

2 Weeks. 2 Council Meetings. **Still No Answers.**

It has been **two weeks** and the City of Patterson has held **two City Council meetings** since it was revealed that **City Attorney Nubia Goldstein is a registered lobbyist** and her law firm, **White Brenner LLP**, has been paid **approximately \$1 million to lobby for the American Chemistry Council (ACC)**—a powerful chemical-industry trade association that has opposed stronger limits on chromium-6 in drinking water.

Yet, Patterson residents still have not received any explanation from their city leaders.

Mayor Clauzel and the Patterson City Council have a responsibility to put residents first. That includes making decisions to protect public health and restore public trust.

The clock is ticking. Do not let the City sweep this issue under the rug.
