

WHERE CAN TEKMETRIC DRIVE INNOVATION?

See where Tekmetric helps auto repair shops measure up. Whether you have one shop or many, Tekmetric's cloud-based shop management solution connects the different parts of your shop with straightforward workflows. Automated tools and customizable features create efficiency, foster teamwork, and increase customer satisfaction, even when everyday challenges throw a wrench in the works.

IN THE FRONT OFFICE

Email, text, and calendar tools help you surpass customer expectations. Now, someone just needs to clean the coffee pot.

APPOINTMENT SCHEDULING

Optimize your time slots to say yes to more customers. See cloud-based calendars from anywhere.

CUSTOMER PROFILES

See vehicle information, repair order history, custom tags like MVP or Do Not Service, and all conversations in one place.

CUSTOMER SUPPORT

Two-way texting keeps conversations natural. Share estimates, images, videos, and invoices.

INTEGRATED POINT OF SALE

Send invoices via text or email. Text-to-pay lets customers pay from their phones. Buy now, pay later gets you paid quickly while customers pay over time.

IN THE GARAGE

Improve teamwork and productivity at scale. Handling tasks in one place eliminates distractions—until Larry changes the music. Then, everybody looks up.

VEHICLE INSPECTIONS

Create custom DVIs that techs can follow thoroughly. Take and upload images right to inspections.

REPAIR ORDERS

Populate jobs in repair orders automatically from inspection reports. The whole shop can align on accurate, real-time status updates.

INVENTORY MANAGEMENT

Order and track parts right in repair orders. Monitor stock, and integrate inventory data with repair orders and estimates.

IN THE BACK OFFICE

You're the shop's backbone. Tekmetric helps you grow your business or manage multiple locations. The only thing we can't do is make Rodney show up on time.

REAL-TIME REPORTING

Measure close ratios, repair orders, profitability, and more. Data-driven decisions support growth.

TRAINING

Equip everyone to do their best work with resources, events, and an active online community.

ONGOING SUPPORT

Get responsive support any time you need it. New feature rollouts keep your shop ahead of the competition.
