High-end smart devices

Sensors and alarms

A friendly addition to the home

Air Quality Sensor - How's the air?

This frient lets users know if the air quality at home is bad and informs them when to open a window and get some fresh air inside. The wireless Air Quality Sensor monitors the organic chemicals present in indoor air (the VOC levels), humidity levels, and the temperature at home. The friendly sensor is battery-powered and sends a warning if the indoor air quality gets bad.

Smart Humidity Sensor - Too wet or too dry?

The Zigbee-based Smart Humidity Sensor monitors the level of humidity and the temperature in a room. With this frient, users don't need to spend time worrying about their health or their beloved paintings or inherited belongings in the basement – the frient is looking out for them.

Motion Sensor Pro - Always a frient at home

The Zigbee-based Motion Sensor Pro detects movement, light, and temperature – all in one. It looks after the users' home and loved ones if they're not there, sends a notification if something is wrong, and helps automate their everyday life.

Motion Sensor 2 Pet - A pet-friendly home monitor

The pet immune Motion Sensor 2 Pet monitors movements, light, and temperature. It helps automate daily routines and increase comfort and safety at home. If this frient detects an unexpected visitor, it'll let the user know immediately – but if it's just their cat or dog they won't be bothered by false alarms.

Intelligent Smoke Alarm - More than beep beep

Beep... Beep... Beep... The Zigbee-based Intelligent Smoke Alarm helps protect the home from fire, no matter if someone is home or not. This is a frient with a great volume. It's someone who also warns when users are far from home where even the loudest smoke alarm will have to give up. The smoke alarm is battery-powered and easy to install.

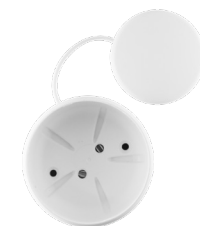

Intelligent Heat Alarm - Fire or just smoke?

The Zigbee-based Intelligent Heat Alarm detects rapidly increased levels of heat and will alert users if it detects fire – not if it's just smoke or dust. In case of fire in the home, the wireless alarm warns users instantly. They'll hear loud beeps and get a notification, allowing them to act right away.

Water Leak Detector - No more drip drip

With the friendly Water Leak Detector installed on the floor anywhere there's a risk of leakages or flooding the user won't doubt if it detects water. This is a loud little frient! The Water Leak Detector also sends a notification, helping users feel at ease, knowing that this frient is watching over the home at all times – even when they're away.

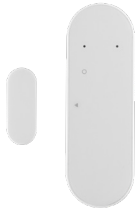

Water Leak Detector Probe - Detect hidden leakages

With the Water Leak Detector Probe, users can extend the frient Water Leak Detector and detect hidden leakages before they can do any damage. It can reach even in the narrowest places of the home. This frient requires the frient Water Leak Detector, it is not a stand-alone device.

Sensors and alarms

A friendly addition to the home

Entry Sensor 2 Pro - Open, close, open

Placed on a door or a window, the Entry Sensor 2 Pro tracks when it's opened and closed. The sensor reminds users if they forgot to close a window and keeps the home safe. They'll have peace of mind knowing that everything is well at home - no matter where they are. The friendly sensor also monitors temperature.

Vibration Sensor - Secure through sensitivity

This Zigbee sensor detects and reports vibration, movement, and temperature in the home. Attached to windows, it detects break-ins or tracks how much elderly relatives use their furniture and appliances at home. Installed on a garage door, it'll act as a tilt sensor to tell the user when the garage door is open.

Smart Siren - Be safe and sound

The Smart Siren is a highly advanced device with a siren and range extender in one. The smart home siren can make loud sounds to scare away intruders from entering the home. With the range extender functionality, the Smart Siren enables the smart home system to cover larger areas and allows the users to include more devices.

Intelligent Keypad - A friendly welcome home

With the Intelligent Keypad mounted by their front door and a connected smart door lock, users can enter their home using a pin code. The Intelligent Keypad ensures secure and keyless entry. The Intelligent Keypad illuminates in the dark, making it easier for users to enter their home during nighttime.

Smart Button - One click fits all

With this friend, users can control their home through a simple push of a button. Through automations for the home, the button can turn off all lights from the bed or activate an at home automation. The Zigbee button can also be used as a doorbell or to turn on an alarm mode. This friend is waterproof and thus suited for indoor and outdoor use.

Zigbee Range Extender - Got you covered

The Zigbee Range Extender repeats the signal within the Zigbee network and enables users to add more Zigbee devices to their smart home. This friend is ideal for any home security system as the included battery backup ensures it's always online and alert - even in case of a power cut.

