

iAccess Partners becomes part of v.FISCHER INVESTAS Group

The Swiss fintech company iAccess Partners and the Berne-based v.FISCHER INVESTAS Group are joining forces: as of 1 July 2026, iAccess Partners will become part of v.FISCHER INVESTAS and will continue to operate as an independent subsidiary. Together, the two companies aim to further simplify and expand access to attractive Private Markets investments.

Complementary strengths

Private Markets are increasingly becoming an integral part of modern portfolios, both for institutional investors and private individuals. Through this combination, iAccess Partners brings together its Private Markets structuring and selection expertise with the established, holistic wealth management competence of v.FISCHER INVESTAS. Both companies share the ambition of making the historically complex world of Private Markets investments simple, efficient, and transparent. Together, the partners intend to expand their offering and increase access to Private Markets for a broader circle of qualified investors. At the same time, the partnership with v.FISCHER INVESTAS enables iAccess Partners to further develop its structuring solutions for fund managers and simplify operations in Private Markets.

Continuity and expanded expertise

For clients, partners, and employees of iAccess Partners, this means not only continuity but also a significant expansion of Private Markets and financial know-how. The company will continue under its own name, with its own team, and in operational independence, as a subsidiary of v.FISCHER INVESTAS.

«Combining our experience in holistic wealth management with the proven expertise of iAccess Partners opens up new opportunities for our clients. We are making Private Markets investments more broadly accessible while sustainably strengthening our market position», says Peter Boss, Chairman of the Group Executive Board of v.FISCHER INVESTAS.

At the same time, iAccess Partners will benefit from the established asset management capabilities of v.FISCHER INVESTAS and will further expand and professionalize its Private Markets offering. With this step, iAccess Partners is pursuing the highest degree of institutionalization — for the benefit of the investors who have entrusted, and will continue to entrust, their assets to the company over the long term. The partnership thus represents a key building block for the next growth phase of iAccess Partners.

«We are extremely pleased about the combination with the v.FISCHER INVESTAS Group — a partnership that, for iAccess Partners, marks the beginning of the next growth phase. Combining our Private Markets expertise with v.FISCHER INVESTAS' decades of experience in holistic wealth management allows us to make Private Markets simpler, more efficient and more comprehensively accessible for clients. As an independent entity within the Group, we regard this institutional partnership as a central milestone in expanding our services for private individuals, financial intermediaries and fund managers.», say Dimitri Manser, Nico Meier and Nicolas Werner, Partners of iAccess Partners.

About iAccess Partners: iAccess Partners enables private and institutional investors to invest in Private Markets more easily, securely and efficiently — with low minimum investments, bankable ISINs and a fully digital investment process. In doing so, iAccess Partners creates flexible investment solutions for individual investors, financial intermediaries and fund managers. At the same time, the company covers the entire spectrum of Private Markets, from evergreen funds and traditional closed-end fund structures to tailor-made solutions.
