out all of those metrics . . . It gives me the breakdown I need to measure what I'm doing."

Henderson Johnson, Owner at Toyo Automotive