Smart plugs, relays & meter interfaces

A friendly addition to the home

Smart Plug Mini 2 - On, off, on, off

The Smart Plug Mini 2 lets users remote control and automate their appliances and track electricity consumption - all in one. It's a small but versatile Zigbee switch that connects appliances to the smart home. The user just needs to plug it in a power socket and connect it to the electrical appliance. Easy, right?

Type F (Schuko)

Used in: Germany, Greece, Hungary, Indonesia, Italy, Luxembourg, the Netherlands, Norway, Russia, Spain, and Sweden.

Type G (British)

Used in: UK, Ireland, Hong Kong, Malaysia, Qatar, Saudi Arabia, Singapore, and United Arab Emirates.

Smart Cable 2 - Power off, save money

This is a friend who helps to make the everyday life greener. The Zigbee-based Smart Cable 2 is an electricity usage tracker and a remote switch. Connected to the cord of an electric radiator, fan, or another electrical appliance, it monitors their consumption. The Smart Cable 2 also lets users turn the appliance on and off remotely.

Smart DIN Relay - Gain control, be energy smart

With the Smart DIN Relay mounted on their DIN rail by qualified electrical personnel, users can switch on and off anything connected to an electrical circuit of their home remotely. They can also track the electricity consumption of the appliances connected to the circuit. The Smart DIN Relay includes overload and temperature protection.

IO Module - Bring your wired devices online

With the friendly IO Module, wired devices can be connected to the smart home. Devices can be connected to the inputs to trigger events. By connecting them to the outputs, the users can enable appliances to respond to events.

EMI 2, LED - Become energy-aware

This friend helps users easily keep track of their electricity consumption and identify peaks to help reduce consumption. Mounted on the electricity meter, this friend keeps users informed about their electricity consumption on the smartphone via a compatible hub. And what's more, there's no need for professional help to install it. The user can easily do it themselves.

EMI 2, P1 - Become energy-aware

This friend helps users keep track of their electricity consumption and identify peaks to help reduce consumption. Attached to any electricity meter with an enabled P1 port, this friend keeps the user in the know of their consumption on the smartphone via a compatible hub. Users can easily install this smart electricity tracker themselves.

EMI Norwegian HAN - Become energy-aware

This friend helps users keep track of their electricity consumption and identify peaks to help reduce consumption. Mounted on electricity meters with a compatible HAN interface, the EMI Norwegian HAN tracks consumption remotely via a hub. This friend doesn't require complex installation, the users can easily do it themselves.

Compatible hubs

The frient products require a hub to connect to the smart home. All frients communicate via Zigbee and are Zigbee-certified.

You can always find a list of compatible hubs at:

www.frient.com/compatible-hubs/

Become a distributor

The frient product portfolio is based on more than 18 years of experience in developing Zigbee-based IoT devices.

Over the years, more than 4 million products have been deployed under various brands.

With the frient brand, you can sell reliable and stable products that are based on proven technology and ensure happy customers.

Join the club of 70+ distributors selling the frient devices.

Contact us at: info@frient.com

Why should you become a frient distributor?

Sell mature, tested devices

The frient devices offer you:

- High-end design
- High quality
- Smooth and stable connection with Zigbee hubs

Benefit from joint marketing

We support your business as a frient distributor:

- Be listed on the frient website as a distributor
- Be included in the frient marketing engine: blog and social media posts, newsletters and more
- Be the first to know about new product launches & other updates

What do we need from you?

To enjoy all the benefits of being a distributor, we expect you to offer us some commitment regarding stock and marketing:

- Have all relevant products in your shop & provide forecasts
- Present frient nicely on the website using our images
- Possibilities for joint marketing & trade shows
- Help build the frient brand

Who are you?

Retail distributor	Professional distributor
• Focus on smart home • Experience in building up brands • Sales people promoting your brands • Resources to further build up frient	• Access to professional installers and wholesale companies • Participation in trade shows and fairs • Marketing and brand-building competencies • Interest in actively working with the frient brand

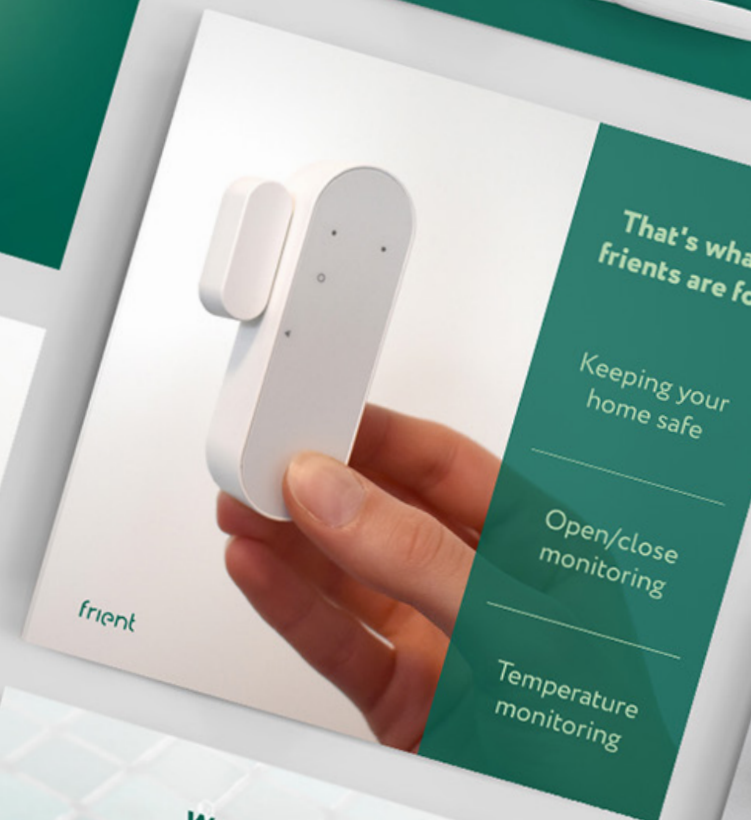

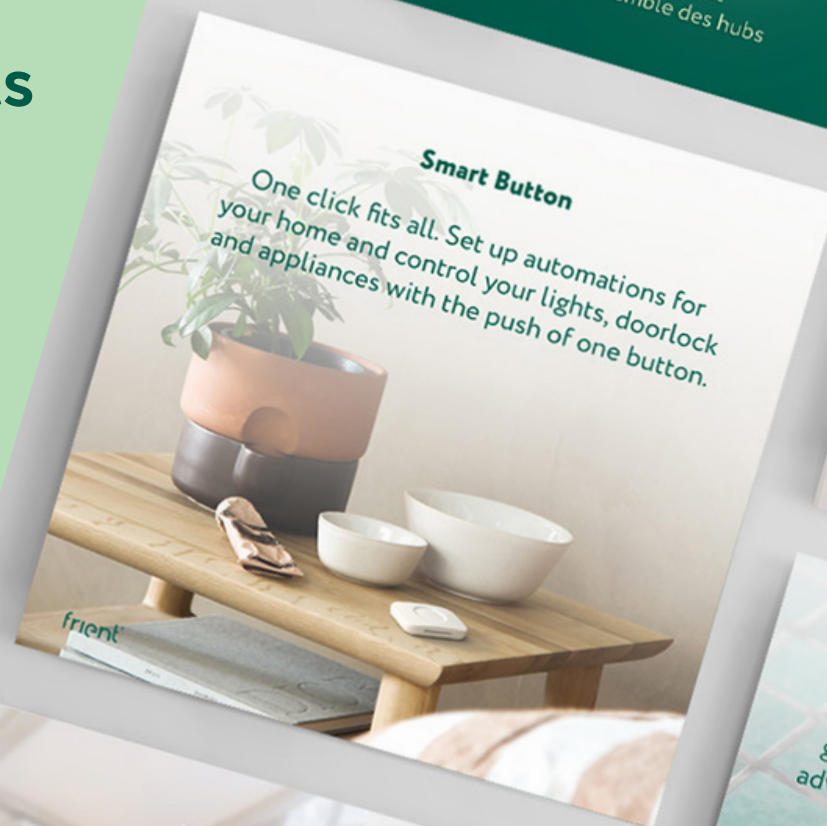

Available for resellers

Marketing materials in 11 languages

We provide you with an extensive selection of texts and images that you can include in your web shop and marketing materials.

In total, the frient drive contains over 2000 files.

Short and long product descriptions and various images are available in: Danish, Dutch, English, Finnish, French, German, Italian, Norwegian, Polish, Spanish, and Swedish.

Say hello to your new frient

Imagine always having a frient who looks out
for what matters most to you.

You know, someone who keeps your loved ones safe and
comfortable. A frient who safeguards your home – and someone
who leads you on the path to a
greener everyday life.

Now that's a frient.
